Table of Contents

Track 01: Postgrowth	15
Xin Li & Ting Yang, Urban Planning In The Post-Growth Era: Insights From World Bank Indicators	16
Karin Holmstrand, Planning Beyond Growth: A Case Study Of Wellbeing-Oriented Planning In Wales And Cornwall	50
Siwei Peng & Lu Yufei Na, Research On Rural Revitalization Planning From The Perspective Of Ecological Capitalization: Taking Nuanshui Township As An Example	69
Wei Wei, From Howard’s Garden City Movement To Zero-Carbon New Towns In The Postgrowth Era: The Case Of New Town Development In The Context Of Carbon Neutrality Of Shanghai	83
Jinyi Wang, Shijie Sun & Xiaoyu Cong, The Internet As A Business Game Changer: A Study On Invisible Consumption Spaces In Nanjing Old City	94
Federica Fiacco, Kezala Jere & Gianni Talamini, Can Fast Urban Growth Be Low-Carbon? Sub-Saharan Cities Towards New Territorial Strategies	110
Qiang Yao, Research On Strategies For Enhancing Urban Spatial Resilience In Shanghai Based On The Connotations And Characteristics Of ”Resilient Cities”	128
Qiang Yao, Na An & Qingji Shen, Research On Strategies For Enhancing Urban Spatial Resilience In Shanghai Based On The Connotations And Characteristics Of ”Resilient Cities”	151
Giulia Luciani, Nature Is (Not) Democratic. Notes For A Community-Based Approach To “Natural Resources”	174
Chiara Pisano, Adriana Galderisi & Giada Limongi, What Practices To Overcome The “Cultural Remoteness” Of Inner Peripheries? A Focus On Italian Case Studies	186
Dongdong Chen, Micro-Intervention As A New Approach For Urban Regeneration In Metropolises: A Case Study In Beijing	203
Track 02: Markets	216
Alberto Bortolotti, Urban Policy Financialisation In Mega-Projects. The Case Of Milano Innovation District	218
Alberto Bortolotti, Large-Scale Urban Development Projects As A Dilemma Affecting The Housing Crisis. The Case Of Milano Porta Romana	235
Pauline Gali, Approaching Urban Renewal Through The Lens Of Urban Rent Theory	249
Emanuele Garda & Marta Rodeschini, Public-Private Dialogue In The Cultural Reuse Of Historical And Architectural Heritage: The Example Of The Carmine Monastery In Italy	265
Track 03: Law	278
Guangkun Zhou, Fallacies And Revisions: Evaluation Of Economic Benefits Of Development Rights Transfer And Density Bonus –17th And 69th Neighborhoods In Shanghai Hongkou Historic Conservation Districts Regeneration As The Case	280
Zhiyu Pang & Yacheng Song, A Framework For Analysing Physical Form Outcomes Of Value Capture Paths Of Regeneration Projects In Residential Historic Areas	305
Sara Benkirane, Navigating Complexity: Exploring Land Planning And Management Challenges In Morocco	317
Li Wang, Can Transferable Development Rights Be Applied In The Chinese Context? — A Comparative Study Between China And The United States	336

Carolina Giaimo, Principles And Rules For Spatial Planning Governance And Government In Italy	353
Ines Calor, Martinho Augusto & Mateus Magarotto, Land Readjustment In Braga Municipality - Looking Into The Future, Learning From The Past	365
Linlin Dai, Changwei Feng, Jian Lin & Yun Liu, Multi-Planning Integration: Construction And Progress Of China's National Territory Spatial Planning System	383
Chenli Qian, Yi Huang & Xiao Wu, A Comparative Study On Zoning Guidelines For Different Planning Types In China	400
Zhao Zhao, Study On The Response Of Local Legislation To Coordinate The Interests Of Multiple Subjects In Urban Renewal From The Perspective Of Property Rights . . .	411
Track 04: Borders	428
Yifan Cai, The Evolution Of Spatial Planning In The Border Area Between Shenzhen And Hong Kong, China	430
Wenbo Xu & Shengbo Zhao, Administrative Boundary Effects Of Cross-Border Migration Of Manufacturing Enterprises: A Case Study From The Pearl River Delta In China	444
Yuxiao Ma, Jianzhong Huang, Qiao Zhang & Jing Deng, Coordinated Optimisation Of Multi-Level Rail Transit Network And Regional Spatial: International Contextual Differences And The Case Of Shanghai	462
Rodrigo Vielmo Moura, Analysing Local Cross-Border Cooperation In Fragile Peripheral Areas In Northern Italy	479
Lin Tian & Yao Cheng, Core-Periphery Industrial Linkages Of The Metropolitan Area From The Perspective Of Enterprise Linkages: The Case Of Three Cities Adjacent To Shanghai	497
Yin Dou & Yihao Zhang, Study On The Characteristics Of Regional Intergovernmental Relationships Network, Based On The Analysis Of Planning Texts	515
Andrés Martínez & Pere Fuertes, «The Franco-Spanish Mediterranean Strip. An Opportunity To Turn Applied Research Into Trans-Border Planning»	523
Flore Guichot, Transit-Oriented Development In Asymmetrical Context: Learning From Cross-Border Paradoxes In The Great Geneva.	539
Track 05: Mobility	561
Kaichen Zhou & Lan Wang, Deciphering The Scaling Laws And Spatial Structure In Urban Micro-Mobility: Empirical Evidence From Bike-Sharing In Shanghai	563
Jia Yi Liu & Yanbin Li, Exploring The Assessment And Strategies Of Street Inclusivity In Suzhou, China	576
Arne Markuske, Urban Peripheries And The 15-Minute City	594
Junting Lin, Zhiwei Li, Huali Zhang & Yu Zhuang, Form Follow Mobility: A Method To Identify Potential Urbanization Area In The Over-Rail Plane Under The Orientation Of Station-City Integration And Pedestrian Priority	613
Ayesha Anwar & Hong Leng, Stepping Towards A Sustainable Future With Tod: Evaluating The Potential Of The Lahore City For A Regional Policy Reform	627
Yunjing Wang & Yu Zhuang, Layout Patterns And Crowd Flows Of Commercial Space In High-Speed-Rail Station Complexes	650
Sota Aida, Hirokazu Abe, Noriko Otsuka, Akira Takahashi & Kensuke Yasufuku, The Evaluation On Walkability In An Aging Society: The Case Of Senri New Town, Japan	671
Giovanni Fusco, Meta Berghauser Pont, Valerio Cutini & Angelika Psenner, Guiding Principles For The 15-Minute City In Peripheral Areas: The Emc2 Model.	690

