The 31st Annual ACM Symposium on Applied Computing

Pisa, Italy
April 4-8, 2016

CONFERENCE CHAIR
Sascha Ossowski, University Rey Juan Carlos, Spain

CONFERENCE VICE-CHAIRS
Giorgio Buttazzo, Scuola Superiore Sant'Anna, Italy
Alessio Bechini, University of Pisa, Italy

PROGRAM CHAIRS
Jiman Hong, Soongsil University, South Korea
Maria Lencastre, University of Pernambuco, Brazil

POSTERS CHAIR
Chih-Cheng Hung, Kennesaw State University, United States

PUBLICATION CHAIR
John Kim, Utica College, United States

TUTORIALS CHAIR
Francesco Marcelloni, University of Pisa, Italy

STUDENT RESEARCH COMPETITION CHAIR
Hossain Shahriar, Kennesaw State University, United States

LOCAL ARRANGEMENT CHAIR
Ettore Ricciardi, ISTI-CNR, Italy

TREASURER, REGISTRAR, & WEBMASTER
Hisham M. Haddad, Kennesaw State University, United States
About the Sponsoring SIG

ACM SIGAPP

The ACM Special Interest Group on Applied Computing is ACM’s primary applications-oriented SIG. Its mission is to further the interests of the computing professionals engaged in the development of new computing applications and applications areas and the transfer of computing technology to new problem domains. SIGAPP offers practitioners and researchers the opportunity to share mutual interests in innovative application fields, technology transfer, experimental computing, strategic research, and the management of computing. SIGAPP also promotes widespread cooperation among business, government, and academic computing activities. Its annual Symposium on Applied Computing (SAC) provides an international forum for presentation of the results of strategic research and experimentation for this inter-disciplinary environment. SIGAPP membership fees are: $15.00 for ACM Non-members, $15.00 for ACM Professional Members, and $8.00 for ACM Student Members. For further information on SIGAPP, please contact Jiman Hong at jiman@ssu.ac.kr or visit the SIGAPP website at http://www.acm.org/sigapp.

Hosting Universities

SAC SRC Program Sponsor

Microsoft Research
On behalf of the Organizing Committee, we welcome you to the 31st Annual ACM Symposium on Applied Computing (SAC 2016), jointly hosted by University of Pisa and Scuola Superiore S. Anna, both in Pisa, Italy. For more than three decades this international forum has been dedicated to computer scientists, engineers, and practitioners for the purpose of presenting their research findings and results in various areas of applied computing. The organizing committee is grateful for your participation in this exciting international event. We hope that this conference proves interesting and beneficial for all of you. The Symposium on Applied Computing is sponsored by the ACM Special Interest Group on Applied Computing (SIGAPP), whose mission is to further the interests of computing professionals engaged in the design and development of new computing applications, interdisciplinary applications areas, and applied research. This conference is dedicated to the study of applied computing research of real-world problems. In addition, this event provides an avenue to discuss and exchange new ideas in the wide spectrum of applied computing areas. We all recognize the importance of updating the latest developments and research in our current areas of expertise.

SAC 2016 offers Technical Tracks and Poster Sessions. The success of the conference can be attributed to the substantial contribution of dedicated Track Chairs and Co-Chairs. Each track maintains a program committee and a set of highly qualified reviewers. We wish to thank the Track Chairs, Co-Chairs, Committee Members and participating reviewers for their hard work and effort to make SAC 2016 a high quality conference. We also thank our invited keynote speakers, Dr. John Mylopoulos (University of Toronto, Canada, and University of Trento, Italy) and Dr. Marco Conti (Institute of Informatics and Telematics, Italian National Council for Research, Pisa, Italy) for sharing their knowledge and expertise with SAC 2016 attendees. Most of all, we would like to especially thank the authors and presenters for sharing their experience with the rest of us, and all attendees for joining us in Pisa, Italy this year.

The local organizing committee has been a major contributor to the success of the SAC 2016 conference. Our gratitude goes to the Local Arrangement Chair Dr. Ettore Ricciardi, ISTI-CNR, Pisa, Italy. We extend our thanks to the Publication Chair, Dr. John Kim, Utica College, Utica, New York, USA, for his tremendous effort in putting together the conference proceedings, to the Posters Chair, Dr. Chih-Cheng Hung, Kennesaw University, Marietta, Georgia, USA, for his hard work to make a successful Poster Program, and to the Tutorials Chair Dr. Francesco Marcelloni, University of Pisa, Pisa, Italy, for arranging an exciting set of Tutorials. A big “thank you” also goes to Dr. Hossain Shahriar, Kennesaw University, Marietta, Georgia, USA, for organising the Student Research Competition, as well as to Dr. Hisham Haddad, Kennesaw University, Marietta, Georgia, USA, for simultaneously playing the roles of treasurer, registrar and webmaster (and many more). Special thanks to our Program Co-Chairs: Dr. Jiman Hong, Soongsil University, Seoul, Korea, and Dr. Maria Lencastre, University of Pernambuco, Recife, Pernambuco, Brazil for coordinating and bringing together an excellent Technical Program.

Again, we welcome you to SAC 2016 in the beautiful city of Pisa, Italy. We hope you enjoy the SAC 2016 conference and your stay in Italy. Next year, we invite you to participate in SAC 2017 to be held in Marrakech, Morocco. The conference will be hosted jointly by the University of Quebec at Montreal, Canada, University Cadi Ayyad of Marrakech, Morocco, the National School in Engineering (EMI) in Rabat, Morocco, and the National School of Applied Sciences (ENSA) in Kenitra, Morocco.
Welcome to the 31st International Symposium on Applied Computing (SAC 2016). For the past 30 years, SAC has become a major international venue for computing researchers and applied practitioners to convene and share ideas on recent developments in a variety of applied areas of information technology. The success of SAC has been the consolidation of a wide range of applied areas into specialized modules called Tracks. Each of the Tracks is then organized and administered by experts in the respective areas by instituting program committees, carrying out blind reviews according to the ACM guidelines, and finally selecting the highly qualified papers for the Track. Since its inception eight years ago, the Poster Sessions at SAC have become a tradition, and this year again the Poster will be an integral part of the Technical Program at SAC 2016.

The open Call for Track Proposals and after prescreening the proposals, 37 Tracks were finally accepted for SAC 2016. The prescreening and selections were made based on the success of those Tracks in the previous SACs as well as targeting new and emerging areas. The Call for Papers for these Tracks attracted 1047 final paper submissions from 58 different countries. The submitted papers underwent the blind review process and 252 submissions were finally accepted as full papers for inclusion in the Conference Proceedings and presentation during the Symposium. The final acceptance rate for SAC 2016 is 24.07% for the overall track. In addition to the accepted full papers, 111 submissions that received high enough review scores were accepted as poster papers for the Posters program. The Student Research Competition (SRC) program, sponsored by Microsoft Research, is designed to provide graduate students the opportunity to meet and exchange ideas with researchers and practitioners in their areas of interest. 47 submissions received and finally 22 papers were accepted for the SRC program.

The Technical Program of SAC 2016 is made possible through the hard work of many people from the scientific community who have volunteered and committed many hours to make it a success. Much credit goes to all Track Chairs for making SAC 2016 Technical Sessions a huge success. Some of the popular Tracks had an unprecedented submissions and having three blind reviews for each paper was certainly a major challenge. Once again this year, we follow the previous years’ tradition in organizing various tracks into five different themes. The Symposium Proceedings and the technical presentations are focused around these themes to form a series of related track sessions. On behalf of the entire SAC 2016 Organizing Committee, we congratulate all the authors for having their papers accepted in their respective Tracks, and we wish to thank all of those who made this year's technical program a great success. Specifically, we wish to thank the speakers, posters chair, track chairs, reviewers, technical program committee members, session chairs, presenters, and all the attendees. We also wish to convey our special thanks to the local organizing committee lead by Dr. Giorgio Buttazzo from Scuola Superiore Sant'Anna, Pisa, Italy, Dr. Alessio Bechini from Scuola Superiore Sant'Anna, Pisa, Italy, Dr. Francesco Marcelloni from University of Pisa, Pisa, Italy, and Dr. Ettore Ricciardi from ISTI-CNR, Pisa, Italy. We wish you all a pleasant stay in Pisa, hope you have a great time at SAC 2016, and you will have the opportunity to share and exchange your ideas and foster new collaborations. We would also like to take this opportunity to convey to you the news that the 32nd International Symposium on Applied Computing (SAC 2017) will be held in the historic city of Marrakech, Morocco, which was declared a UNESCO World Heritage Site. We hope to see you all at SAC 2017.
Keynote Presentation:
The Requirements Problem in Software Engineering

John Mylopoulos
University of Toronto
Toronto, Canada
jm@cs.toronto.edu

ABSTRACT
The requirements problem is the problem of deriving a specification consisting of functions and quality constraints that along with a set of domain assumptions satisfy a given set of requirements. We present several formulations of the requirements problem to account for changing requirements, adaptive software design and the next release problem. In each case, we discuss the tractability of algorithms that search spaces of alternatives to find Pareto-optimal solutions to the problem. This is joint work with many colleagues and students, including Roberto Sebastiani, Paolo Giorgini, Fatma Aydemir, Chi Mai Nguyen (UniTN), Neil Ernst (CMU), Alex Borgida (Rutgers) and Ivan Jureta (Namur).

BIOGRAPHY
Dr. John Mylopoulos holds a professor emeritus position at the Universities of Toronto and Trento. He earned a PhD degree from Princeton University in 1970 and joined the faculty of the Department of Computer Science at the University of Toronto the same year. His research interests include conceptual modelling, requirements engineering, data semantics and knowledge management. Mylopoulos is a fellow of the Association for the Advancement of Artificial Intelligence (AAAI) and the Royal Society of Canada (Academy of Applied Sciences). He has served as programme/general chair of international conferences in Artificial Intelligence, Databases and Software Engineering, including IJCAI (1991), Requirements Engineering (1997, 2011), and VLDB (2004). Mylopoulos is currently leading a project titled "Lucretius: Foundations for Software Evolution", funded by an advanced grant from the European Research Council.
Keynote Presentation:  
From MANET to People-centric Computing and Communications

Marco Conti  
Institute of Informatics and Telematics (IIT)  
National Research Council (CNR)  
Pisa, Italy  
marco.conti@iit.cnr.it

ABSTRACT
In this talk, we first discuss the evolution of the multi-hop ad hoc networking paradigm from MANET to the emerging people-centric networking, where personal mobile devices link the cyber-world with the physical world. People-centric networking leads immediately to emerging localized communication and computing services that are tightly coupled with people and their devices (e.g., mobile data offloading, opportunistic computing, etc.). In the second part of the talk, we discuss how the human behavior (e.g., human social organization) and its cognitive constraints can affect computing and communications in the cyber-physical world. Specifically, we show how embedding models of human behavior into information dissemination protocols can optimize information diffusion.

