Special issue on Financial Optimization: optimization paradigms and financial planning under uncertainty

ISSN: 0171-6468 (Print) 1436-6304 (Online)

In this issue (11 articles)

1. Editorial

   Financial Optimization: optimization paradigms and financial planning under uncertainty

   Giorgio Consigli, *Paolo Brandimarte*, *Daniel Kuhn* Pages 553-557

2. Regular Article

   Structure of risk-averse multistage stochastic programs

   Jitka Dupačová, *Václav Kozmík* Pages 559-582

3. Regular Article

   A combined stochastic programming and optimal control approach to personal finance and pensions

   Agnieszka Karolina Konicz, *David Pisinger*, *Kourosh Marjani Rasmussen*... Pages 583-616

4. Regular Article

   Portfolio optimization in a defaultable Lévy-driven market model

   Stefano Pagliarani, *Tiziano Vargiolu* Pages 617-654

5. Regular Article

   Jump-diffusion asset–liability management via risk-sensitive control

   Mark H. A. Davis, *Sébastien Lleo* Pages 655-675

6. Regular Article

   Robust worst-case optimal investment

   Sascha Desmettre, *Ralf Korn*, *Peter Ruckdeschel*, *Frank Thomas Seifried* Pages 677-701

7. Regular Article

   A general test for SSD portfolio efficiency

   Miloš Kopa, *Thierry Post* Pages 703-734

8. Regular Article

   A linear risk-return model for enhanced indexation in portfolio optimization

   Renato Bruni, *Francesco Cesarone*, *Andrea Scozzari*, *Fabio Tardella* Pages 735-759

9. Regular Article

   Data-driven portfolio management with quantile constraints

   Elçin Çetinkaya, *Aurélie Thiele* Pages 761-786

10. Regular Article

    Choquet-based European option pricing with stochastic (and fixed) strikes

Tarik Driouchi, *Lenos Trigeorgis*, *Yongling Gao* Pages 787-802

11. Regular Article

Approximating multivariate Markov chains for bootstrapping through contiguous partitions

Roy Cerqueti, *Paolo Falbo*, *Gianfranco Guastaroba*, *Cristian Pelizzari* Pages 803-841