Cédric Wehrle, Spaces Of Automobility: Diverging Trajectories Within The Liège-Aachen Diffuse City	708
Jan Bittner, Accessibility Of Local Amenities To Reduce Car Dependency: Obsolete Concept Or Change Yet To Come? The Prague Case.	719
Yunjing Wang & Yu Zhuang, Layout Patterns And Crowd Flows Of Commercial Space In High-Speed-Rail Station Complexes – Take Three Chinese High-Speed-Rail Station Complexes As Examples	732
Arzu Erturan & Bahar Aksel, Being A Child On A Car Free Island: Exploring Independent Mobility And Children’s Perception In Büyükkada-Istanbul	755
Hana Elattar, Arjama Mukherjee & Jörg Rainer Noennig, Stakeholders Of Participatory Planning: A Comparisonbetween Megacities And Cities In Europe	771
Michelangelo Fusi & Michela Tiboni, The Role Of Urban Planning In Perceived Accessibility To Public Transport	788
Miruna Draghia & Valentina Stan, Exploring Transformations In Sustainable Urban Mobility: Insights From Citywalk 2.0 Project And Beyond	804
Track 06: Governance	820
Camilo Vladimir De Lima Amaral, Antonio Di Campli, Srivastava Rishabh & Elisa Verri, Conflictual Natures: The Role Of Architectural Imagination In Building Paths For Ecological Transition In The City Of Goias – Brasil	822
Yanxia Mu, Feng Luan & Jiahui Fan, Study On Governance Model Of Multi-Subject Participation In Rural Industry Development – A Case Study Of Shanghai Rural Revitalization Model Village	850
Kaixuan Lin, Jieming Zhu & Min Zhou, A Study On The Integrated Governance Model Of Development Zone And Town: Take South Jiangsu Region Of China As An Example	856
Pan Hu, Keyi Sun, Jialu Cheng & Yu Shi, Evaluation And Spatial Governance Strategies For Old Residential Areas’ Renewal And Reconstruction In Urban Downtown Districts: A Case Study Of 70 Old Residential Areas In Changzhou ,China	882
Pieterjan Schraepen & Joris Voets, How To Deal With Conflictual Central Policy Incentives? Regional Governance Dynamics In Flanders Unpacked.	899
Robin Neef, Wim Leendertse, Stijn De Koning, Jildou Gerritsen & Rebekka De Witte, Tensions In The Original Premises Of The Iad Framework Compared To Contemporary Spatial Applications: Revisiting Elinor Ostrom	914
Zhuyang Liu, Wenxiao Yang & Beiyin Ni, Enterprise-Led Or Government-Led? Research On The Characteristics And Mechanisms Of Rural Gentrification In Metropolitan Suburbs Driven By Significant Projects Taking Lianmin Village In Shanghai As An Example	930
Na An, Chenyu Huang & Jiawei Yao, Awareness And Willingness Of Chinese Households To Reduce Carbon Footprint In Daily Life	940
Hana Elattar, Stakeholders Of Participatory Planning: A Comparison Between Megacities And Cities In Europe	958
Giulia Spadafina, Planning For Proximity In A Fragile Urban Context. The Case Of Tirana	973
Verena Lenna, The Publicness Of Urban Commons. Insights From The Brussels Commoning Scene.	987
Sarah Isabella Chiodi & Lorenzo Liguoro, Urban Development Strategies: Navigating The Complexities Of Multi-Level Governance In Northern Italy	1003
Marida Borrello, Tiers Lieux And Wijkhuubs: Infrastructures For A “Situated Democracy”	?1023

Track 07: Environment And Climate**1042**

Zhenpeng Zhang, Fang Fang, Andrew Greenlee & Jiankun Lou, Urban Heat Mitigation Effect And Affordable Housing Greenery Injustice Measured By Green View Index (Gvi): A Case Study In Washington, D.c.	1044
Zhenpeng Zhang, Fang Fang, Andrew Greenlee & Jiankun Lou, Urban Heat Mitigation Effect And Affordable Housing Greenery Injustice Measured By Green View Index (Gvi): A Case Study In Washington, D.c.	1065
Ruonan Jia & Zuobin Wu, Research On Spatial Optimization Strategies Of Rural Settlements In The Loess Plateau From The Perspective Of Disaster Prevention And Reduction—A Case Study Of Gaoxigou Village,China	1086
Sadaf Pirouzi, Fabiana Fabri & Loïc Sauvee, A Gis-Based Method For Prioritising Brownfieldstransformation Into Multifunctional Urban Greeninfrastructure: The Case Of Rouen Metropolis	1097
Luciano Agustin Pana Tronca, Climate And Transport Planning: A Messy Junction . . .	1105
Lucrezia Gelichi, Chlorophyll City: Regenerative And Restorative Urban Planning For A Sustainable Future Through Extensive And Branching Reforestation Initiatives . . .	1117
Beatriz Condessa & Rita Nicolau, Comparative Analysis Of Net Land Take In Portugal's Metropolitan Areas	1130
Jiankun Lou, Lan Wang, Jiayu Li & Yinghui Jia, How Urban Morphology Affects Wind-Heat Environment: An Example In Beijing From Ancient Cities To Modern Cities .	1140
Karina Landman, Regenerative Public Space As Game-Changing Option For Thriving Communities	1154
Christian Großhauser, „Potential Of Hydrogen Production By Wastewater Treatment Plants (Wwtps) - Technologies, Benefits, Challenges And Limitations Using The Example Of The Wastewater Treatment Plant Straubing“	1169
Caroline Andersen & Martin Schulwitz, Assessing Regional Potentials For Green Hydrogen Infrastructure Planning In Germany	1187
Giulio Giovannoni, Removing Cultural Barriers To Climate Change Adaptation In Tuscany	1202
Roberta Pistoni, The Increasing Entry Of The Energy Subject In Spatial Planning Policies: New Visions For Energy Landscapes	1216
Apostolos Lagarias, Re-Definition(S) Of The Role Of Central Business Districts Under The Effect Of Extreme Heat Conditions And Climate Change: Evidence From The Mediterranean Context	1232
Lucila Urda Peña, Javier Julio Malo De Molina & Emilio Ontiveros, Analysis And Evaluation Of The Quality Of Open Spaces And Green Zones In Periurban Landscapes, The Greengates As Strategic Nodes Of Green Infrastructures.	1249
Krystallia Kamvasinou & Lorenzo Stefano Iannizzotto, Rethinking The Waste Of Planetary Urbanization For Urban Challenges: Potential, Strategies And Governance In Terrain Vague Projects	1269
Giulia Giacche, Anais Mohamed, Jean-Noël Consalès & Romain Melot, An Analysis Of Current Integration Of Urban Agriculture And Domestic Garden Into Urban Planning: The Case Of Île-De-France Region	1286
Evangelia Athanassiou, Planning Tools And Building Regulations Towards Greening Densely-Built Greek Cities: Scales Of ‘Urban Green Grabbing’	1300
Emanuele Garda, Greening The Void: Actions For The De-Sealing And Renaturalisation Of Soils In Brownfield Regeneration Processes	1311
Margarida Calmeiro, The City Of Tomorrow Is Already With Us	1323