BIOGRAPHY
Dr. Marco Conti is a Research Director of the Italian National Research Council (CNR) and, currently, he is the Director of the CNR Department of Engineering, ICT and Technologies for Energy and Transportation. He has published in journals and conference proceedings more than 350 research papers related to design, modelling, and experimentation of computer networks, future Internet, social networks and pervasive computing systems. He co-authored the books: "Metropolitan Area Networks (MANs): Architectures, Protocols and Performance Evaluation” (Springer 1997) and "Online Social Networks: Human Cognitive Constraints in Facebook and Twitter Personal Graphs” (Elsevier, 2015), and he is co-editor of the books: “Mobile Ad hoc networking: the cutting edge technologies,” (IEEE-Wiley 2013), "Mobile Ad Hoc Networking" (IEEE-Wiley 2004), and Mobile Ad Hoc Networks: from Theory to Reality (Nova Science Publishers 2007). He is Editor-in-Chief of Elsevier Computer Communications journal and Associate Editor-in-Chief of Elsevier Pervasive and Mobile Computing journal. He received the best paper award at several conferences, including IFIP TC6 Networking 2011 and IEEE WoWMoM 2013. He served as TPC chair for several major conferences -- including IFIP Networking 2002, IEEE WoWMoM 2005, IEEE PerCom 2006, and ACM MobiHoc 2006 -- and he was general chair (among many others) for IEEE WoWMoM 2006, IEEE MASS 2007 and IEEE PerCom 2010. He is the founder of successful conference and workshop series, such as ACM RealMAN, IEEE AOC, ACM MobiOpp, and IFIP/IEEE SustainIT.
Tutorial Presentation:
Multimedia Information Retrieval on a Very Large Scale

Giuseppe Amato
ISTI-CNR
Pisa, Italy
giuseppe.amato@isti.cnr.it

Fabrizio Falchi
ISTI-CNR
Pisa, Italy
fabrizio.falchi@isti.cnr.it

Claudio Gennaro
ISTI-CNR
Pisa, Italy
claudio.gennaro@isti.cnr.it

ABSTRACT
The tutorial first gives an overview of the most popular and effective visual features for content based retrieval: global visual descriptors, local visual descriptors, and deep/CNN features. Then, it introduces techniques able execute feature based similarity retrieval very efficiently, in datasets containing hundred millions images, with limited computing and storage resources. Similarity search is a difficult task because efficient techniques to process database or text queries cannot be applied here. Therefore in the last decades researcher have investigated techniques for executing similarity search efficiently and in a scalable way. The tutorial introduces state of the art techniques for similarity searching, as for instance LSH and permutation based methods. Finally, the tutorial discusses how the above concepts can be put in practice using Open Source solutions. It introduces the OpenCV library, which offers various tools for image analysis and feature extraction. It also discusses how Lucene, an open source text retrieval engine, can be easily used to index and search for visual information.

BIOGRAPHY
Giuseppe Amato graduated in Computer Science at the University of Pisa, Italy, in 1992 and was awarded a PhD in Computer Science at the University of Dortmund, Germany, in 2002. His main research interests are content-based retrieval of multimedia documents, access methods for similarity search of multimedia documents. He has participated in several EC and national funded research actions in the area of multimedia information retrieval.

Fabrizio Falchi has a Ph.D. in Information Engineering from University of Pisa (Italy), and a Ph.D. in Informatics from Faculty of Informatics of Masaryk University of Brno (Czech Republic). He also received an M.B.A. from Scuola Superiore Sant'Anna in Pisa. His research interests include similarity search, distributed indexes, multimedia information retrieval, computer vision, peer-to-peer systems. He has participated in several EC and National research projects.

Claudio Gennaro received the "Laurea" degree in Electronic Engineering from the University of Pisa, Italy, in 1994 and Master Degree in Information Technology at CEFRIEL of Milan. He received PhD Degree in Computer Engineering and Automatica in 1999 from Politecnico di Milano. His main interests are: Access Structures for Multimedia Retrieval, Digital Libraries, Model of Metadata for Audio/Video. Claudio Gennaro has had considerable previous experience in participation of European projects.

ACKNOWLEDGEMENTS
This tutorial was partially supported by EAGLE, Europeana network of Ancient Greek and Latin Epigraphy, co-founded by the European Commission, CIPICT-PSP.2012.2.1 - Europeana and creativity, Grant Agreement n. 325122.
ABSTRACT
Networks have become ubiquitous in several social, economics and scientific fields, ranging from the Internet to social sciences, biology, epidemiology, geography, communication systems, finance and many others. For this reason, several data mining approaches, specifically designed for tackling predictive and descriptive tasks for network data, have been proposed. In this tutorial, from one side, we intend to introduce the various forms of autocorrelation in network data and present the challenges that they pose to traditional data mining algorithms. To this aim, we will discuss different approaches that allow us to consider network autocorrelation either explicitly (with new heuristics) or implicitly (leveraging collective and semi-supervised/transductive learning which exploit the smoothness assumption). From the other side, we aim to provide the audience with a survey and a comparison of different problems arising when facing with networked data that evolve over time. The challenges in mining high speed network streams, require new algorithms. In this tutorial, we will present algorithms based on different window models and sampling strategies for networked streaming data. We will present methods to track the evolution of communities, identifying major events in these communities. The tutorial will conclude with a review of some practical applications of the presented methods in the areas of functional genomics, sensor networks, social networks, telecommunications, CRM, etc.

BIOGRAPHY
Michelangelo Ceci received a "Laurea" degree from the University of Bari in 2001. In 2005 he received his Ph.D. degree in Computer Science from the same University. Currently, he is associate professor at the University of Bari. His main research interests are in data mining and machine learning from complex and networked data. He was a visiting researcher at the University of Bristol (U.K.) and at the JSI (SLO). He has published more than 140 papers in refereed journals and conferences. He is member of the editorial boards of: IJSNM, IJDSN, IJDATS and JAIS. He has been the program co-chair of five workshops, the organizing committee chair of SEBD 2007, member of the editorial committee of “Intelligenza Artificiale” and member of the guest editorial board of the ECMLPKDD 2014-2016 journal tracks. He is Co-Chair of DS 2016 and ECMLPKDD 2017.

João Gama received his Licenciado degree from the Fac. of Engineering of the University of Porto, Portugal. In 2000 he received his Ph.D. degree in Computer Science from the Faculty of Sciences of the same University. Currently, he is Associate Professor at the Faculty of Economy and senior researcher at LIAAD - INESC Porto. He authored more than 200 papers in areas of machine learning, data streams and adaptive learning systems. He is a member of the editorial board of international journals including ML, DMKD, TKDE, NGC, and IDA. He served as Co-chair of ECML 2005, DS 2009, ADMA09, IDA 2011, ECMPKDD 2015 and a series of Workshops on KDDS and Knowledge Discovery from Sensor Data with ACM SIGKDD. He is author of a recent book on Knowledge Discovery from Data Streams.
ABSTRACT
An increasing number of mobile applications are being developed to meet various needs of end users including SMS messaging, social networking, and game playing. It has been estimated that the revenues from mobile applications are expected to rise globally from $68Bn in 2013 to $143Bn in 2016. Android has become the leading smartphone Operating System in the world and currently occupying more than 50% of the global market share of smartphone. Unfortunately, this emerging area is not free from security and reliability issues.

Many of developed mobile applications contain vulnerabilities that may be exploited to cause unwanted actions. Reports find that 92% of Android’s top 500 popular applications are vulnerable to some extent of security or privacy risk. Malware on a smartphone can make a phone partially or fully unusable, cause unwanted billing, or steal contact information stored in a phonebook. Further, benign applications may contain vulnerabilities due to the lack of developer knowledge and malware applications can exploit the known vulnerabilities by providing malicious inputs. Android applications may suffer from resource leakage. Particularly, memory leak can occur when users navigate applications in devices though screen rotation and pressing of built-in buttons leading to the crash of applications.

This tutorial is intended to provide a basic overview of Android applications, malware engineering, classification of malware, and mitigation approaches. We also explore content leakage vulnerability that may lead to security breaches and memory leakage that may cause an application to crash. The tutorial consists of three major parts. In the first part, we provide an overview of built in security features of Android followed by a set of common malware types. We then provide an overview of recent development to combat against malware. In the second part, we introduce the content leakage vulnerability in android applications. We show examples of best programming practices to reduce the exposure of content leakage issue. In the third part, we address the memory leak issue. We discuss future research directions. The discussion would argue that existing tools can address the challenge for building reliable and secure applications partially.

BIOGRAPHY
Dr. Hossain Shahriar is currently an Assistant Professor of Information Technology Department at Kennesaw State University, Georgia, USA. His research interests include software, web and mobile application security, malware analysis, mitigation of vulnerabilities based on information theory, risk analysis based on metrics. Dr. Shahriar has published over 50 peer reviewed journals, conference papers and book chapters. He served as Program Chair in SIN 2016, Workshop Co-Chair in SIN 2015, Fast Abstract Chair in IEEE COMPSAC 2015, and PC member in international conferences such as ACM SAC, SIN, and COMPSAC. Dr. Shahriar is currently a member of the ACM, SIGAPP, and IEEE.
Tutorial Presentation: Development of Correct-by-Construction Functional Parallel Programs

Frédéric Loulergue
Université d’Orléans
Orléans, France
Frederic.Loulergue@univ-orleans.fr

ABSTRACT

With the current generalization of parallel architectures and increasing requirement of parallel computation arises the concern of applying formal methods, which allow specifications of parallel and distributed programs to be precisely stated and the conformance of an implementation to be verified using mathematical techniques. However, the complexity of parallel programs, compared to sequential ones, makes them more error-prone and difficult to verify. This calls for a strongly structured form of parallelism, which should not only be equipped with an abstraction or model that conceals much of the complexity of parallel computation, but also provides systematic way of developing such parallelism from specifications for practically nontrivial examples.

Program calculation is a kind of program transformation based on the theory of constructive algorithms. An efficient program is derived step-by-step through a sequence of transformations that preserve the meaning and hence the correctness. With suitable data-structures, program calculation can be used for writing parallel programs.

The SyDPaCC system is a set of libraries for the proof assistant Coq (http://coq.inria.fr) that allows to write naive (i.e. inefficient) functional programs then to transform them into efficient versions that could be automatically parallelized within the framework before being extracted from Coq to code in the functional language OCaml plus calls to the parallel functional programming library Bulk Synchronous Parallel ML. The tutorial is an introduction both to Coq (ACM Software System Award in 2013) and the SyDPaCC system for the systematic development of correct and verified parallel programs.

