

# ODS 2019

**International Conference on  
Optimization and Decision Science**  
XLIX Annual Meeting of AIRO - Italian Operations Research Society

**AIRO**

ASSOCIAZIONE ITALIANA DI RICERCA OPERATIVA

**Genova, 4-7 September, 2019**  
**Department of Economics and Business Studies**  
**Via Vivaldi, 5 (Darsena)**

## Book of Abstracts

# Preface

Operations Research (OR) is known as the discipline of optimization applied to real-world problems and to complex decision making fields. The focus is on mathematical and quantitative methods aimed at determining optimal or near-optimal solutions. OR has a wide range of applications proving the inter-disciplinarity of its solving approaches, methodologies and tools. Referring to the present book, we find both applications and theoretical results in the following different fields and areas: Smart Port Terminal Operations; Data Exploitation: Methods and Applications; Financial Modeling; Optimization in Public Transport; Optimization in Machine Learning; Support to Industry 4.0 and Smart Manufacturing; Health Care Management and Planning; Data Analytics and Optimization; Technology Transfer: From Data to Actionable Knowledge; Scheduling; Equilibrium Problems, Variational Models, and Applications; Mixed Integer Programming; OR Teaching; Transportation Networks Performance and Reliability; Nonlinear Optimization and Applications; VRP and Related Problems; Stochastic Programming: Optimization Under Uncertainty and Applications; Drone Applications; Optimization in Eco-Sustainable Transportation; Rail Port Operations; New Last-Mile Transportation Paradigms Under Clever Resource Usage and Prominent Technologies; Combinatorial Optimization; OR Applications in Routing; Inventory; Graphs; Travelling Salesman and Arc Routing Problems; Optimization in Telecommunication Networks and Queueing Systems; Optimization for Sustainable Energy Systems; Logistics; Game Theory.

ODS2019, International Conference on Optimization and Decision Science, is the XLIX annual meeting organized by the Italian Operations Research Society (AIRO) in Genova, Italy, September 4th – 7th, 2019, in cooperation with the Department of Economics and Business Studies (DIEC) and the Department of Informatics, Bioengineering, Robotics, and Systems Engineering (DIBRIS) of the University of Genova. The conference is held at **DIEC**, Via F. Vivaldi, 5 – Darsena – 16126 Genova, Italy. ODS2019 has attracted academics and practitioners from private and public companies and industries thus highlighting the strict relationship between OR and its applications. The Conference participants are more than 200 researchers from 26 different countries, representing Europe, North and South America, and Asia, witnessing the international character of the conference.

The book contains the abstracts of the scientific contributions accepted for presentation. The order of the abstracts in the book corresponds to the order of presentation in the conference programme. The short papers corresponding to the abstracts marked with a star in the title have been accepted for the publication in the ODS2019 Special Volume of the AIRO Springer Series "Advances in Optimization and Decision Science for Society, Services and Enterprises". All the contributions were accepted for presentation at the conference after a peer-review process by experts in OR and related fields belonging to the Program Committee. Despite the fact that this book is a list of abstracts and does not contain the core results of the single researches, it provides a realistic and current picture of the state-of-the-art of modern research in the field of OR.

This book has been edited by the Organizing Committee of the conference.

# Committees

*Conference Chair: Anna Sciomachen*

<b>Organizing Committee</b>	
<b>Daniela Ambrosino</b>	University of Genova
<b>Massimo Paolucci</b>	University of Genova
<b>Marcello Sanguineti</b>	University of Genova
<b>Elena Tànfani</b>	University of Genova
<b>Pierpaolo Uberti</b>	University of Genova

<b>Program Committee</b>	
<b>Alessandro Agnetis</b>	University of Siena
<b>Daniela Ambrosino</b>	University of Genova
<b>Claudia Archetti</b>	University of Brescia
<b>Raffaele Cerulli</b>	University of Salerno
<b>Patrizia Daniele</b>	University of Catania
<b>Ignacio Garcia-Jurado</b>	University of A Coruña, Spain
<b>Yuval Hadas</b>	Bar-Ilan University, Israel
<b>Stefano Lucidi</b>	University of Roma – "La Sapienza"
<b>Inês Marques</b>	University of Lisbon, Portugal
<b>Massimo Paolucci</b>	University of Genova
<b>Guido Perboli</b>	Polytechnic of Torino
<b>Lucia Pusillo</b>	University of Genova
<b>Marcello Sanguineti</b>	University of Genova
<b>Anna Sciomachen (Chair)</b>	University of Genova
<b>Maria Grazia Scutellà</b>	University of Pisa
<b>Johan Suykens</b>	KU Leuven, Belgium
<b>Elena Tànfani</b>	University of Genova
<b>Pierpaolo Uberti</b>	University of Genova