Ani Tola (Panariti), Paul Louis Meunier, Teuta Peshkopia & Geri Bisha, Strategies To Mitigate The Urban Heat Island Effect In Mediterranean Promenades Of France, Italy, And Albania	1334
Vidhulekha Tiwari, Ram Avtar, Santanu Bandyopadhyay & Arnab Jana, Quantifying The Effects Of Spatial Determinants Of Cooking Fuel Choices In India	1357
Alan March, Anna Hurlimann, Sareh Moosavi & Judy Bush, The Built Environment Policy And Practice Context To Facilitate Climate Change Action - The Role For Planning And Design	1371
Giovanni Ottaviano & Luciano De Bonis, The Self-Government Approach To The Planning Of The Gran Sasso Laga Park	1388

Track 08: Public Space **1398**

Ifigeneia Kokkali, The Open Orchestra Project In The Public Spaces Of Athens: An Urban Utopia With Transformative Power?	1400
Brigida Proto, On Freedom, Public Space And Women’s Experiences Of Prostitution. The (In)Visible World Of The Bois De Vincennes In Paris.	1415
Yu Zhang & Qiang Sheng, Study On Spatial Distribution Of Fresh Supermarket Based On Street View Data	1429
Christine Mady, Repurposing Abandoned Transport Infrastructure Towards Social Inclusion: The Case Of Baana, Helsinki	1442
Francesca Dal Cin, Cristiana Valente Monteiro, Nawaf Al Mushayt, Maria Ines Franco, Maria Matos Silva & Sérgio Barreiros Proença, The Public Space Between Land And Sea. Quarteira’s Case	1469
Pelin Işık & Christa Reicher, Playful Urbanism In Diyarbakır: Dynamics Of Power And Play In Public Space Design	1485
Ash Ulubaş Hamurcu & Fatih Terzi, Exploring User Preferences And Place Attachment In Urban (Public) Spaces: A Case Study Of Kadıköy Historical City Centre, Istanbul, Türkiye	1505
Yiting Jiang, How Social Media Influences Rural Spatial Practice And Place Identity: A Case Study Of Fuling Village	1523
Yan Zhou, Xinjie Shen & Hong Jiang, Continuing Community Spirit: Study On The Public Space Of “Pu-Jing” Community In The Ancient City Of Quanzhou	1537
Qianhui He, The Impact Of Online Social Activities On Public Spaces In The Digital Era - A Case Study Of Guochuang Park In Nanjing	1551
Giulio Giovannoni, Enhancing Suburban Life With Victor Gruen	1569
Ina Macaione, Alessandro Raffa & Bianca Andaloro, Design Climate-Adaptive Urban Green Regeneration: Nbs Strategies For Future-Proof Streetscapes	1578
Karla Barrantes Chaves, Nida Cruz Zúñiga & Erick Centeno Mora, Urban Parks Through People’s New Lens: Opportunities Behind Covid-19 For Public Spaces’ Policies In Costa Rica.	1605
Catarina Todorovic Caldeira & Ljiljana Cavic, Heterotopic Pocket Spaces Through Intermittent Occupancy	1623
Gregorio Pezzoli & Emanuele Garda, Designing The ‘Right To Mobility’: A Holistic Analysis To Rethink The Public City And Fighting Heat Waves In Urban Areas	1633
Kundani Makakavhule & Kwazi Ngcobo, In The Name Of Peace, Sanitise!	1644
May Saeedi, Tom Jefferies & Sean Cullen, Analytical Study Of Hospitality Culture And Urban Identity And Its Impact On The Future Of Marine Tourism In Red Sea Coastal Port Cities: Case Study Of Jeddah Saudi Arabia.	1659

Track 09: Inclusion	1680
Dongyu Zhang, Hong Leng & Ziqing Yuan, Research On The Psychological Health Impacts For Children In Urban Built Environments	1682
Mengyao Zhang & Pan Hu, Study On The Comparison Of Development Efficiency Between Inner And Outer Urban Circles And The Balanced Development Strategy Of Marginal Areas: Analysis Based On The County Scale Of Chongqing	1694
Zsófi Veres, Maintain Temporal Dynamics: What Temporal Characteristic Needs To Be Preserved Within The Historic Marketplaces Of Palermo To Encourage Sustained Interactions?	1716
Xiaohu Zhang & Haixiao Pan, Equity In Essential Services Accessibility Among The Elderly: A Comparison Of Community Resilience During And After The Covid-19 Pandemic	1735
Zihao Chen & Yifan Yu, Study On Youth Friendly Urban Renewal Strategies From An Inclusive Perspective	1755
Yinghui Jia, Lan Wang & Jiankun Lou, Dispersed Urban Spatial Structure And Increased Urban Greenness Could Reduce Intra-City Health Inequalities In England	1766
Yajun Wen & Yifan Yu, Exploring Colour Planning Strategies For Children’s Outdoor Playgrounds In Communities: An Analysis Of Children’s Diverse Preferences In Shanghai, China	1777
Xiaojie Shen, Enhancing Social Interaction In Urban Spaces: The Role Of Vertical Greening Systems In High-Density Areas	1785
Rebecca Staats, Can Care Help Conceptualise Place Futures? Exploring The Potential Of Care As An Analytical Framework For Understanding Place Qualities	1797
Xiaojie Shen, Enhancing Social Interaction In Urban Spaces: The Role Of Vertical Greening Systems In High-Density Areas	1814
Xiaojie Shen, Enhancing Social Interaction In Urban Spaces: The Role Of Vertical Greening Systems In High-Density Areas	1826
Krity Gera, Peter Hasdell, Gerhard Bruyns & Diego Sepulveda Carmona, Exploring New Methodological Approaches To Mapping Socio-Spatial Mobilities	1838
Yun Yu & Yi Huang, How Are Youth Living In Ageing Neighbourhoods? A Case Study In The Central District Of Shanghai	1855
Angelina Grelle, Embracing Diversity: Ararat’s Role In Inclusive Urban Development And Migration In Rome	1867
Carla Baldissera, All-Round Walkability Condition To Primary School In Milan	1878
Ye Zhan & Yifan Yu, Innovative Tools For Building Child-Friendly Communities: The Development And Application Of Child-Friendly Neighbourhood (Cfn) Built Environment Audit Tools, Insights From Shanghai	1890
Track 10: Education	1912
Yujiao Wang, Xiao Wang, Chenyi Cai & Peng Tang, Deep Learning-Driven Morphological Dataset And Analysis Methods For Chinese Campuses	1913
Xueling Wang, Dynamic Visual Assessment Of Urban Streetscapes: Hengshan Street In Shanghai As A Case Study	1932
Katarzyna Rędzińska, Geospatial Virtual Reality And Planning Ar Laboratory For Education In Spatial Planning	1955
Anna Kaczorowska, Emiliya Popova, Günther H. Filz & Dorota Kamrowska-Zaluska, Building Tomorrow’s Urban Futures: Reflections On The “Builddigicraft” Project And The Pursuit Of High-Quality “Baukultur” In Higher Education.	1965