BIOGRAPHY

Frédéric Loulergue obtained his PhD in Computer Science from the University of Orléans in 2000 and his Habilitation in Computer Science from Université Paris Val-de-Marne in 2004. He is currently a full professor at Université d’Orléans. His research interests are the practical and formal aspects of the design, implementation and application, in particular to large-scale data-intensive software, of structured parallel programming languages and libraries. He co-organized the series of international workshop on High-Level Parallel Programming and Applications (HLPP) between 2003 and 2010 and is now a member of its steering committee. In 2004, he created the series of international workshops on Practical Aspects of High-Level Parallel Programming (PAPP), and he has (co-)organized several PAPP workshops since then. He is a member of the editorial board of Scalable Computing: Practice and Experience, and Technique et Science Informatiques. He is currently the head of the Logic Modelling and Verification (LMV) research team at LIFO.
Tutorial Presentation: Context in Recommender Systems

Yong Zheng
DePaul University
Chicago, USA
yzheng8@cs.depaul.edu

ABSTRACT
Recommender system (RS) is able to alleviate the information overload problem and assist user's decision makings by recommending appropriate information to the end users. It has been widely applied in several applications, such as Amazon.com, Facebook, Netflix, etc. Context-aware recommender system (CARS) is a novel type of RS trying to adapt their recommendations to users' specific contextual situations, such as time and location. Accordingly, recommendation algorithms in CARS additionally take contexts into consideration, in contrast to the traditional recommendation approaches. Researchers believe that recommendations cannot stand alone without considering contexts, since users' preferences are always changing from contexts to contexts. For example, you may choose a romantic movie to watch with partner, but probably a cartoon if you are going to watch with kids.

There are two typical recommendation tasks involved when context is taken into account in RS: one is context-aware recommendation (CAR) and another one is context recommendation (CR). The basic research problems and challenges in CAR include context identification and selection, context incorporation and adaptation, context evaluation and interpretation, where CAR aims to recommend items to users by adapting to contextual information, e.g., which movies are appropriate to be recommended for John to watch with his girlfriend? By contrast, CR is a novel research direction emerged recently, and it will help suggest appropriate contexts for the users to consume the item to maximize user experience, e.g., which could be the best contexts (e.g., time, location, companion, emotional state, etc) for John to watch the movie "Titanic"?

In this half-day tutorial, the background and corresponding algorithms in recommender systems will be given at the beginning as the preliminary introduction. Afterwards, a comprehensive overview on those two recommendation tasks - CAR and CR, will be introduced to the audience. In addition, an open-source context-aware recommendation library, named as CARSKit, will also be introduced in order to show the ease of configuring and evaluating context-aware recommendation algorithms by this toolkit. By the end, we will further discuss the research problems and challenges in context recommendation.

BIOGRAPHY
Yong Zheng got his B.S. and M.S. degree in computer science in China, and he will obtain his PhD degree from DePaul University in 2016. His research interests lie in multi-disciplinary areas, including artificial intelligence, data mining and machine learning, information retrieval and recommender systems, etc. Over the past few years, his research focused on recommender systems, especially the development of context-aware recommender systems. He has published more than 40 peer-reviewed publications in related academic conferences, journals and book chapters. In addition, he served program committee member and reviewer for several academic journals, such as ACM Transactions on Information Systems (TOIS), ACM Transactions on the Web (TWeb), User Modeling and User-Adapted Interaction (UMUAI), and well-recognized international conferences, such as WWW, ACM RecSys, ACM IUI, ACM SAC, UMAP, ICWSM, and so forth.
Tutorial Presentation: Towards the Internet of Relevant Things. The IEEE 802.15.4e Standard

Giuseppe Anastasi  
University of Pisa  
Pisa, Italy  
domenico.deguglielmo@iet.unipi.it

Simone Brienza  
University of Pisa  
Pisa, Italy  
simone.brienza@for.unipi.it

Domenico De Guglielmo  
University of Pisa  
Pisa, Italy  
giuseppe.anastasi@unipi.it

ABSTRACT

The Internet of Things (IoT) will completely change the way we live and work. In near future, billions of smart objects will be connected to the Internet, paving the way for a large number of innovative services in different application domains including smart cities, smart buildings, factory automation, e-health, etc. In many of such domains, applications have stringent requirements in terms of communication reliability, timeliness, scalability, and energy efficiency. To address the needs of such critical applications, the IEEE has recently released the 802.15.4e amendment that extends the original 802.15.4-2006 standard. By combining time slotted access with multi-channel communication and frequency hopping, the new 802.15.4e MAC protocols can provide highly-reliable, time-bounded, and low-power communication. Also, they can easily support multi-hop mesh networks. This tutorial will present the opportunities offered by the new standard in the perspective of the Internet of Things. Specifically, it will start with a description of the IEEE 802.15.4 standard to highlight the main reasons that limit its adoption in critical scenarios. Then, the improvements introduced by 802.15.4e will be discussed, with focus on the main MAC protocols (i.e., TSCH, DSME). For each considered MAC protocol, a description of its specific features will be provided and potential application domains will be identified. The tutorial will also include a survey of the main research activities on 802.15.4e networks. Special attention will be devoted to issues arising from the integration of 802.15.4e within the IoT framework.

BIOGRAPHY

Giuseppe Anastasi is Full Professor and Associate Head at the Department of Information Engineering of the University of Pisa, Italy. He is also the director of the Smart Cities National Lab, supported by CINI (Italian University Consortium for Informatics). He directs the executive Master in Smart Cities, a post-graduate specialization program organized by the University of Pisa in cooperation with the Italian National Research Council (CNR). His scientific interests include Distributed and P2P Systems, Internet of Things, Pervasive Computing, Sustainable Computing, and ICT for Smart Cities. He has published about 130 research papers in the area of computer networking and pervasive computing, gathering more than 4500 citations. Dr. Anastasi is Associate Editor of Sustainable Computing (SUSCOM) and Area Editor of Pervasive and Mobile Computing (PMC). He has been the co-founder of a number of successful international workshops and conferences. Currently, he is a member of the Board of Directors of the Italian National University Consortium for Informatics (CINI). Dr. Anastasi received the M.Sc. degree in Electronics Engineering, and the Ph.D. degree in Computer Engineering, from the University of Pisa, in 1990 and 1995, respectively.

Simone Brienza received his B.S. and M.S. degrees in Computer Engineering from the University of Pisa, in 2008 and 2012, respectively. Currently, he is a Ph.d. candidate at the Department of Information Engineering of the University of Pisa. His research concerns IEEE 802.15.4 and 802.15.4e WSNs.

Domenico De Guglielmo is a Postdoctoral Researcher in the Department of Information Engineering at the University of Pisa. His research interests are in the field of WSNs and Internet of Things.

Edith Ranzini, Pontificia Universidade Católica de São Paulo, Brazil
Fátima L.S. Nunes, University of Sao Paulo, Brazil
Romero Tori, Escola Politécnica da Universidade de São Paulo, Brazil

A Movement Activity Recognition Pervasive System for Patient Monitoring in Ambient Assisted Living

José Daniel Pereira Ribeiro Filho, Universidade Federal do Maranhão, Brazil
Francisco José da Silva e Silva, Universidade Federal do Maranhão, Brazil
Luciano Reis Coutinho, Universidade Federal do Maranhão, Brazil
Berto de Tácio Pereira Gomes, Universidade Federal do Maranhão, Brazil
Markus Endler, Pontifical Catholic University of Rio de Janeiro, Brazil

Poster Papers

A Novel EEG-Based Emotion Recognition Approach for E-Healthcare Applications

Mouhannad Ali, Alpen-Adria University, Austria
Fadi Al Machot, Alpen-Adria University, Austria
Ahmad Haj Mosa, Alpen-Adria University, Austria
Kyandoghere Kyamakya, Alpen-Adria University, Austria

Student Research Competition Paper

Student Research Abstract: A Web Tool for Medical Topic Modeling

Lukas Huber, UMIT, Austria

Smart Human Computer Interaction Track

Track Co-Chairs: Soon Ki Jung, Kyungpook National University, South Korea
Anand Paul, Kyungpook National University, South Korea
Ganesh Kumar P., Anna University, India

Understanding Player Perceptions of RegnaTales: A Mobile Game for Teaching Social Problem Solving Skills

Yoon Phaik Ooi, University of Basel, Switzerland
Dion Hoe-Lian Goh, Nanyang Technological University, Singapore
Elisa D. Mekler, University of Basel, Switzerland
Alexandre N. Tuch, University of Basel, Switzerland
Jillian Boon, Institute of Mental Health, Singapore
Daniel Fung, Institute of Mental Health, Singapore
Jens Gaab, University of Basel, Switzerland

A Comparative Evaluation of Interaction Models for the Design of Interactive Systems

Anna Beatriz Marques, Universidade Federal do Amazonas, Brazil
Simone D.J. Barbosa, Pontifical Catholic University of Rio de Janeiro, Brazil
Tayana Conte, Universidade Federal do Amazonas, Brazil
Accessibility Evaluation of Rich Internet Applications Interface Components for Mobile Screen Readers
Lucas Pedrosa Carvalho, Universidade Federal de Lavras, Brazil
Lucas Pereira Ferreira, Universidade Federal de Lavras, Brazil
André Pimenta Freire, Universidade Federal de Lavras, Brazil

Multimodal Human Attention Detection for Reading
Jiajia Li, The Hong Kong Polytechnic University, Hong Kong
Grace Ngai, The Hong Kong Polytechnic University, Hong Kong
Hong Ye Leong, The Hong Kong Polytechnic University, Hong Kong
Stephen Chan, The Hong Kong Polytechnic University, Hong Kong

VCloud: Adding Interactiveness to Word Clouds for Knowledge Exploration in Large Unstructured Texts
Wallace Lira, Simon Fraser University, Canada
Fernando Gama, Vale Institute of Technology, Brazil
Hivana Barbosa, Vale Institute of Technology, Brazil
Ronnie Alves, LIRMM, Brazil
Cleidson de Souza, Vale Institute of Technology, Brazil

Poster Papers

From Storyboard to Software: User Evaluation of an Information Literacy Game
Yan Ru Guo, Nanyang Technological University, Singapore
Dion Hoe-Lian Goh, Nanyang Technological University, Singapore