# Programme at Glance

Wednesday - September 4<sup>th</sup>, 2019

11:00-13:30	<b>Registration</b>			
Room	<b>Embriaco</b>			
13:45-14:30	<b>Opening Session</b>			
Room	<b>Embriaco</b>	<b>Caffaro</b>	<b>Doria</b>	<b>Boccanegra</b>
14:30-16:30	W1 Smart Port Terminal Operations - 1	W2 Data Exploitation: Methods and Applications	W3 Financial Modeling	W4 Optimization in Public Transport (AIRO-OPTSM Chapter)
16:30-17:00	<b>Coffee break</b>			
Room	<b>Embriaco</b>			
17:00-18:00	<b>Plenary Lecture - Paolo Signorini</b>			
18:00-18:30	<b>Walking transfer to Palazzo San Giorgio</b>			
	<b>Palazzo San Giorgio - Sala dei Capitani</b>			
18:30-20:00	<b>Round Table</b> <b>Resilience and Management of Emergencies in Logistic Networks</b>			
	<b>Palazzo San Giorgio - Portico</b>			
20:00-22:00	<b>Welcome Cocktail</b>			

# Thursday - September 5<sup>th</sup>, 2019

Room	Embriaco	Caffaro	Doria	Boccanegra	Fieschi
8:30-10:30	T1 Optimization in Machine Learning - 1	T2 OR Support to Industry 4.0 and Smart Manufacturing - 1	T3 Health Care Management and Planning - 1	T4 Data Analytics and Optimization	Software Demo
10:30-11:00	Coffee break				
Room	Embriaco	Caffaro	Doria	Boccanegra	Fieschi
11:00-13:00	T5 Optimization in Machine Learning - 2	T6 OR Support to Industry 4.0 and Smart Manufacturing - 2	T7 Health Care Management and Planning - 2	T8 WORKSHOP OR Towards Technology Transfer: From Data to Actionable Knowledge	Software Demo
13:00-14:00	Lunch				
Room	Embriaco				
14:00-15:00	Plenary Lecture - Nello Cristianini				
Room	Embriaco	Caffaro	Doria	Boccanegra	Fieschi
15:00-16:30	T9 (AIRO)Young Reserchers in Machine Learning and Operations Research	T10 Scheduling	T11 Equilibrium Problems, Variational Models, and Applications - 1	T12 WORKSHOP OR Towards Technology Transfer: From Data to Actionable Knowledge	Software Demo
16:30-17:00	Coffee break				
Room	Embriaco	Caffaro	Doria	Boccanegra	Fieschi
17:00-18:30	T13 Mixed Integer Programming	T14 OR Applications - 1	T15 Equilibrium Problems, Variational Models, and Applications - 2	T16 (AIRO)Young Tutorial Session: Young OR Specialists in the Industry - Experiences, Tips, and Panel Discussion	Roundtable: Comparing the Contents of the OR Courses in Italian Universities
19:30-23:00	Social Event: ODS Sport - Beach Volley Tournament				

# Friday - September 6<sup>th</sup>, 2019

Room	Embriaco	Caffaro	Doria	Boccanegra
8:30-10:30	F1 Smart Port Terminal Operations - 2	F2 Transportation Networks Performance and Reliability	F3 Nonlinear Optimization and Applications - 1	F4 VRP and Related Problems
10:30-11:00	Coffee break			
Room	Embriaco	Caffaro	Doria	Boccanegra
11:00 -13:00	F5 Sochastic Programming: Optimization Under Uncertainty and Applications	F6 OR for Drone Applications	F7 Nonlinear Optimization and Applications - 2	F8 Optimization in Eco-Sustainable Transportation
13:00-14:00	Lunch			
Room	Embriaco			
14:00-15:00	Plenary Lecture: Bruce Golden			
Room	Embriaco	Caffaro	Doria	Boccanegra
15:00-16:30	F9 Rail Port Operations	F10 New Last-mile Transportation Paradigms Under Clever Resource Usage and Prominent Technologies	F11 Combinatorial Optimization	F12 OR Applications in Routing
16:30-17:00	Coffee break			
17:00-18:30	AIRO Meeting			
From 18:00	Visit to Genova Cathedral (two rounds) Social Dinner at "Chiostro di San Lorenzo"			