Aleksandra Stupar, Ivan Simic, Vladimir Mihajlov & Aleksandar Grujic, Embracing The Green Curricula? The New European Bauhaus As A Driver Of Environmental Change In The University Education	1984
Track 11: Housing	1997
Miao Hu, Housing Improvement In Historic Districts Oriented Towards The People’s ‘Sense Of Gain’ A Case Of Shanghai, China	1998
Lin Zhou & Chen Chen, Towards An Inclusive And Developmental Housing Regime In Chinese Megacities? Evidence From The Implementation Of The Affordable Rental Housing Programme In Shanghai	2007
Jiwen Han & Li Bao, Dynamics, Mechanisms, And Benefits Of Micro-Renewal In Urban Residential Areas A Case Study Of The Xiaoxihu Block In Nanjing	2027
Muzeyyen Anil Senyel Kurkcuoglu, Evaluation Of Fuel Poverty In Urban Regeneration Areas: A Case Study Of Ankara, Türkiye	2046
Teresa Frausin & Elisa Mariavittoria Bertolini, On Housing Affordability. Questioning The European Policy Perspective In Action	2058
Hee-Jung Jun & Jeong Hyun, Social Capital Among Public Housing Residents: A Comparative Study Between Mixed-Income Communities And Independent Public Housing	2082
Qianzheng Geng, Ziming Wang, Jiaying Cui & Weizhen Shen, How Shanghai’s Urban Heritage Conservation Plan Loses Effect? Paradoxical Governance Goals And Disparities In The Regeneration Of Residential Historic Neighbourhoods	2101
Jiaxin Qi & Yuhang Rao, Research On Informal Residential Space Under Viaducts In Shanghai: From The Perspective Of Socio-Spatial Transformation	2128
Elena Marchigiani & Valentina Novak, Rental Affordability, Housing First And Beyond. A Focus On The City Of Trieste (Italy)	2141
Gonçalo Antunes, João Seixas, Rui Pedro Julião, Jorge Ferreira, Margarida Picanço & Cristina Morgado, Housing Prices In Portugal And The Covid-19 Pandemic	2168
Track 12: Futuring	2187
Liangkai Deng & De Wang, Individualized Perspective On Spatial Restructuring Of E-Commerce Villages: A Case Study Of Village Q In Shaanxi Province, China	2189
Enze Zhang & Jiaying Huang, Study On The Evolution Characteristics And Collaborative Governance Strategies Of “Production-Living-Ecological” Space At County Level In Loess Hills And Gully Areas–Taking Huangling County As An Example	2200
Elisabetta Vitale Brovarone, Loris Servillo & Alys Solly, Backcasting As A Tool For Governing Transitions Beyond Techno-Solutionism: The Torino2050 And Tomove Projects	2213
Melih Birik & Bahar Aksel Enşici, Projecting The Future: Scenario Building And Storytelling For Holistic Perception Of Future Context.	2223
Lea Petrović Krajnik, Damir Krajnik, Lucija Kustić & Marta Marelić, Scenario Planning Method In Conceiving Future Development Of Peripheral Areas: Island – City – Spatial Interconnecting For The Sustainable City Of Tomorrow	2237
Camilo Vladimir De Lima Amaral, Antonio Di Campli, Srivastava Rishabh & Elisa Verri, Utopias As A Design-Thinking Key For Counter-Hegemonic Ecological Transitions	2256
Jan Schreurs, Integrating Metaphors For A Planning Ecology. Evaluating The Work Of A Local Quality Platform	2275
Antti Roose & Pille Metspalu, Unravelling A Sustainability Vision In The National Spatial Plan	2294

Miguel L. Navarro-Ligero, Francisco García-Triviño, Manuel Pérez-Docampo & Julio A. Soria-Lara, Prototyping Future Scenarios For Urban Planning Through The Production Of Virtual Reality Scenes	2306
Kersten Nabielek, David Hamers & Rienk Kuiper, Spatial Scenarios As A Tool For Future-Proof Spatial Planning In The Netherlands	2320
Track 13: Theories	2334
Yosef Jabareen, Theorizing State Dispossession Planning Vs. Community Self-Determinative Planning: The Case Of The Al-Bostan Palestinian Community Struggle Against The Israeli Planning In East Jerusalem	2335
Siling Chen, Jianing Shi, Jingxin Wang & Jianzhong Huang, Reviewing The Applications And Prospects Of The Concept 'Image Of The City' In Urban Planning Research	2355
Loukas Triantis, Planning As Magma. Suggestions From The Work Of Cornelius Castoriadis	2367
Elli Papastergiou, Athanasios Kalogeris & Georgia Pozoukidou, Subjective (Social) Well-Being In The Neighbourhood: A Conceptual Exploration	2382
Thomas Buhler, Isabelle Chesneau & Annabel Richeton, Since When Has Regional Planning Been Vague? An Analysis Of Textual Data From 7 Regional Master Plans Of Ile-De-France Region Between 1939 And 2019	2399
Jarre Parkatti, Reconnecting Planning Theory With Urban Design: Public Space As A Social And Architectural Concern	2416
Yanyun Mao & Jian Zhuo, Adaptive Planning In China: Research Progress, Implementation Effectiveness, And Future Prospects Based On Knowledge Mapping And Meta Analysis	2430
Track 14: Policy Mobility	2451
Florence Bousquet, Exportation Of The Parisian's Urban Knowledge (1976-2005)	2453
Katerina Christoforaki, Post Covid19 Topiography: Prospects Of The Polycentric Operational Model For A Greek City.	2468
Yue Zhang & Siling Chen, Optimizing Land Resource Allocation And Functional Configuration In High-Tech Industrial Parks: A Case Study Of Chengdu Xinchuan High-Tech Innovation Park	2482
Daniele Soraggi & Valentina Costa, Ligurian Transfer: When Territorial Constraints May Hamper Mobility Policies Replicability	2493
Ludmila Kolouchova, From Global North To Global South: Exploring Creative City Policy Mobilities And Their Urban Impacts	2508
Sara Nafi, Transit-Oriented Development Approach To Social Sustainability, Doha City As A Case Study	2524
Ludmila Kolouchova, From Global North To Global South: Exploring Creative City Policy Mobilities And Their Urban Impacts	2539
Track 15: Histories	2555
Xiaoxi Guo & Sihan Yang, Retaining Industrial Heritage Publicness: The Interrelationship Of Industrial Heritage And Public Space	2556
Beini Guo, Research On The Protection And Development Of Industrial Heritage In China And Europe Under The Background Of Urban Renewal—The Case Of Hanyeping Company	2593
Jie Tang, Xiaoqi Ye & Haidong Zhou, Research On Sustainable Protection And Inheritance Of Overseas Chinese Hometown Cultural Heritage: A Case Study Of Xiangshan Ancient City	2610