User-Friendly Spreadsheet Querying: An Empirical Study
Rui Pereira, HASLab/INESC Tec, Universidade do Minho, Portugal
João Saraiva, HASLab/INESC Tec, Universidade do Minho, Portugal
Jácome Cunha, Universidade Nova de Lisboa, Portugal
João Paulo Fernandes, Universidade da Beira Interior, Portugal

STRATUS: A Questionnaire for Strategic Usability Assessment
Suzanne Kieffer, Université Catholique de Louvain, Belgium
Jean Vanderdonckt, Université Catholique de Louvain, Belgium

Usability Heuristics and Accessibility Guidelines: A Comparison of Heuristic Evaluation and WCAG
Andreia R. Casare, University of Campinas, Brazil
Celmar G. da Silva, University of Campinas, Brazil
Paulo S. Martins, University of Campinas, Brazil
Regina L.O. Moraes, University of Campinas, Brazil

Student Research Competition Paper

Student Research Abstract: Social Element of Big Data Analytics: Integrating Social Network with the Internet of Things
Awais Ahamad, Kyungpook National University, South Korea
Intelligent and Interactive Learning Environments Track

Track Co-Chairs: Seiji Isotani, University of São Paulo, Brazil
Ig Ibert Bittencourt, Federal University of Alagoas, Brazil
Riichiro Mizoguchi, JAIST, Japan
Julita Vassileva, University of Saskatchewan, Canada

Track Editorial ................................................................. 218

A Crowdsensing Approach for Mobile Learning in Acoustics and Noise Monitoring .................. 219
Marco Zappatore, University of Salento, Italy
Antonella Longo, University of Salento, Italy
Mario A. Bochicchio, University of Salento, Italy
Daniele Zappatore, University of Salento, Italy
Alessandro A. Morrone, University of Salento, Italy
Gianluca De Mitri, University of Salento, Italy

An Interactive Approach for the Teaching of Virtual Memory using Open Educational Resources ...... 225
Carlos E.A. Cacho, Institute of Mathematics and Computer Science, University of São Paulo, Brazil
Paulo S.L. Souza, Institute of Mathematics and Computer Science, University of São Paulo, Brazil

Petri Nets for Modelling and Analysing a Complex System Related to Alzheimer's Disease
Safae Cherdal, Mohammed V University of Rabat, Morocco
Salma Mouline, Mohammed V University of Rabat, Morocco

Student Research Competition Paper

Student Research Abstract: Modeling the Cerebellum, from Neurons to Healthy and Pathological Behaviors
Alberto Antonietti, Politecnico di Milano, Italy

The Semantic Web and Applications Track

Track Co-Chairs: Soon Ae Chun, City University of New York, United States
Hyoil Han, Marshall University, United States
Sangsoo Sung, Google Inc., United States

Measuring Semantic Distance for Linked Open Data-Enabled Recommender Systems
Guangyuan Piao, National University of Ireland, Galway, Ireland
John G. Breslin, National University of Ireland, Galway, Ireland

An Ontology Pattern Language for Service Modeling
Ricardo A. Falbo, Federal University of Espírito Santo, Brazil
Glaice K. Quirino, Federal University of Espírito Santo, Brazil
Julio C. Nardi, Federal Institute of Espírito Santo, Brazil
Monalessa P. Barcellos, Federal University of Espírito Santo, Brazil
Giancarlo Guizzardi, Federal University of Espírito Santo, Brazil
Nicola Guarino, Institute of Cognitive Sciences and Technologies, Italy
Antonella Longo, University of Salento, Italy
Barbara Livieri, University of Salento, Italy

Leveraging the Schema in Latent Factor Models for Knowledge Graph Completion
Pasquale Minervini, Università degli Studi di Bari Aldo Moro, Italy
Claudia d'Amato, Università degli Studi di Bari Aldo Moro, Italy
Nicola Fanizzi, Università degli Studi di Bari Aldo Moro, Italy
Floriana Esposito, Università degli Studi di Bari Aldo Moro, Italy
Ontology Enrichment by Discovering Multi-Relational Association Rules from Ontological Knowledge Bases
Claudia d’Amato, University of Bari, Italy
Steffen Staab, University of Koblenz-Landau, Germany
Andrea G.B. Tettamanzi, University of Nice Sophia Antipolis, France
Tran Duc Minh, University of Nice Sophia Antipolis, France
Fabien Gandon, INRIA Sophia Antipolis, France

Gold Standard based Evaluation of Ontology Learning Techniques
Hela Sfar, ENSI, Tunisia
Anja Habacha Chaibi, ENSI, Tunisia
Amel Bouzeghoub, Telecom SudParis, France
Henda Ben Ghezala, ENSI, Tunisia

GoAAL: An Ontology for Goal-Oriented Development of AAL Environments
Marco Cameranesi, Università Politecnica delle Marche, Italy
Claudia Diamantini, Università Politecnica delle Marche, Italy
Domenico Potena, Università Politecnica delle Marche, Italy
Emanuele Storti, Università Politecnica delle Marche, Italy

A 2-Phase Frame-Based Knowledge Extraction Framework
Francesco Corcoglioniti, Fondazione Bruno Kessler, Italy
Marco Rospocher, Fondazione Bruno Kessler, Italy
Alessio Palmero Aprosio, Fondazione Bruno Kessler, Italy

SECF: Improving SPARQL Querying Performance with Proactive Fetching and Caching
Wei Emma Zhang, The University of Adelaide, Australia
Quan Z. Sheng, The University of Adelaide, Australia
Yongrui Qin, The University of Adelaide, Australia
Lina Yao, The University of Adelaide, Australia
Ali Shemshadi, The University of Adelaide, Australia
Kerry Taylor, Australian National University, Australia

Poster Papers

A Bootstrapping Method for Extracting Attribute Names with Keys from the Web
Yoshinori Hijikata, Osaka University, Japan
Shintaro Nomura, Osaka University, Japan
Fumitaka Nakane, Osaka University, Japan
Shogo Nishida, Osaka University, Japan

Automatic Semantic Service Composition Aiming at Increasing End-Users’ Accessibility
Nikolaos Kaklanis, Information Technologies Institute, Greece
Ageliki Konstadinidou, Information Technologies Institute, Greece
Konstantinos Votis, Information Technologies Institute, Greece
Dimitrios Tzovaras, Information Technologies Institute, Greece

Student Research Competition Paper

Student Research Abstract: Exploiting the Semantic Similarity of Interests in a Semantic Interest Graph for Social Recommendations
Guangyuan Piao, National University of Ireland, Galway, Ireland
Cloud Computing Track
Track Co-Chairs: Fernando De la Prieta, University of Salamanca, Spain
S.D Madhu Kumar, National Institute of Technology Calicut, India

Track Editorial

Monitoring of Cloud Computing Environments: Concepts, Solutions, Trends, and Future Directions ..... 378
Guilherme da Cunha Rodrigues, Federal University of Rio Grande do Sul, Brazil
Rodrigo N. Calheiros, The University of Melbourne, Australia
Vinicius Tavares Guimarães, Federal University of Rio Grande do Sul, Brazil

A High-Level and Scalable Approach for Generating Scale-Free Graphs using Active Objects .......... 1244
Keyvan Azadbakht, Centrum Wiskunde en Informatica, The Netherlands
Nikolaos Bezirgiannis, Centrum Wiskunde en Informatica, The Netherlands
Frank S. de Boer, Centrum Wiskunde en Informatica, The Netherlands
Sadegh Aliakbary, Shahid Beheshti University, Iran

Poster Papers

Fast Error Detection with Hybrid Analyses of Future Accesses .......................................................................................... 1251
Pavel Parizek, Charles University in Prague, Czech Republic

Scalable Quantum Simulation by Reductions and Decompositions through the Id-Operator ........ 1255
Anderson Braga de Avila, Federal University of Pelotas, Brazil
Renata Hax Sander Reiser, Federal University of Pelotas, Brazil
Adenauer Correa Yamin, Federal University of Pelotas, Brazil
Mauricio Lima Pilla, Federal University of Pelotas, Brazil

Requirement Engineering Track
Track Co-Chairs: Jaelson Castro, Universidade Federal de Pernambuco, Brazil
João Araújo, Universidade Nova de Lisboa, Portugal

Understanding How Power Influences Business and Requirements Decisions in Software Ecosystems .... 1258
George Valença, Universidade Federal Rural de Pernambuco, Brazil
Carina Alves, Universidade Federal de Pernambuco, Brazil

Retrospective, Relevance, and Trends of SAC Requirements Engineering Track .......................... 1264
Jéssyka Vilela, Universidade Federal de Pernambuco, Brazil
Enyo Gonçalves, Universidade Federal de Pernambuco, Universidade Federal do Ceará, Brazil
Ana Holanda, Universidade Federal de Pernambuco, Instituto Federal do Acre, Brazil
Bruno Figueiredo, Universidade Federal de Pernambuco, Brazil
Jaelson Castro, Universidade Federal de Pernambuco, Brazil
Usability of Requirements Techniques: A Systematic Literature Review ................................. 1270
Denise Bombonatti, IBM Brazil, Brazil
Catarina Gralha, Universidade NOVA de Lisboa, Portugal
Ana Moreira, Universidade NOVA de Lisboa, Portugal
João Araújo, Universidade NOVA de Lisboa, Portugal
Miguel Goulão, Universidade NOVA de Lisboa, Portugal

Eliciting Accessibility Requirements an Approach based on the NFR Framework .................. 1276
Romeu Oliveira, Federal University of Rio Grande do Norte, Brazil
Lyrene Silva, Federal University of Rio Grande do Norte, Brazil
Julio Cesar Sampaio P. Leite, Catholic University of Rio de Janeiro, Brazil
Ana Moreira, Universidade NOVA de Lisboa, Portugal

Collaborative Requirements Elicitation in a European Research Project ............................ 1282
Guglielmo De Angelis, CNR-IASI, Italy
Alessio Ferrari, CNR-ISTI, Italy
Stefania Gnesi, CNR-ISTI, Italy
Andrea Polini, University of Camerino, Italy

Impacts of Agile Requirements Documentation Debt on Software Projects: A Retrospective Study ... 1290
Thiago Souto Mendes, Federal Institute of Bahia and Federal University of Bahia, Brazil
Henrique Frota Soares, Salvador University, Brazil
Mário André de F. Farias, Federal Institute of Sergipe and Federal University of Bahia, Brazil
Marcos Kalinowski, Fluminense Federal University, Brazil
Manoel Mendonça, Fraunhofer Proj. Center at UFBA, Brazil
Rodrigo Oliveira Spinola, UFBA and Salvador University, Brazil

Poster Papers

Quality-Centric Feature Model Configuration using Goal Models ............................................ 1296
Mahdi Noorian, University of New Brunswick, Canada
Ebrahim Bagheri, Ryerson University, Canada
Weichang Du, University of New Brunswick, Canada