# Saturday - September 7<sup>th</sup>, 2019

Room	Embriaco	Caffaro	Doria	Boccanegra
8:30-10:30	S1 OR Applications - 2	S2 Inventory	S3 Graphs	S4 Travelling Salesman and Arc Routing Problems
10:30-11:00	<b>Coffee break</b>			
11:00-12:30	S5 Optimization in Telecommunication Networks and Queueing Systems	S6 Optimization for Sustainable Energy Systems	S7 Logistics	S8 Game Theory
12:30-13:00	<b>Closing Session</b>			
15:00-19:00	<b>Social Event: Boat Trip to Paradiso and Tigullio Gulfs</b>			

# Contents

<b>Preface</b>	<b>2</b>
<b>Committees</b>	<b>4</b>
<b>Programme at Glance</b>	<b>8</b>
Wednesday - September 4 <sup>th</sup> , 2019 . . . . .	8
Thursday - September 5 <sup>th</sup> , 2019 . . . . .	9
Friday - September 6 <sup>th</sup> , 2019 . . . . .	10
Saturday - September 7 <sup>th</sup> , 2019 . . . . .	11
<b>Plenary Lecture 1: The Role of Port Authorities in the Management of Complex Maritime Clusters: The Ports of Genoa Case Study</b>	<b>20</b>
<b>Plenary Lecture 2: Things to Keep in Mind when Designing Intelligent Agents</b>	<b>20</b>
<b>Plenary Lecture 3: The Power of Linear Programming: Some Surprising and Unexpected LPs</b>	<b>20</b>
<b>W1: Smart Port Terminal Operations - 1</b>	<b>22</b>
New ILP Formulation for the Multi-Day Container Drayage Problem . . . . .	22
A Receding Horizon Approach for Berth Allocation Based on Random Search Optimization . . . . .	23
Integrating Ship Movement Scheduling and Tug Assignment within a Canal Harbor .	25
Optimization Requirements in Intermodal Transportation: Business Cases Emerging from the Market . . . . .	27
Three Approaches for a Multiperiod Drayage Problem . . . . .	28
<b>W2: Data Exploitation: Methods and Applications</b>	<b>30</b>
The Maximum Nearby Flow Problem . . . . .	30
Extending the Potential-Based Measure of Efficiency to Multiperiod Data . . . . .	32
A New Methodological Perspective for Classification Model Selection . . . . .	33
A Data Analytics Approach for 4D Trajectories in ATFM . . . . .	34
Learning Context for Multi Armed Bandits . . . . .	35
<b>W3: Financial Modeling</b>	<b>36</b>
Risk Parity with Expectiles . . . . .	36
The Optimal Number of Allowances in an ETS: A Bilevel Stochastic Programming Approach . . . . .	37
Linear Models for Portfolio Selection with Real Features . . . . .	38
Portfolio Leverage in Asset Allocation Problems . . . . .	40
Superiority Conditions for the 1/N Investment Strategy: A Theoretical Approach . .	41