Yimin Wei, Zuobin Wu, Weining Shi, Chao Ma & Wendi Dong, Study On Refining Historical And Cultural Values Of Urban And Rural Areas In Qinghai Province	2626
Weining Shi, Zuobin Wu, Yimin Wei & Wendi Dong, Research On The Construction Of The Tang-Tibet Ancient Road (Qinghai Section) Heritage Corridor From The Perspective Of Cultural Ecology	2642
Xiaoyu Shi, Integrating Curation And Retail In Chinese Urban Commercial Revitalization: The Transnational Exchange Of The Curatorial Concept In Shanghai And Beijing, China	2658
Anjali Krishan Sharma, Planning Histories Of Delhi: Urban Governance Perspective . . .	2670
Bilge Nur Bektaş & Serdar M. A. Nizamoğlu, Interpretation And Presentation Strategies For The Heritage Of The Past: The Case Of Smyrna	2690
Jiaying Cui, Weizhen Shen & Qianzheng Geng, Rural Heritage Governed As Commons: A Case Study Of A Chinese Heritage Village From The Cultural Capital Perspective	2722
Cong Li & Kecheng Liu, An Analysis Of Value Reconstruction In Constructive Protection Practice For Archaeological Site Parks	2742
Track 16: Networks And Data	2764
Zhehao Song, Jinze Li, Chenyi Cai, Yacheng Song, Yidan Jin & Peng Tang, Digital Modelling And Analysis Of The Network Structure For Residential Historic Areas In China	2766
Yin-Chen Chen, Explore The Improvement Of Humanity-Oriented Transportation Through Adaptive Topology Optimization Of Traffic Networks Using Density Fields	2783

Public-private dialogue in the cultural reuse of historical and architectural heritage: the example of the Carmine Monastery in Italy

Abstract

The paper analyses the restoration process of the former Monastero del Carmine, a complex structure of historical value located in the city of Bergamo (Italy). Built after the 14th century, the Monastery experienced a long period of abandonment from the 18th century until the second half of the 20th century when the property was transferred to the Municipality. In the gradual recovery, the theatre company Teatro Tascabile di Bergamo (TTB) played a significant role. Important for the reuse process was the Special Public Private Partnership activated between the TTB and the Municipality, thanks to which a complex process of material and immaterial regeneration began. The paper presents a public heritage regeneration process highlighting the role of the actors involved and the technical-administrative tool adopted.

keywords

Public-private Partnership; Abandoned place; Cultural Heritage; Restoration; Common good

Introduction

The unused building heritage, whether privately or publicly owned, represents a significant presence in the Italian territory (Garda, 2018). To define appropriate strategies and actions for reuse, it is necessary to consider both its quantitative conditions and the different approaches. In Italy, private buildings are divided into: 50% second homes/vacation homes, 10% dwellings occupied by non-residents or rented on the "informal market," and approximately 40% of homes are completely unused (Gentili and Hoekstra, 2018). Abandoned private buildings, which make up 30% of the total heritage, amount to 10 million properties (Istat, 2019). Various approaches can be recognized concerning reuse methods: (i) coercive by the public authority; (ii) enabling to promote the reuse of properties; (iii) incentivizing, particularly at the economic level (Moroni, 2020).

Conversely, public buildings in Italy amount to more than one million two hundred thousand units (MEF, 2021). About 70% (over 800 thousand buildings) are owned by local administrations (municipalities), corresponding to 82% of the total surface area. The rest is owned by central state administrations or other central public entities. A significant percentage, around 7%, of these public buildings is currently unused. The value of unused public buildings is estimated to be 13 billion euros (MEF, 2021)¹.

¹ The value of unused public assets directly managed by administrations is estimated at approximately 66 billion euros, divided as follows: 14 billion euros for "institutional" properties

There are three ways through which a public building can be recovered: (i) through sale by the owning institution; (ii) by transformation and direct use for new public needs; (iii) by transferring only the management to other entities for public or collective interest purposes (Moroni, 2020). For these reasons, the enhancement of public real estate assets has been a significant issue in the policies of central and local administrations for years (Mangialardo, 2017).

To the public-private dichotomy, Nobel Prize-winning economist Elinor Ostrom adds the "third way": common goods made by communities. That is, a place that continues to exist and function because there is a community that takes care of it and, in this sense, regenerates if supported by the self-organized community, allowing collective benefits and fostering cooperation (Ostrom, 1990).

In the early 1990s, within the context of feminist studies, American philosopher Joan Tronto and activist Berenice Fisher developed the "care theory", defining it as:

"a species activity that includes everything we do to maintain, continue, and repair our 'world' so that we can live in it as well as possible. That world includes our bodies, ourselves, and our environment, all of which we seek to interweave in a complex, life-sustaining web" (Tronto, Fisher, 1990, p. 40)².

This essay aims to delve into a specific process of reusing an architectural complex of public ownership located in an Italian city (Bergamo), where the municipal authority has entrusted the management of this "common good" to a local association dedicated to promoting cultural functions. The contribution, in particular, not only presents the complex history of the site (Monastero del Carmine) and the community of managers/users (Teatro Tascabile di Bergamo) but also outlines the initial results of an ongoing research project on the technical and managerial tools used in the progressive regeneration process of this significant entity.

The urban context

The paper addresses the case of the Monastero del Carmine located in the Municipality of Bergamo, a medium-sized city in the Lombardy Region³ with more than 120,000 inhabitants and the capital of the province of the same name, which has more than 1.1 million residents.

Bergamo is situated and developed on a small isolated hill system (up to 590 meters above sea level) at the foothills of the valleys and overlooking the plain. From its origins, the city of Bergamo has been connected to the flatlands through natural corridors that mediate the transit

leased to private individuals for a fee; 7.6 billion euros for "residential and commercial" properties – excluding "social residential" – leased to private individuals for a fee; 13 billion euros for "unused" properties; 5.4 billion euros for "institutional" properties given to private individuals free of charge and 1.2 billion euros for "residential and commercial" properties; 22.5 billion euros for "residential and commercial" properties leased to private individuals for social purposes.

² From this perspective, the theory of care assumes a political and moral significance related to the public sphere. In Tronto's interpretation, care is articulated into four analytically distinct but interconnected phases: (i) caring about; (ii) taking care of; (iii) caregiving; (iv) care receiving (Tronto, 1993).

³ Region Lombardy is the most populous Italian region, with nearly 10 million inhabitants. The region is divided into 1504 municipalities grouped into 12 provinces with Milan as the capital. It is located in the center of northern Italy, at the foot of the Alps and in the middle of the Po Valley, and is situated on the main routes connecting the Mediterranean area and central Europe. Its surface area covers 23,860 square kilometers and is divided almost equally between the plains (accounting for about 47 percent of the territory) and the mountainous areas (accounting for 41 percent). The remaining 12 percent of the region is hilly.

between the mountain and the plain, along which historical settlements have progressively developed. It is precisely in close dependence on its morphological and conformational peculiarities that the city developed its spatial structure; it guided its expansion by distributing into distinct parts and planes: the main city in an elevated position on the mountain, and the hamlets, stretched outward, some of which are larger than the city itself (Pagani, 2000). The territory and the city of Bergamo have progressively shaped themselves over centuries, leaving multiple marks on its current urban structure.