Software Architecture: Theory, Technology and Applications Track
Track Co-Chairs: Diego Perez-Palacin, Politecnico di Milano, Italy
Patrizia Scandurra, University of Bergamo, Italy

Track Editorial ........................................................................................................................................... 1300

ArchFeature: Integrating Features into Product Line Architecture ............................................. 1302
Gharib Gharibi, University of Missouri - Kansas City, USA
Yongjie Zheng, University of Missouri - Kansas City, USA

Exploring the Combination of Software Visualization and Data Clustering
in the Software Architecture Recovery Process .................................................................................. 1309
Renato Paiva, University of Brasilia, Brazil
Genaina N. Rodrigues, University of Brasilia, Brazil
Rodrigo Bonfácio, University of Brasilia, Brazil
Marcelo Ladeira, University of Brasilia, Brazil
SAMSON: Self-Adaptive Middleware for Wireless Sensor Networks
Jesus M.T. Portocarrero, Federal University of Rio de Janeiro, Brazil
Flávia C. Delicato, Federal University of Rio de Janeiro, Brazil
Paulo F. Pires, Federal University of Rio de Janeiro, Brazil
Tantiro C. Rodrigues, Federal University of Rio Grande do Norte, Brazil
Thais V. Batista, Federal University of Rio Grande do Norte, Brazil

Case-Based Reasoning and Knowledge-Graph based Metamodel for Runtime Adaptive Architectural Modeling
Marina Mongiello, Politecnico di Bari, Italy
Tommaso Di Noia, Politecnico di Bari, Italy
Francesco Nocera, Politecnico di Bari, Italy
Eugenio Di Sciascio, Politecnico di Bari, Italy

Squirrel: Architecture Driven Resource Management
Inti Gonzalez-Herrera, University of Rennes 1 - IRISA, France
Johann Bourcier, University of Rennes 1 - IRISA, France
Walter Rudametkin, University of Lille - INRIA, France
Olivier Barais, University of Rennes 1 - IRISA, France
Francois Fouquet, University of Luxembourg, Luxembourg

Deepening the Separation of Concerns in the Implementation of Multimedia Systems
Marcio Ferreira Moreno, IBM Research, Brazil
Rodrigo Santos, Pontifical Catholic University of Rio de Janeiro, Brazil
Guilherme Lima, Pontifical Catholic University of Rio de Janeiro, Brazil
Marcelo Moreno, Universidade Federal de Juiz de For a, Brazil
Luiz F. Soares, Pontifical Catholic University of Rio de Janeiro, Brazil

Poster Papers
Towards a (De)composable Workflow Architecture to Define Data Collection Policies
Cyril Cecchinel, Université Nice Sophia-Antipolis, France
Sébastien Mosser, Université Nice Sophia-Antipolis, France
Philippe Collet, Université Nice Sophia-Antipolis, France

Tool Support for Evaluating Architectural Debt of an Existing System: An Experience Report
Francesca Arcelli Fontana, University of Milano-Bicocca, Italy
Riccardo Roveda, University of Milano-Bicocca, Italy
Marco Zanoni, University of Milano-Bicocca, Italy

From Product Architectures to a Managed Automotive Software Product Line Architecture
Benjamin Cool, Clausthal University of Technology, Germany
Christoph Knieke, Clausthal University of Technology, Germany
Andreas Rausch, Clausthal University of Technology, Germany
Mirco Schindler, Clausthal University of Technology, Germany
Arthur Strasser, Clausthal University of Technology, Germany
Martin Vogel, Clausthal University of Technology, Germany
Oliver Brox, Volkswagen AG, Germany
Stefanie Jauns-Seyfried, Volkswagen AG, Germany

A Taxonomy for Architectural Stability
Maria Salama, University of Birmingham, UK
Rami Bahsoon, University of Birmingham, UK
Decoupled Concurrency: A Self-Adaptive Software Architecture for Programming Multicores
Tai Nguyen, Washington State University, USA
Xinghui Zhao, Washington State University, USA

Student Research Competition Paper

Student Research Abstract: Fuzzy Ontology-Driven Web-Based Framework for Supporting Architectural Design
Francesco Nocera, Polytechnic University of Bari, Italy

Software Engineering Track

Track Co-Chairs:
Eunjee Song, Baylor University, United States
Byungjeong Lee, University of Seoul, South Korea

Track Editorial

Toward Improving Ability to Repair Bugs Automatically – A Patch Candidate Location Mechanism using Code Similarity
Haruki Yokoyama, Osaka University, Japan
Yoshiki Higo, Osaka University, Japan
Keisuke Hotta, Osaka University, Japan
Takafumi Ohta, Osaka University, Japan
Kozo Okano, Osaka University, Japan
Shinji Kusumoto, Osaka University, Japan

BPMiner: Mining Developers' Behavior Patterns from Screen-Captured Task Videos
Jing Li, Nanyang Technological University, Singapore
Lingfeng Bao, Zhejiang University, China
Zhenchang Xing, Nanyang Technological University, Singapore
Xinyu Wang, Zhejiang University, China
Bo Zhou, Zhejiang University, China

Software-Specific Part-of-Speech Tagging: An Experimental Study on Stack Overflow
Deheng Ye, Nanyang Technological University, Singapore
Zhenchang Xing, Nanyang Technological University, Singapore
Jing Li, Nanyang Technological University, Singapore
Nachiket Kapre, Nanyang Technological University, Singapore

Automated Memory Leak Fixing on Value-Flow Slices for C Programs
Hua Yan, University of New South Wales, Australia
Yulei Sui, University of New South Wales, Australia
Shiping Chen, CSIRO, Australia
Jingling Xue, University of New South Wales, Australia

Checking Linearizability with Fine-Grained Traces
Zhenyue Long, Guangdong Power Grid Co. Ltd., China
Yu Zhang, Chinese Academy of Sciences, Jilin University, China

Optimization of Feature Interactions for Automotive Combustion Engines
Dominik Wagner, Robert Bosch AG, Austria
Hermann Kaindl, Technische Universität Wien, Austria
Sven Dominka, Robert Bosch AG, Austria
Michael Dübner, Robert Bosch AG, Austria
A Methodology Towards the Adaptization of Legacy Systems using Agent-Oriented Software Engineering
Francois Wavresky, Ajou University, South Korea
Seok-Won Lee, Ajou University, South Korea

Evaluating and Comparing Complexity, Coupling and a New Proposed Set of Coupling Metrics in Cross-Project Vulnerability Prediction
Sara Moshtari, Shiraz University, Iran
Ashkan Sami, Shiraz University, Iran

Students’ and Professionals’ Perceptions of Test-Driven Development: A Focus Group Study
Giuseppe Scanniello, University of Basilicata, Italy
Simone Romano, University of Basilicata, Italy
Davide Fucci, University of Oulu Graduate School, Finland
Burak Turhan, University of Oulu Graduate School, Finland
Natalia Juristo, Universidad Politécnica de Madrid, Spain

Simple Function Points for Effort Estimation: A Further Assessment
Filomena Ferrucci, Università degli Studi di Salerno, Italy
Carmine Gravino, Università degli Studi di Salerno, Italy
Luigi Lavazza, Università degli Studi dell’Insubria, Italy

An Empirical Study on the Effect of Programming Languages on Productivity
Luigi Lavazza, Università degli Studi dell’Insubria, Italy
Sandro Morasca, Università degli Studi dell’Insubria, Italy
Davide Tosi, Università degli Studi dell’Insubria, Italy

Automated Procedure Clustering for Reverse Engineering PL/SQL Programs
Metin Altınışik, Turkcell Technology, Turkey
Hasan Sözer, Ozyegin University, Turkey

EMF-REST: Generation of RESTful APIs from Models
Hamza Ed-douibi, Universitat Oberta de Catalunya, Spain
Javier Luis Cánovas Izquierdo, Universitat Oberta de Catalunya, Spain
Abel Gómez, Universidad de Zaragoza, Spain
Massimo Tisi, AtlanMod team (Inria, Mines Nantes, LINA), France
Jordi Cabot, ICREA - UOC, Spain

Software Testing in a Scientific Research Group
Matthew Patrick, University of Cambridge, UK
James Elderfield, University of Cambridge, UK
Richard O.J.H. Stutt, University of Cambridge, UK
Andrew Rice, University of Cambridge, UK
Christopher A. Gilligan, University of Cambridge, UK

Towards a Generic Framework for Automating Extensive Analysis of Android Applications
Li Li, University of Luxembourg, Luxembourg
Daoyuan Li, University of Luxembourg, Luxembourg
Alexandre Bartel, Technical University of Darmstadt, Germany
Tegawendé F. Bissyandé, University of Luxembourg, Luxembourg
Jacques Klein, University of Luxembourg, Luxembourg
Yves Le Traon, University of Luxembourg, Luxembourg
Similarity Management of 'Cloned and Owned' Variants .......................................................... 1466
Thomas Schmorleiz, University of Koblenz-Landau, Germany
Ralf Lämmel, University of Koblenz-Landau, Germany

A Systematic Mapping Study on Mining Software Repositories ............................................. 1472
Mário André de Freitas Farias, Federal Institute of Sergipe and Federal University of Bahia, Brazil
Renato Novais, Fraunhofer Project Center at UFBA and Federal Institute of Bahia, Brazil
Methanias Colaco Jr., Federal University of Sergipe, Brazil
Luis Paulo da Silva Carvalho, Federal Institute of Bahia, Brazil
Manoel Mendonça, Federal University of Bahia, Brazil
Rodrigo Oliveira Spinola, Fraunhofer Project Center at UFBA and Salvador University, Brazil

Architectural Clones: Toward Tactical Code Reuse ................................................................. 1480
Daniel E. Krutz, Rochester Institute of Technology, USA
Mehdi Mirakhorl, Rochester Institute of Technology, USA

Silvia N. das Dôres, Pontifical Catholic University of Rio Grande do Sul, Brazil
Luciano Alves, Pontifical Catholic University of Rio Grande do Sul, Brazil
Duncan D. Ruiz, Pontifical Catholic University of Rio Grande do Sul, Brazil
Rodrigo C. Barros, Pontifical Catholic University of Rio Grande do Sul, Brazil

Improving the Quality of Code Snippets in Stack Overflow ..................................................... 1492
Mohammad Reza Tavakoli, Sharif University of Technology, Iran
Abbas Heydarnoori, Sharif University of Technology, Iran
Mohammad Ghafari, Politecnico di Milano, Italy