<b>W4: Optimization in Public Transport (AIRO-OPTSM chapter)</b>	<b>42</b>
Robust Capacitated Train Rescheduling with Passenger Reassignment Under Stochastic Disruptions . . . . .	42
Effective Pruning Strategies for Heuristic and Exact Train Scheduling Algorithms . .	43
Energy-Efficient Train Control . . . . .	44
Comparing Yield Management Models Performances Through Live Testing at Trenitalia	45
Light Robustness in Train Stop Planning and Timetabling with Uncertain Demand .	46
<b>T1: Optimization in Machine Learning</b>	<b>48</b>
Adaptive Random Projections for Efficient Second/First/Zeroth-Order Optimization .	48
Support Vector Machine Based Bayesian Optimization Under Unknown Constraints .	49
On the Optimal Trade-Off Between Sample Size and Precision of Supervision . . . . .	50
Gradient Boosting with Extreme Learning Machines for the Optimization of Non Linear Functionals . . . . .	51
Enhancing the Performance of Randomized Decision Trees . . . . .	53
<b>T2: OR Support to Industry 4.0 and Smart Manufacturing – 1</b>	<b>54</b>
Industry 4.0: The New Scenario and Challenges for Cyber Physical Manufacturing Systems Decisional Processes . . . . .	54
Industrial Clusters Optimization . . . . .	55
Decision Support System for Augmented Maintenance in a Cyber Physical Production System . . . . .	56
Smart Thermal Calibration – Machine Learning in ABB Circuit Breaker Manufacturing	57
Machine Learning Application in Optimization: Job-Shop Scheduling in Industry 4.0	58
<b>T3: Health Care Management and Planning - 1</b>	<b>60</b>
Nurse-to-Patient Assignment in Home Care Services with Uncertain and Temporally Correlated Patient Demand . . . . .	60
The Price of Flexibility in Surgery Pre-Admission Appointment Scheduling . . . . .	61
A MILP Model for Biological Sample Transportation in Health Care . . . . .	62
OPT3COR: Citizen Centered Integrated Digital Services for Optimized Access Management to Medical Support Services for Maternity Care . . . . .	63
Master Oncologists Planning in a Cancer Outpatient Center . . . . .	64
<b>T4: Data Analytics and Optimization</b>	<b>66</b>
Efficient Kernel-Based Subsequence Search in Data Streams . . . . .	66
Constrained Named Entity Recognition . . . . .	67
Active Scenario-Generation for Stochastic Programming . . . . .	68
Constrained Deep Attributed Graph Embedding Model . . . . .	69
Deep Learning Models for Predicting Extreme Stock Movements Integrating News Sentiment . . . . .	70
<b>T5: Optimization in Machine Learning - 2</b>	<b>72</b>
Infinite Kernel Extreme Learning Machine . . . . .	72
Least Action Principles and Well-Posed Learning Problems . . . . .	74
Probabilistic Tools for Optimization of Classifiers on Large Data Sets . . . . .	75
Optimization Problems in Machine Learning . . . . .	76
A Multi-Objective Reinforcement Learning Based Hyper-Heuristic . . . . .	77

<b>T6: OR Support to Industry 4.0 and Smart Manufacturing – 2 (Contributions from AD-COM Project)</b>	<b>78</b>
Single Machine on-Time-in-Full Scheduling . . . . .	78
Heuristic Data-Driven Feasibility on Integrated Planning and Scheduling . . . . .	79
Evaluating Automated Storage and Retrieval System Policies with Simulation and Optimization . . . . .	80
Rolling-Horizon Heuristics for Capacitated Stochastic Inventory Problems with Forecast Updates . . . . .	81
Paths and Matchings in an Automated Warehouse . . . . .	83
<b>T7: Health Care Management and Planning - 2</b>	<b>84</b>
A Simulation Approach to Support Internal Medicine Wards Reorganization . . . . .	84
Priority-Based Scheduling of Operating Rooms Using Artificial Intelligence . . . . .	85
A Simulation-Optimization Approach to Reduce Overcrowding in an Hospital Emergency Department Through the Improvement of Low-Complexity Patient Flow . . . . .	86
A Flexible Generalized Simulation Model to Describe Hospital Departments and Care Systems . . . . .	87
Coordinating the Emergency Response of Ambulances to Multiple Mass Casualty Incidents using an Optimization-based Approach . . . . .	88
<b>T8: Workshop - OR Towards Technology Transfer: From Data to Actionable Knowledge</b>	<b>90</b>
Mathematics for Optimization . . . . .	90
Stochastic Optimization Model and ML Methods for Merchandising Planning . . . . .	90
Optimization Based Approaches to Digital Marketing and Utilities . . . . .	90
Some Lessons Learnt in Building Product-Oriented OR Startup . . . . .	90
<b>T9: (AIRO)Young Reserchers in Machine Learning and OR</b>	<b>92</b>
Traveling Salesman Problem and Machine Learning . . . . .	92
A New Polarization Measure for Decision Tree Models . . . . .	93
A New Ensemble Tree Model Based on Bayesian Bootstrap . . . . .	94
A Computational Comparison of New Techniques for Reoptimizing Shortest Paths . . . . .	95
<b>T10: Scheduling</b>	<b>96</b>
GPU Scheduling for Deep Learning . . . . .	96
Price-and-Branch for Minimizing Total Completion Time on Parallel Batching Machines . . . . .	97
Scheduling Orders for a Last-Mile Meal Delivery Food Company . . . . .	98
A Bi-Objective Heuristic for Green Identical Parallel Machine Scheduling . . . . .	99
<b>T11: Equilibrium Problems, Variational Models, and Applications - 1</b>	<b>100</b>
Quasi-Variational Equilibrium Models for Network Flow Problems . . . . .	100
A Game Theory Model of Online Content Competition . . . . .	101
General Oligopolistic Market Equilibrium Problem via Tensor Variational Inequalities: Existence and Regularity Results . . . . .	103
A Variational Formulation for a Human Migration Problem . . . . .	104
<b>T12: Workshop - OR Towards Technology Transfer: From Data to Actionable Knowledge</b>	<b>106</b>
Integrated Approaches to OR Practice, Aiming for Effective Decision Support . . . . .	106
The Impact of Machine Learning on OR Practice: The ACTOR's Experience . . . . .	106
Optrail: Pioneering Optimization in the Railway Industry . . . . .	106