Therefore, the territorial system of Bergamo shows a tension between urbanization and residual rural spaces, in line with urban changes recognizable on a regional scale in Lombardy and within the broader Po Valley. The Municipality of Bergamo today consists of 25 neighborhoods of varying sizes and functions. The neighborhood recognized as the core with high historical, cultural, and tourist value is Città Alta.

The "*Map of the City and Outer Hamlets of Bergamo*" drawn by Giuseppe Manzini in 1816 constitutes a fundamental milestone in the history of Bergamo cartography, being among the first to result from a territorial survey, and clearly shows the palm-like structure of the city.

Fig. 1. "Map of the City and Outer Hamlets of Bergamo" by Giuseppe Manzini, 1816, consulted at the Angelo Mai Civic Library in Bergamo. The map is particularly significant as it shows the central role of Città Alta in territorial development.

In fact, the original residential nucleus of Città Alta gradually expanded, reaching the plain below as early as the Roman period. This expansion did not occur in a radial manner but along well-defined paths, outlining a city with a palm-shaped layout, where the palm is formed by the dense core of the city on the hill, and the finger-like extensions of the hamlets descend to the plain, marking the directions towards nearby centers. Over time, there was a progressive consolidation of the Città Bassa, where the “character of the place as a space of different sociality, based on the ephemeral, but also on impromptu presences of services as peripheral as they are complementary to the domestic life of the ancient city” becomes evident (Pizzigoni, 2021).

The twentieth century marks the era of modern urban planning, focusing primarily on urban expansion, the construction of the “new city” on the plain, and the “modernization” of the pre-existing urban layout (Bonfantini, 2008). Specifically, in Città Alta, three plans were implemented: (i) the Rehabilitation Plan (1926-1935) to meet hygiene, building, and road requirements necessary for the modern life of the early twentieth century; (ii) the Conservation Rehabilitation Plan (1975-1980) aimed at the conscious preservation and transmission of the historical heritage; (iii) the Recovery Plan (2005-2015), interpreting the historic center as a realm of multiple interactions and a place meant to play an active and driving role within a complex territorial system.

Today, Città Alta faces issues common to many Italian historic centers:

- It is subjected to massive daily tourism that often does not fully appreciate its cultural richness.
- Most available financial resources seem directed towards mere tourist enhancement rather than cultural-tourist development.
- It risks losing the diverse social strata that constituted its vitality until the 1970s due to tensions between residents and external populations (tourists).
- It exhibits low cultural activism among its citizens.

However, within this territorial context, a diverse network of social, educational, and cultural activities emerges, provided by significant public institutions that coexist and operate by promoting quality and valuable initiatives. In Città Alta, there are: 7 museums, 4 libraries, a botanical garden, numerous schools (including kindergartens, primary, secondary, and a Classical High School), and two campuses of the University of Bergamo.

Also noteworthy is the presence of the Association for Città Alta and the Hills of Bergamo, formed by neighborhood residents, who are committed to promoting an idea of sustainable and active citizenship, responsible tourism that integrates rather than impoverishes the social composition of Città Alta, and ensures the protection of local shops and the availability of permanent cultural services.

Case Study Presentation

The *Monastero del Carmine* (Monastery of Carmine) is located in the heart of the historic center of Bergamo, in the northern part of Città Alta. This architectural complex is deeply involved in the urban development of the city and incorporates a series of architectural elements that have existed for centuries into a unified building.

The earliest records of the Monastero del Carmine date back to the 12th century when the “Humiliated Monks” established a textile workshop there. The Carmelites later took over, giving the complex its name. The monastery saw its peak activity between the late 1400s and early 1500s with the construction of most of the cloister, the refectory, the monks' quarters, and

concluded in the second half of the 1600s with the creation of the stables, the Chapter Hall, and the new library.

It was suppressed in 1797 during the Napoleonic era, followed by a period of decline and degradation. The premises were used as residences and craft workshops.

In 1956, the "parish benefice" of Sant'Agata donated the complex to the Municipality of Bergamo, and a twenty-year period of structural consolidation work began. Although these efforts remedied serious structural issues, often through emergency interventions involving the demolition of vaults and the reconstruction of floors and roofs, they led to the loss of some original architectural features.

During those years, numerous reflections and proposals were made for a new use of the Carmine complex, such as a Museum of Arts and Popular Traditions, a boarding school, or socio-cultural activities. In 1982, part of the complex was occupied by the Mycological Group and the Speleological Group of the "Nottole" (AA.VV., 1982).

Despite numerous proposals, the building remained largely unused for several decades until 1996, when it began to host the Teatro Tascabile of Bergamo. This gave it the identity it has today, enhancing its significant relationships with the life of Città Alta and its social and cultural role.

Fig. 2. The image identifies the former Carmine Monastery complex (white rectangle) within the historic city (source: Google Earth)

History of the TTB

The *Teatro Tascabile of Bergamo* (TTB), founded in 1973 by Renzo Vescovi, has historically been one of the main actors in Bergamo's cultural life and is an internationally recognized theater company. It has operated from the former Monastero del Carmine since 1996, through successive precarious municipal concessions, the latest of which was signed in February 2016. The presence of the TTB in the former Monastero del Carmine and the prestigious cultural activities it carries out there have not only provided continuous regular maintenance of the property but also ensured its accessibility and public use. This has initiated a process of valorization, creating a vibrant place where significant cultural activities of general interest are carried out. It can be defined as a "cultural asset" not only for its architectural value but also for

the richness of the activities it hosts, implementing actions and strategies to prevent abandonment and loss of its value (SPPP, 2018, p. 3).

In 2012, the Ministry for Cultural Heritage and Activities (Regional Directorate for Cultural and Landscape Heritage of Lombardy), the State Property Agency (Lombardy Branch), and the Municipality of Bergamo signed an Enhancement Agreement (pursuant to art. 112, paragraph 4 of Legislative Decree 22 January 2004, no. 42 and subsequent amendments) for Bergamo - "Compendium of the Former Monastero del Carmine and Former Sant'Agata Prison,"⁴ aimed at defining common strategies and objectives for the protection and enhancement of the Carmine/Sant'Agata compendium.

In 2015, the Municipality published a call for the selection of suitable candidates for the enhancement and management of the aforementioned real estate complex. The public procedure did not yield any suitable proposals, despite the TTB already being present at the Monastero del Carmine.

Therefore, the Municipality decided to pursue a different path, shared with all parties involved, by separating the destinies of the two complexes: the former Sant'Agata prison and the former Monastero del Carmine. This was done to create a mix of functions capable of promoting a high-quality project, primarily focused on public/cultural uses and ensuring greater economic sustainability for the entire operation in 2017.