Reverse Engineering: A European IPR Perspective ................................................................. 1498
Paolo Ciancarini, University of Bologna, Italy
Daniel Russo, University of Bologna, Italy
Alberto Sillitti, Center for Applied Software Engineering, Italy
Giancarlo Succi, Innopolis University, Russia

Integrating Feature-Based Implementation Approaches using a Common Graph-Based Representation .......................................................... 1504
Benjamin Behringer, University of Luxembourg, Luxembourg
Steffen Rothkugel, University of Luxembourg, Luxembourg

Is Code Cloning in Games Really Different? ............................................................................ 1512
Farouq Al-omari, University of Saskatchewan, Canada
Chanchal K. Roy, University of Saskatchewan, Canada

Integrated Analysis of Exception Flows and Handler Actions in Java Libraries: An Empirical Study ..... 1520
Demóstenes Sena, Federal University of Rio Grande do Norte, Brazil
Roberta Coelho, Federal University of Rio Grande do Norte, Brazil
Uirá Kulesza, Federal University of Rio Grande do Norte, Brazil

Model-Based Replay Testing for Event-Driven Software ........................................................... 1527
Shakaiba Majeed, Hanyang University, South Korea
Minsoo Ryu, Hanyang University, South Korea
Poster Papers

Characterizing Non-Deadlock Concurrency Bug Fixes in Open-Source Java Programs ........................................ 1534
Misun Yu, Electronics and Telecommunications Research Institute, South Korea
Yu-Seung Ma, Electronics and Telecommunications Research Institute, South Korea
Doo-Hwan Bae, Korea Advanced Institute of Science and Technology, South Korea

A Graph-Based Approach to Detect Unreachable Methods in Java Software .................................................. 1538
Simone Romano, University of Basilicata, Italy
Giuseppe Scanniello, University of Basilicata, Italy
Carlo Sartiani, University of Basilicata, Italy
Michele Risi, University of Salerno, Italy

Automatic Formal Specification Generation of APIs by Mining Unit Tests ................................................... 1542
Otmar M. Pereira Junior, Pontifical Catholic University of Minas Gerais, Brazil
Wladmir C. Brandão, Pontifical Catholic University of Minas Gerais, Brazil
Mark Alan J. Song, Pontifical Catholic University of Minas Gerais, Brazil

Consistency Checks of Design Specifications against Requirements using Graph-Based Linguistic Analysis ........................................ 1546
Kai Niklas, Talanx Systeme AG, Germany
Stefan Gärtner, Leibniz Universität Hannover, Germany
Kurt Schneider, Leibniz Universität Hannover, Germany

Empirical Investigation of Fault Predictors in Context of Class Membership Probability Estimation ...... 1550
Shahid Hussain, City University of Hong Kong, Hong Kong
Arif Ali Khan, City University of Hong Kong, Hong Kong
Kwabena Ebo Bennin, City University of Hong Kong, Hong Kong

A Review and Comparison of Methods for Determining the Best Analogies in Analogy-Based Software Effort Estimation .................................................. 1554
Bodin Chinthanet, Kasetsart University, Thailand
Passakorn Phannachitta, Nara Institute of Science and Technology, Japan
Yasutaka Kamei, Kyushu University, Japan
Pattara Leelaprute, Kasetsart University, Thailand
Arnon Rungsawang, Kasetsart University, Thailand
Naoyasu Ubayashi, Kyushu University, Japan
Kenichi Matsumoto, Nara Institute of Science and Technology, Japan

Evaluating the use of a General-Purpose Benchmark Suite for Domain-Specific SMT-Solving ........ 1558
Andrew Healy, Maynooth University, Ireland
Rosemary Monahan, Maynooth University, Ireland
James F. Power, Maynooth University, Ireland

Jin Hyun Kim, INRIA/IRISA, France
Axel Legay, INRIA/IRISA, France
Louis-Marie Traonouez, INRIA/IRISA, France
Mathieu Acher, University of Rennes 1, France
Sungwon Kang, KAIST, South Korea
Testability and Software Performance: A Systematic Mapping Study
Mohammad Mahdi Hassan, Karlstad University, Sweden
Wasif Afzal, Mälardalen University, Sweden
Birgitta Lindström, University of Skövde, Sweden
Syed Muhammad Ali Shah, Swedish Institute of Computer Science, Sweden
Sten F. Andler, University of Skövde, Sweden
Martin Blom, Karlstad University, Sweden

Detecting Indirect Conflicts between Access Control Policies
Laura Costa Sarkis, Universidade Federal do Acre, Brazil
Viviane Torres da Silva, IBM Research, Brazil
Christiano Braga, Universidade Federal Fluminense, Brazil

Deriving UML-Based Specifications of Inter-Component Interactions from Runtime Tests
Thorsten Haendler, Vienna University of Economics and Business, Austria
Stefan Sobernig, Vienna University of Economics and Business, Austria
Mark Strembeck, Vienna University of Economics and Business, Austria

A Representation Structure for Software Process Tailoring based on BPMN High-Level Operations
Raquel M. Pillat, Federal University of Rio de Janeiro, Brazil
Toacy C. Oliveira, Federal University of Rio de Janeiro, Brazil

Student Research Competition Paper

Student Research Abstract: A Framework for Assisting Software Process Improvement Program in Global Software Development
Arif Ali Khan, City University of Hong Kong, Hong Kong

Student Research Abstract: Introspection of the Virtual Machines with System Calls Monitoring
Natalia Fursova, Novgorod State University, Russia

Student Research Abstract: Threshold Analysis of Design Metrics to Detect Design Flaws
Shahid Hussain, City University of Hong Kong, Hong Kong

Student Research Abstract: MDE as Service, Overview and Research Progress
Fábio Paulo Basso, Federal University of Rio de Janeiro, Brazil

Service-Oriented Architecture and Programming Track

Track Co-Chairs:
Maurice ter Beek, ISTI-CNR, Italy
Hernán Melgratti, University of Buenos Aires, Argentina
Hugo Torres Vieira, IMT Lucca, Italy

Track Editorial

Improving QoS Delivered by WS-BPEL Scenario Adaptation through Service Execution Parallelization
Dionisis Margaris, University of Athens, Greece
Costas Vassilakis, University of the Peloponnese, Greece
Panagiotis Georgiadis, University of Athens, Greece
QoS-Aware Adaptation for Complex Event Service .............................................................. 1597
Feng Gao, National University of Ireland, Galway, Ireland
Muhammad Intizar Ali, National University of Ireland, Galway, Ireland
Edward Curry, National University of Ireland, Galway, Ireland
Alessandra Mileo, National University of Ireland, Galway, Ireland

Service Functional Testing Automation with Intelligent Scheduling and Planning ................... 1605
Lom Messan Hillah, Université Paris Ouest, and Sorbonne Universités,
    UPMC Univ. Paris 06, CNRS, LIP6 UMR7606, France
Ariele-Paolo Maesano, Simple Engineering France, France
Libero Maesano, Simple Engineering France, France
Fabio De Rosa, Simple Engineering France, France
Fabrice Kordon, Sorbonne Universités, UPMC Univ. Paris 06, CNRS, LIP6 UMR7606, France
Pierre-Henri Wuillemin, Sorbonne Universités, UPMC Univ. Paris 06, CNRS, LIP6 UMR7606, France

JxActinium: A Runtime Manager for Secure REST-Ful CoAP Applications Working over JXTA .... 1611
Filippo Battaglia, University of Catania, Italy
Giancarlo Iannizzotto, University of Messina, Italy
Lucia Lo Bello, University of Catania, Italy

Software Verification and Testing Track
Track Co-Chairs: Mercedes G. Merayo, University Complutense of Madrid, Spain
    Gwen Salaün, Grenoble INP, France

Track Editorial ........................................................................................................................................ 1619

Dead Variable Analysis for Multi-Threaded Heap Manipulating Programs ............................. 1620
Pavel Jančík, Charles University in Prague, Czech Republic
Jan Kofroň, Charles University in Prague, Czech Republic

Predictive Runtime Enforcement ........................................................................................................ 1628
Srinivas Pinisetty, Aalto University, Finland
Viorel Preoteasa, Aalto University, Finland
Stavros Tripakis, Aalto University, University of California, Berkeley, Finland
Thierry Jéron, INRIA Rennes - Bretagne Atlantique, France
Yliès Falcone, Université Grenoble Alpes, France
Hervé Marchand, INRIA Rennes - Bretagne Atlantique, France

Time Optimal Reachability Analysis using Swarm Verification .............................................. 1634
Zhengkui Zhang, Aalborg University, Denmark
Brian Nielsen, Aalborg University, Denmark
Kim G. Larsen, Aalborg University, Denmark

Testing Access Control Policies against Intended Access Rights .............................................. 1641
Antonia Bertolino, CNR-ISTI, Italy
Said Daoudagh, CNR-ISTI, Italy
Francesca Lonetti, CNR-ISTI, Italy
Eda Marchetti, CNR-ISTI, Italy
Verifying CUDA Programs using SMT-Based Context-Bounded Model Checking ........................................ 1648
Phillipe Pereira, Federal University of Amazonas, Brazil
Higo Albuquerque, Federal University of Amazonas, Brazil
Hendrio Marques, Federal University of Amazonas, Brazil
Isabela Silva, Federal University of Amazonas, Brazil
Celso Carvalho, Federal University of Amazonas, Brazil
Lucas Cordeiro, Federal University of Amazonas, Brazil
Vanessa Santos, Federal University of Amazonas, Brazil
Ricardo Ferreira, Federal University of Viçosa, Brazil

Reducing Locating Sequences for Testing from Finite State Machines ......................................................... 1654
Guy Vincent Jourdan, University of Ottawa, Canada
Hasan Ural, University of Ottawa, Canada
Hüsnü Yenigün, Sabanci University, Turkey

Performance Testing Modeling: An Empirical Evaluation of DSL and UML-Based Approaches .......... 1660
Maicon Bernardino, Pontificia Catholic University of Rio Grande do Sul, Brazil
Elder M. Rodrigues, Pontificia Catholic University of Rio Grande do Sul, Brazil
Avelino F. Zorzo, Pontificia Catholic University of Rio Grande do Sul, Brazil

How Bit-Vector Logic Can Help Improve the Verification of LTL Specifications over Infinite Domains ... 1666
Luciano Baresi, Politecnic di Milano, Italy
Mohammad Mehdi Pourhashem Kallehbasti, Politecnico di Milano, Italy
Matteo Rossi, Politecnic di Milano, Italy

Termination Analysis of Floating-Point Programs using Parameterizable Rational Approximations .... 1674
Fonenantsoa Maurica, Université de La Réunion, France
Frédéric Mesnard, Université de La Réunion, France
Étienne Payet, Université de La Réunion, France