Towards Autonomous Flexible Picking: Recent Advancements and Challenges . . . .	106
<b>T13: Mixed Integer Programming</b>	<b>108</b>
Flying Safely by Bilevel Programming . . . . .	108
Computational Evaluation of Data Driven Local Search for MIP Decompositions . . .	110
Chance Constraint Problem with Integer Scenario Variables . . . . .	111
Intersection Cuts for Quadratic Mixed-Integer Optimization . . . . .	112
<b>T14: OR Applications - 1</b>	<b>114</b>
An Integer Programming Formulation for University Course Timetabling . . . . .	114
On the Sizing of Security Personnel Staff While Accounting for Over time Pay . . . .	116
Dynamic Tabu Search for Enhancing the Productivity of a Bottle Production Line . .	118
Swap Minimization in Nearest Neighbour Quantum Circuits: an ILP Formulation . .	120
<b>T15: Equilibrium Problems, Variational Models, and Applications - 2</b>	<b>122</b>
A Traffic Equilibrium Nonlinear Programming Model for Optimizing Road Maintenance Investments . . . . .	122
On Dynamical Systems to Solve the GNEP . . . . .	124
Opinion Dynamics in Multi-Agent Systems Under Proportional Updating and Any-to-Any Influence . . . . .	125
A Constructive Method for Solving Optimal Control Models Governed by Parabolic Equations . . . . .	127
<b>T16: (AIRO)Young Tutorial Session: Young OR Specialists in the Industry - Experiences, Tips, and Panel Discussion</b>	<b>128</b>
<b>T17: Workshop - Comparing the Contents of the OR Courses in Italian Universities</b>	<b>130</b>
Activation of a Huge Class: Mission Impossible? . . . . .	130
Teaching Operations Research Before University . . . . .	130
Soft Skills and Problem Solving More and More Required: OR in New Academic Programs . . . . .	130
OR Teaching Before University: Educational Experiences in the Technical Institutes, Logistics & Transport Curriculum. Reflections and New Perspectives . . . . .	130
<b>F1: Smart Port Terminal Operations - 2</b>	<b>132</b>
Maritime Container Terminals can Support Investments for Increasing the Rail Transport Modality? . . . . .	132
A Heuristic Approach to Solve the Interval Immune Transportation Problem . . . . .	133
Displacing Containers from Mega-Ships to Dry Ports with Limited Buffer and Network Capacity . . . . .	134
A New Formulation of the Single Door Truck Scheduling Problem . . . . .	135

### Nurse-to-Patient Assignment in Home Care Services with Uncertain and Temporally Correlated Patient Demand

Giuliana Carello<sup>1</sup>, Ettore Lanzarone<sup>2</sup>, Mara Servilio<sup>3</sup>

<sup>3</sup> Cyber Dyne s.r.l, [mservilio@gmail.com](mailto:mservilio@gmail.com)

**Abstract:** Assisting patients at home, rather than in hospital, offers many advantages, from the decrease in hospitalization costs to the improvement in the quality of life of patients. Home care services will, therefore, become more and more common in the next future, especially for dealing with the elderly population, who, most of all, benefits from home care treatment. However, home care services are expensive and must be carefully managed in order to make them efficient. A key problem in planning home care services is the assignment of patients to nurses. It is a medium term decision which heavily affects the workload of nurses for a long time horizon. However, when assigning patients to nurses, their demand, namely the number of weekly visits, is not fully known. Indeed, it depends on the patients' conditions, and they may change along time. We consider the problem of assigning patients to nurses over a planning horizon of several weeks. Patients may require different kinds of continuity of care: they may require to be cared after by only one nurse, or they may accept to be assigned to different nurses in different weeks, but this should be discouraged, or they may be cared after by different nurses even in the same week. To deal with the uncertain temporal evolution of the patients' demands a robust solution is generated through an implementor-adversarial-like approach. Two levels of flexibility are considered and compared: in the less flexible case the assignment of patients with no continuity requirement is independent from the demand realization, while in the more flexible one it is re-optimized based on the current patients' conditions.

**Keywords:** Home Care, Nurse-to-Patient Assignments, Time Related Uncertain Demand