Special Public-Private Partnership

To support this regeneration process, the Municipality of Bergamo promoted the signing of a Memorandum of Understanding aimed at defining the forms of collaboration for the enhancement of the Carmine complex. In it, the importance of the Monastero del Carmine as a place for artistic sharing, for research, training, theatrical production and for the development of various projects and initiatives (seminars, meetings, residency, performances and open rehearsals with national and international groups) is reaffirmed.

In 2016, a national law was passed (Legislative Decree No. 50/2016), which in Article 151, paragraph 3 provided the possibility for the Mibact (Ministry of Cultural Heritage and Activities and Tourism) and local authorities to activate "special forms of partnership with public bodies and entities and with private entities, aimed at enabling the recovery, restoration, programmed maintenance, management, opening to public enjoyment and enhancement of immovable cultural assets, through simplified procedures for identifying the private partner." This article, which is relevant to this regeneration experience, establishes new forms of public-private partnership-named Special Public Private Partnership (SPPP) - that, with greater operational flexibility, aim to enhance the cultural heritage spread across the country.

In 2018, after the discovery of this administrative innovation, the Teatro Tascabile and the Municipality of Bergamo, with the advice of Fondazione Fitzcarraldo, decided to adopt the PSPP for the first time in Italy, putting in place a new model of relationship between public entities, cultural bodies and private entities for the recovery and management of historic properties through specific activities. With the approval of the Special Public-Private Partnership the TTB was given the opportunity to use the Carmine complex for 20 years, renewable for an equal period (SPPP, 2018, p. 33).

⁴ Monastery and Carmine are part of the same historic block. St. Agatha's Prison originated from walls dating back to 908. It was then used as a prison in 1802. The church was divided internally to house the women's wing and offices. The prison function was maintained until 1978. Located in the northwestern part of Bergamo's Upper City, the Former Prison of Sant'Agata consists of three bodies of different widths arranged in a C-shape around the courtyard. It turns out to be articulated in several levels, on which large common spaces or very small, intimate and private rooms are distributed.

The governing, co-designing, and safeguarding body of the Partnership is the Technical Table in which a contact person from the Teatro Tascabile, a contact person from the city administration (manager of Heritage), and a contact person from MIBACT (delegate of the Superintendent of Fine Arts) participate. These are joined by experts and collaborators in relation to the topics of discussion. More generally, the technical table is the forum where choices and direct and indirect results arising from collaboration and opportunities generated in cultural heritage enhancement processes are evaluated.

Although TTB can operate administratively as a private entity, it was decided to adopt an approach comparable to that of a public administration (for example, in the selection of companies involved in construction work).

In June 2019, the firm Artedil spa was selected, and in September 2019 on the occasion of the European Heritage Days promoted in collaboration with the City Administration of Bergamo, the TTB inaugurated the works on the first and second lots (theater hall and chapter hall) and presented the plan for the realization of the third lot, which includes the creation of an "artist guesthouse" also open for hosting tourists.

The overall program (SPPP, 2018, p. 44) envisions the rehabilitation of the Monastero del Carmine in 4 phases linked to as many cultural actions: (i) Renzo Vescovi Theater; (ii) Chapter Hall; (iii) Atelier (artist guesthouse); (iv) Cloister.

The Renzo Vescovi Theater, dedicated to the founder who died in 2005, is the former refectory of the Carmelites: a large room with a rectangular floor plan, on the walls of which, painted in fresco, are twelve roundels depicting the Blessed Virgin of Carmel with Child and the most significant figures of the Carmelite Order. Since 1996 the refectory has been used by TTB for rehearsals, performances and hospitality.

The Foyer-Library, originally the kitchen serving the Monastery refectory, has been used as a space for actors' dressing rooms since 1996. In today's overall reorganization of the space, it has been transformed into the foyer-library: on the one hand the place where spectators wait before entering the auditorium for the performance, and on the other hand, on a special mezzanine, the place for consulting texts belonging to the Eurasian Theatre Library. In fact, all theater-laboratories, like the Teatro Tascabile, build a library fund within their premises, which for TTB is represented by the Eurasian Theatre Library. The Library is now owned by the University and is included in the National Library Service⁵.

Materials and Methods

From a methodological point of view, the work is based (i) on an extensive literature review, (ii) on official reports, documents, and national and international press review of project and history of Monastero del Carmine, (iii) on the analysis of the legislative instrument of Special Public-Private Partnership, (iv) on interviews with significant stakeholders.

The first part of the research included the study and analysis of the case from a historical, social and cultural point of view through bibliographic research, consultation of the press review and administrative documents prepared over the years and the numerous experiences involving the monastery. The process of tangible and intangible regeneration was also examined through the projects presented when the SPPP was approved.

⁵ The BTE was born from an initial nucleus of volumes that belonged to the leader and founder of the Pocket Theater Renzo Vescovi, to which was added in 2019 the Nicola Savarese fund, a great scholar of performing arts, and in particular of the relationship between Eastern and Western theater. It is currently possible to consult its approximately 4,000 volumes in a mezzanine area of the foyer on which 6 reading stations are set up, suitable for Italian and foreign students and scholars. It is a growing project: in fact, two more important funds are planned to be acquired: the personal library of Eugenio Barba, director of Odin Teatret (DK), and that of Ferdinando Taviani, perhaps the most important theater scholar of his generation.

After taking a detailed picture of the situation, we focused on mapping the stakeholders involved in the regeneration process to conduct semi-structured interviews with them.

Series of semi-structured interviews were conducted with the stakeholders. They were representatives of the institutions and the main actors involved in the practices. The interviews lasted between 30 and 90 min, and focused on the main open themes: the origin of the project and the reason of their involvement, the project timeline, the role the interviewee play in the process of regeneration, the stakeholders with whom the interviewee cooperated, the management of the event, and the results on the territory and on community everyday life.

In order to focus the analysis on the governing instrument of the process - the SPPP - the interview was structured by asking the interviewees what their role was within the life of the Monastero del Carmine before the drafting of the SPPP, during and in the period immediately following and after the first five years of the instrument's implementation.

Also of key importance was the phase of site visits to learn about the Monastery, its spaces and uses.

The stakeholders interviewed were identified by recognizing the responsibilities and expertise they brought to the SPPP project and therefore can be divided based on the role they played in the process. Seven people were interviewed who were crucial to the success of the project and represented the different thematic and technical components.

First of all, TTB members were identified who have been using the Monastery since 1996 and expressed the need to transform it into a welcoming place capable of meeting the needs of a cultural association and supporting the processes of expanding their offerings. In this regard, Alessandro Rigoletti, a TTB member, was interviewed.

As anticipated earlier, from the need to find an agreement between the ownership of the building, the Municipality of Bergamo, and the beneficiaries of it, the TTB, a fruitful relationship of discussion and advice was born with the Municipality Manager Erminia Renata Carbone; with the lawyer Franco Milella, an expert in common goods and consultant to the Fitzcarraldo Foundation, and the TTB.