Some Classes of Finite State Machines with Polynomial Length of Distinguishing Test Cases .......... 1680
Hüsnü Yenigün, Sabanci University, Turkey
Nina Yevtushenko, Tomsk State University, Russia
Natalia Kushik, Tomsk State University, Russia

Session Types for Communicating Systems in Event-B .................................................................................. 1686
Carlos Olarte, Universidade Federal do Rio Grande do Norte, Brazil
Camilo Rueda, Pontificia Universidad Javeriana-Calí, Colombia

Invariant Generation for Linearizability Proofs ......................................................................................... 1694
Graeme Smith, The University of Queensland, Australia
John Derrick, University of Sheffield, UK

Formal Modeling and Analysis of RAMP Transaction Systems ................................................................. 1700
Si Liu, University of Illinois Urbana-Champaign, USA
Peter Csaba Ölveczky, University of Oslo, Norway
Muntasir Rahimn Rahman, University of Illinois Urbana-Champaign, USA
Jatin Ganhotra, University of Illinois Urbana-Champaign, USA
Indranil Gupta, University of Illinois Urbana-Champaign, USA
José Meseguer, University of Illinois Urbana-Champaign, USA
Student Research Competition Paper

Student Research Abstract: Towards a Combinatorial Approach for Undiscounted MDPs .......... 1708
Vahid Hashemi, Max Planck Institute for Informatics, Germany

Embedded Systems Track

Track Co-Chairs: Marco Di Natale, Scuola Superiore S. Anna, Italy
Li-Pin Chang, National Chia-O-Tung University, Taiwan

Balanced Loop Retiming to Effectively Architect STT-RAM-Based Hybrid Cache for VLIW Processors ................................................................. 1710
Keni Qiu, Capital Normal University, China
Weigong Zhang, Capital Normal University, China
Xiaoqiang Wu, Guangdong Electronics Industry Institute, China
Xiaoyan Zhu, Capital Normal University, China
Jing Wang, Capital Normal University, China
Yuanchao Xu, Capital Normal University, China
Chun Jason Xue, City University of Hong Kong, Hong Kong

Co-Cap: Energy-Efficient Cooperative CPU-GPU Frequency Capping for Mobile Games .......... 1717
Jurn-Gyu Park, University of California, Irvine, USA
Chen-Ying Hsieh, University of California, Irvine, USA
Nikil Dutt, University of California, Irvine, USA
Sung-Soo Lim, Kookmin University, South Korea

ARTE: Arduino Real-Time Extension for Programming Multitasking Applications .............. 1724
Pasquale Buonocunto, Scuola Superiore Sant'Anna, Italy
Alessandro Biondi, Scuola Superiore Sant'Anna, Italy
Marco Pagani, Scuola Superiore Sant'Anna, Italy
Mauro Marinoni, Scuola Superiore Sant'Anna, Italy
Giorgio Buttazzo, Scuola Superiore Sant'Anna, Italy

A Low Power STT-RAM based Register File for GPGPUs .................................................. 1732
Ehsan Atoofian, Lakehead University, Canada

Static Energy Efficient Cache Reconfiguration for Dynamic NUCA in Tiled CMPs ................. 1739
Shounak Chakraborty, Indian Institute of Technology Guwahati, India
Shirshendu Das, Indian Institute of Technology Guwahati, India
Hemangee K. Kapoor, Indian Institute of Technology Guwahati, India

Dynamic Associativity Enabled DNUCA to Improve Block Localisation in Tiled CMPs .......... 1745
Shirshendu Das, Indian Institute of Information Technology Guwahati, India
Hemangee K. Kapoor, Indian Institute of Technology Guwahati, India

Probabilistic Analysis of Bufferless Pipelines of Real-Time Tasks ............................................. 1751
Luca Abeni, University of Trento, Italy
Daniele Fontanelli, University of Trento, Italy
Luigi Palopoli, University of Trento, Italy
Bernardo Villaalba Frias, University of Trento, Italy
FIDE – An FMI Integrated Development Environment ................................................................. 1759
Fabio Cremona, University of California, Berkeley, and Scuola Superiore Sant'Anna, USA
Marten Lohstroh, University of California, Berkeley, USA
Stavros Tripakis, University of California, Berkeley, and Aalto University, USA
Christopher Brooks, University of California, Berkeley, USA
Edward A. Lee, University of California, Berkeley, USA

Poster Papers

Scheduling Algorithm Considering Response Time for Mixed Tasks on Multiprocessor Systems ...... 1767
Chin-Fu Kuo, National University of Kaohsiung, Taiwan
Yu-Hao Huang, National University of Kaohsiung, Taiwan
Yung-Feng Lu, National Taichung University of Science and Technology, Taiwan
Shih-Chun Chou, Institute for Information Industry, Taiwan

Combined Data Caching and Delayed Parity Update in RAID with SSD Cache .............................. 1771
Sophal Minh, University of Seoul, South Korea
Donghee Lee, University of Seoul, South Korea

Parity Management Scheme for a Hybrid-Storage RAID ................................................................. 1774
Jen-Wei Hsieh, National Taiwan University of Science and Technology, Taiwan
Che-Jen Su, National Taiwan University of Science and Technology, Taiwan

Safety Analysis Generation from Prototyping Models for Transportation Systems ......................... 1777
Jean Godot, FAAR Industry, France
Sebastien Saudrais, ESTACA’Lab, France
Adil Alif, FAAR Industry, France
Bertrand Barbedette, ESTACA’Lab, France
Cherif Larouci, ESTACA’Lab, France

Software for Embedded Systems: A Quality Assessment based on Improved ODC Taxonomy .......... 1780
Nuno Silva, University of Coimbra, Portugal
Marco Vieira, University of Coimbra, Portugal

Object Oriented Programming Languages and Systems Track

Track Co-Chairs: Davide Ancona, Universita` di Genova, Italy

Structured Gotos are (Slightly) Harmful ....................................................................................... 1784
Eli Sennesh, Technion, Israel
Yossi Gil, Technion, Israel

Embedding Goal-Directed Evaluation through Transformation ..................................................... 1790
Peter Mills, University of Idaho, USA
Clinton Jeffery, University of Idaho, USA

Optimizing Record Data Structures in Racket .............................................................................. 1798
Tobias Pape, University of Potsdam, Germany
Vasily Kirilichev, University of Potsdam, Germany
Robert Hirschfeld, University of Potsdam, Germany
From Atomic Variables to Data-Centric Concurrency Control .................................................. 1806
Hervé Paulino, NOVA University of Lisbon, Portugal
Daniel Parreira, NOVA University of Lisbon, Portugal
Nuno Delgado, NOVA University of Lisbon, Portugal
António Ravara, NOVA University of Lisbon, Portugal
Ana Matos, University of Lisbon, Portugal

Poster Papers

On the Criteria for Prioritizing Code Anomalies to Identify Architectural Problems .................. 1812
Santiago Vidal, ISISTAN-CONICET, Argentina
Everton Guimaraes, UNIFOR, Brazil
William Oizumi, Pontifical Catholic University of Rio de Janeiro, Brazil
Alessandro Garcia, Pontifical Catholic University of Rio de Janeiro, Brazil
Andrés Díaz Pace, ISISTAN-CONICET, Argentina
Claudia Marcos, ISISTAN-CIC, Argentina

Using Field Access Frequency to Optimize Layout of Objects in the JVM ................................. 1815
Taees Eimouri, University of New Brunswick, Canada
Kenneth B. Kent, University of New Brunswick, Canada
Aleksandar Micic, IBM, Canada
Karl Taylor, IBM, Canada

Initialize-and-Catch .................................................................................................................. 1819
Paola Giannini, Università del Piemonte, Italy
Marco Servetto, Victoria University of Wellington, New Zealand
Elena Zucca, Universita' di Genova, Italy

Operating Systems Track
Track Co-Chairs: Bongjae Kim, Korea Electronics Technology Institute, South Korea
George Hamer, South Dakota State University, United States

Track Editorial ......................................................................................................................... 1823

i-RAID: A Novel Redundant Storage Architecture for Improving Reliability,
Performance, and Life-Span of Solid-State Disk Systems ...................................................... 1824
Mingyang Wang, University of Cincinnati, USA
Yiming Hu, University of Cincinnati, USA

mmapcopy: Efficient Memory Footprint Reduction using Application Knowledge .................. 1832
Ingo Korb, Technical University of Dortmund, Germany
Helena Kotthaus, Technical University of Dortmund, Germany
Peter Marwedel, Technical University of Dortmund, Germany

OS-Level Virtualization for Industrial Automation Systems: Are We There Yet? .................... 1838
Alexandru Moga, ABB Corporate Research, Switzerland
Thanikesavan Sivanthi, ABB Corporate Research, Switzerland
Carsten Franke, ABB Corporate Research, Switzerland

Load-Aware Scheduling for Heterogeneous Multi-Core Systems ............................................. 1844
Mohannad Nabelsee, Technische Universität Berlin, Germany
Anselm Busse, Technische Universität Berlin, Germany
Helge Parzyjegla, Rostock University, Germany
Gero Mühl, Rostock University, Germany
Improving I/O Performance of NVMe SSD on Virtual Machines ............................................................ 1852
Jungkil Kim, Samsung Electronics Co., Ltd., South Korea
Sungyong Ahn, Samsung Electronics Co., Ltd., South Korea
Kwanghyun La, Samsung Electronics Co., Ltd., South Korea
Wooseok Chang, Samsung Electronics Co., Ltd., South Korea

Testing Device Drivers against Hardware Failures in Real Environments .................................................. 1858
Satoru Takekoshi, University of Tsukuba, Japan
Takahiro Shinagawa, The University of Tokyo, Japan
Kazuhiko Kato, University of Tsukuba, Japan

Collaborative Processing of Data-Intensive Algorithms with CPU, Intelligent SSD, and GPU .................. 1865
Yong-Yeon Jo, Hanyang University, South Korea
Sung-Woo Cho, Hanyang University, South Korea
Sang-Wook Kim, Hanyang University, South Korea
Hyunok Oh, Hanyang University, South Korea

Analysis of Micro-Architecture Resources Interference on Multicore NUMA Systems .................... 1871
Haecheon Kim, Dankook University, South Korea
Seungmin Lim, Dankook University, South Korea
Junkee Yoon, Dankook University, South Korea
Seungjae Baek, Dankook University, South Korea
Jongmoo Choi, Dankook University, South Korea
Seongje Cho, Dankook University, South Korea