The foresight and vision of these stakeholders made it possible to find in the special public-private partnership a valuable tool to enable an equal relationship between the owners and usufructuaries of the building that would give the possibility of finding useful funding for a regeneration project. architect Gloria Gusmaroli, who has been working at TTB since 2020 and is in charge of promoting the project and its technical implementation, was then interviewed.

A key role in the development of the project is given by the involvement of the community, not only from an intangible point of view, but also through the possibility of offering economic funding. This is because the design of TTB confronts the issue of the relationship between entrepreneurship and cultural associations. The Special Public-Private Partnership is the means by which to promote the sharing of choices and the simplification of procedures according to a different vision in the management of public assets and resource raising. To sustain the project vision, the municipal administration had to involve its relational capital by activating private entities toward the economic support of planned activities.

The resources on which the project rests come from different forms and sources of funding (fundraising mix). Among the most important are the Art Bonus (in 2014 a tax credit was introduced for liberal cash disbursements in support of culture and entertainment as a support of patronage in favor of cultural heritage) with which TTB activated two funding lines, one related to building interventions and one to cultural activities⁶.

⁶ The narrative of the first fundraising campaign with Art Bonus, along with the digital and on-site giving back, received the "Special 1st Place Award for Social Campaign" in the "Art Bonus 2021 Competition"

Since 2020 there is an increasingly strong link between the promotional communication strategy and the expected results about the involvement of funders and the economic return of the action taken, generating a sense of place that becomes the glue for a lasting relationship between TTB, economic operators and local associations. Representatives of the latter were considered in the interviews.

Discussion

The analysis conducted on the various sources presented in the previous section, allowed some key themes to emerge regarding: (i) The nature of the instrument adopted (SPPP); (ii) The role given to the temporal dimension; (iii) The characteristics of the place and its architecture; and (iv) The learning/empowerment process by the actors involved.

The first core of reflections includes the type of innovative instrument adopted by the various actors (TTB, Bergamo City Council and Superintendence) to promote the process of recovery and re-functionalization of the spaces of the Monastero del Carmine.

The SPPP turns out to be a flexible tool, which in the concept of "Special" introduced by the national legislation, hides a strong vagueness that should not necessarily be considered as a negative condition. This "ambiguous" nature of it, as claimed by some interviewees, allows its application to different types of objective contexts/conditions that differ in:

- 1) the architecture of the places of possible application, as the absence of explicit identification by national standards, allows for the possibility of regenerating both spaces with historical value and buildings of more recent construction; the only condition to be met the condition of public property;
- 2) the "community" of subjects called upon to manage the public good and ensure the maintenance physical structures and at the same time the provision of functions of public and collective interest;
- 3) The type of activities and functions delivered by the subjects entrusted in the management that may cover different aspects of collective interest are going to decline in a timely manner the broad concept of "culture".

The SPPP tool in the experience of Bergamo and the Monastery del Carmine has been configured as a "stage" capable of stimulating dialogue between subjects very different from each other in terms of objectives, technical-organizational skills and responsibilities towards the regeneration process activated. This open, equal, symmetrical dialogue between a public subject (Municipality of Bergamo) and an associative reality with a strong identity and history (The TTB), took on a role of exchange and mutual learning. The diversity of the actors involved in the path was gradually accepted, until it became an opportunity for strengthening in the program of objectives and interventions.

The one presented was the first case in Italy of application of the Special Public Private-Partnership, which, for the first time, was able to create a space for reflection and sharing of ideas and planning of a shared project. The drafting of the project document allowed for the sharing of objectives and proposals, as well as the confrontation and discussion of critical and controversial issues (e.g., the management of financial aspects or the need to submit to very binding protection regulations). The SPPP has empowered a private actor to care for a public good of general interest for the entire community, legitimizing an alliance and, most importantly, increasing the credibility of a private entity of a cultural nature vis-à-vis public and funding institutions. This also succeeded in giving value to the entire regeneration process in order to receive funding and expand collaborations with other public and private actors. The instrument therefore, in its flexibility, granted more opportunities, compared to other more traditional instruments, to adapt commitments and projects.

The second aspect repeatedly considered by the interviewees and official documents, which assumed, and was debated at length when the SPPP was drafted, is the temporal aspect. Before

the SPPP, the municipality granted the Monastery space to the TTB with short-term concessions. This condition reduced the ability to plan a program of tangible (e.g., rehabilitation of some spaces) and intangible interventions. The provision of a longer management time makes it possible to think about long-term planning and imagine other related activities.

Adopting a time frame of 20 years, as a result of mediation between TTB, the consultants and the municipality, has made it possible to be able to plan complex actions and at the same time to activate other relevant initiatives: the raising of funding, to participation in calls for funding bodies, to investment on people and so on.

Time is associated, particularly when dealing with cultural associations and public funding, with the theme of uncertainty.

This story of regeneration cannot be separated from the place where it took place. The historical, cultural, and architectural richness of the Monastery allowed for this process, which took advantage of the beauty of this place and changed with the story of the Teatro Tascabile. The typical architectural structure of a Monastery has been adapted to the needs of TTB's theatrical and cultural activities. The constraints of a historic building, in addition to the difficulties, have also offered the possibility, for example by activating specific projects, to experiment with new forms of inhabiting the historic space, generating a vital osmosis between the community that manages it and the functions provided, between the monastery complex and TTB.

Conclusions

The subject of abandoned public heritage is of considerable relevance and great impact in the urban dynamics of Italian cities. On the one hand there are the problems arising from its abandonment and the costs involved in its regeneration; on the other hand having public buildings of inestimable historical and architectural value represents an opportunity for local communities.

The regeneration of public heritage can take place through its disposal, its renovation for other public activities or through a partnership with a private entity that commits itself to its management.

The experience of the Monastero del Carmine in Bergamo was the first Italian case in which the Special Public Private Partnership was adopted, i.e. the municipality and a private association become partners in the management of the property by developing an agreement.

Prior to the introduction of the SPPP in Italy, legislation favoured the use of public assets by incentivising economic and capital profitability and not by increasing cultural and social valorisation. This approach characterised the Italian legislation of the 30 years prior to 2016 and was sometimes unsuccessful. The SPPP changes the idea that a public asset must necessarily be made profitable and invests in co-responsibility between the public and private sectors, fostering a process of contamination and mutual improvement that implies the desire and the need to go beyond one's own competences and to constantly learn new disciplinary and other skills.

For the Teatro tascabile di Bergamo, a private organisation involved in the management of the Monastero del Carmine, doing theatrical work means not only staging performances and activities related to theatrical culture, but also implies engaging in cultural and building development through the care of a place and, together with it, of the community to which it belongs. Thanks to the SPPP, the Monastero del Carmine has taken on a central role in Bergamo's urban context, becoming a point of reference not only for the municipal administration, but for the entire community in terms of cultural and social initiatives.