Multicore CPU Reclaiming: Parallel or Sequential? ........................................................................... 1877
Luca Abeni, University of Trento, Italy
Giuseppe Lipari, University of Lille 1, France
Andrea Parri, Scuola Superiore Sant'Anna, Italy
Youcheng Sun, Scuola Superiore Sant'Anna, Italy

Plate: Persistent Memory Management for Nonvolatile Main Memory ............................................. 1885
Toshihiro Yamauchi, Okayama University, Japan
Yuta Yamamoto, Okayama University, Japan
Kengo Nagai, Okayama University, Japan
Tsukasa Matono, Kyushu University, Japan
Shinji Inamoto, Kyushu University, Japan

Jeonghwan Lee, Soongsil University, South Korea
Jiman Hong, Soongsil University, South Korea
Dongwan Shin, New Mexico Tech, USA
NKE – An Embedded Nanokernel for Educational Purpose ................................. 1900
Celso M. da Costa, State University of Rio Grande do Sul, Brazil
Cassio Brasil, State University of Rio Grande do Sul, Brazil
Leonardo L. Silva, State University of Rio Grande do Sul, Brazil
Lucas Murliky, State University of Rio Grande do Sul, Brazil
João Leonardo Fragoso, State University of Rio Grande do Sul, Brazil
Guilherme Debom, State University of Rio Grande do Sul, Brazil
Rivalino Matias Jr., Federal University of Uberlandia, Brazil
Aline Fracalossi, State University of Rio Grande do Sul, Brazil
Margrit Reni Krug, University of Vale do Rio dos Sinos, Brazil

Virtual Machine Halt ....................................................................................... 1903
Simão Reis, University of Aveiro, Portugal
André Zúquete, University of Aveiro, Portugal
José Vieira, University of Aveiro, Portugal

Practical Aspects of High-Level Parallel Programming Track
Track Co-Chairs: Frédéric Loulergue, Université d'Orléans, France

Transforming Javascript Event-Loop into a Pipeline ........................................ 1906
Etienne Brodu, Université de Lyon, France
Stéphane Frénot, Université de Lyon, France
Frédéric Oblé, Worldline, France

Distributed Graph Processing: An Approach based on Overlay Composition .......... 1912
Emanuele Carlini, ISTI-CNR, Italy
Patrizio Dazzi, ISTI-CNR, Italy
Alessandro Lulli, University of Pisa, Italy
Laura Ricci, University of Pisa, Italy

Poster Papers

Sharing Memory in Modern Distributed Applications ...................................... 1918
Claudio Scordino, Evidence Srl, Italy
Bruno Morelli, Evidence Srl, Italy

Derivation of Parallel-Efficient Structural Recursive Functions from Declarative Graph Queries .... 1922
Chong Li, National Institute of Informatics, Japan
Le-Duc Tung, SOKENDAI, Japan
Xiaodong Meng, Shanghai Jiao Tong University, China
Zhenjiang Hu, National Institute of Informatics, Japan

Programming Languages Track
Track Co-Chairs: Marjan Mernik, University of Maribor, Slovenia
Barrett Bryant, University of North Texas, United States

Track Editorial .................................................................................................... 1926

Using CSP for Coordinating Undo-Based Collaborative Applications ............... 1928
Asma Cherif, Umm al-Qura University, Saudi Arabia
Abdessamad Imine, Loria University, France
Integrating Lua into C for Embedding Lua Interpreters in a C Application ........................................ 1936
Akira Tanimura, The University of Electro-communications, Japan
Hideya Iwasaki, The University of Electro-communications, Japan

A Performant Scheme Interpreter in asm.js ............................................................................................ 1944
Noah Van Es, Vrije Universiteit Brussel, Belgium
Jens Nicolay, Vrije Universiteit Brussel, Belgium
Quentin Stievenart, Vrije Universiteit Brussel, Belgium
Theo D’Hondt, Vrije Universiteit Brussel, Belgium
Coen De Roover, Vrije Universiteit Brussel, Belgium

Stella: A Python-Based Domain-Specific Language for Simulations ....................................................... 1952
David Mohr, University of New Mexico, USA
Darko Stefanovic, University of New Mexico, USA

A Parsing Machine for Parsing Expression Grammars with Labeled Failures ...................................... 1960
Sérgio Medeiros, Federal University of Rio Grande do Norte, Brazil
Fabio Mascarenhas, Universidade Federal do Rio de Janeiro, Brazil

Wodel: A Domain-Specific Language for Model Mutation ....................................................................... 1968
Pablo Gómez-Abajo, Universidad Autónoma de Madrid, Spain
Esther Guerra, Universidad Autónoma de Madrid, Spain
Juan de Lara, Universidad Autónoma de Madrid, Spain

Integrating Regular Expressions and SNOBOL Patterns into String Scanning: A Unifying Approach .... 1974
Clinton Jeffery, University of Idaho, USA
Phillip Thomas, National Library of Medicine, USA
Sudarshan Gaikaiwari, Yelp, USA
John Goettsche, University of Idaho, USA

An Embedded Domain Specific Language for Distributed Memory Transactions in Java .................. 1980
Jeronimo da Cunha Ramos, Federal University of Pelotas, Brazil
André Rauber Du Bois, Federal University of Pelotas, Brazil
Mauricio Lima Pilla, Federal University of Pelotas, Brazil

An Object Model for a Dynamic Mixin based Language ........................................................................ 1986
Eden Burton, McMaster University, Canada
Emil Sekerinski, McMaster University, Canada

Poster Papers

Automated Adaptation via Quantitative Partial Model Checking ............................................................ 1993
Stefano Bistarelli, Università di Perugia, Italy
Francesco Santini, Università di Perugia, Italy
Fabio Martinelli, Institute of Informatics and Telematics of CNR, Italy
Ilaria Matteucci, Institute of Informatics and Telematics of CNR, Italy

Principles for Reuse in Formal Language Tools ...................................................................................... 1997
Luis Diogo Couto, Aarhus University, Denmark
Peter W.V. Tran-Jørgensen, Aarhus University, Denmark
Kenneth Lausdahl, Aarhus University, Denmark
Maintainability of Functional Reactive Programs in a Telecom Server Software ................................. 2001
Klervie Toczé, Ericsson AB, Sweden
Maria Vasilevskaaya, Linköping University, Sweden
Patrik Sandahl, Ericsson AB, Sweden
Simin Nadjm-Tehrani, Linköping University, Sweden

Futex based Locks for C11's Generic Atomics (Extended Abstract) ................................................. 2004
Jens Gustedt, INRIA, France

A DSL for Executable 'How To' Manuals .......................................................................................... 2007
Marcel Heinz, University of Koblenz-Landau, Germany
Philipp Helsper, University of Koblenz-Landau, Germany
Ralf Lämmel, University of Koblenz-Landau, Germany
Tobias M. Schmidt, University of Koblenz-Landau, Germany

Extensible Modules for JavaScript ................................................................................................... 2010
Florent Marchand de Kerchove, ASCOLA (Mines Nantes, Inria, LINA), France
Jacques Noyé, ASCOLA (Mines Nantes, Inria, LINA), France
Mario Südholt, ASCOLA (Mines Nantes, Inria, LINA), France

Reliable Software Technologies and Communication Middleware Track
Track Co-Chairs:  Marisol García-Valls, Universidad Carlos III de Madrid, Spain
                Aniruddha Gokhale, Vanderbilt University, United States
                Paolo Bellavista, Università di Bologna, Italy

Track Editorial ............................................................................................................................................... 2013

Scalable Monitoring and Dependable Job Scheduling Support for Multi-Domain Grid Infrastructures .... 2015
Marcello Cinque, Università di Napoli Federico II, Italy
Antonio Corradi, University of Bologna, Italy
Luca Foschini, University of Bologna, Italy
Flavio Frattini, Università di Napoli Federico II, Italy
Javier Povedano-Molina, Universidad de Granada, Spain

Exploiting User Feedback for Online Filtering in Event-Based Systems ............................................. 2021
Fabio Petroni, Sapienza University of Rome, Italy
Leonardo Querzoni, Sapienza University of Rome, Italy
Roberto Beraldi, Sapienza University of Rome, Italy
Mario Paolucci, Institute of Cognitive Sciences and Technologies, CNR, Italy

Poster Papers

Adjusting Middleware Knobs to Suit CPS Domains ............................................................................. 2027
Marisol Garcia-Valls, Universidad Carlos III de Madrid, Spain
Cristian Calva-Urrego, Universidad Carlos III de Madrid, Spain
Alejandro Alonso, Universidad Politécnica de Madrid, Spain
Juan A. de la Puente, Universidad Politécnica de Madrid, Spain
Computer Security Track
Track Co-Chairs: Giampaolo Bella, Università di Catania, Italy
Sergio Maffeis, Imperial College London, UK

---

Track Editorial ........................................................................................................................................... 2031

Slick: An Intrusion Detection System for Virtualized Storage Devices .................................................. 2033
Andrei Bacs, Vrije Universiteit Amsterdam, The Netherlands
Cristiano Giuffrida, Vrije Universiteit Amsterdam, The Netherlands
Bernhard Grill, Technische Universität Wien, Austria
Herbert Bos, Vrije Universiteit Amsterdam, The Netherlands

Implementing a Secure Abstract Machine .................................................................................................. 2041
Adriaan Larmuseau, Uppsala University, Sweden
Marco Patrignani, iMinds-Distrinet, KULeuven, Belgium
Dave Clarke, Uppsala University, Sweden

Enhancing Android Permission through Usage Control: A BYOD Use-Case ........................................... 2049
Fabio Martinelli, Institute of Informatics and Telematics of CNR, Italy
Paolo Mori, Institute of Informatics and Telematics of CNR, Italy
Andrea Saracino, Institute of Informatics and Telematics of CNR, Italy

Out-of-Band Discovery and Evaluation for Tor Hidden Services ............................................................. 2057
Kang Li, Chinese Academy of Sciences, China
Peipeng Liu, Chinese Academy of Sciences, China
Qingfeng Tan, Chinese Academy of Sciences, China
Jinqiao Shi, Chinese Academy of Sciences, China
Yue Gao, Chinese Academy of Sciences, China
Xuebin Wang, Chinese Academy of Sciences, China

Reading Between the Fields: Practical, Effective Intrusion Detection for Industrial Control Systems ...... 2063
Ömer Yüksel, Eindhoven University of Technology, The Netherlands
Jerry den Hartog, Eindhoven University of Technology, The Netherlands
Sandro Etalle, Eindhoven Univ. of Technology, Univ. of Twente, SecurityMatters BV, The Netherlands

Implementation-Level Analysis of the JavaScript Helios Voting Client .................................................. 2071
Michael Backes, Saarland University, Germany
Christian Hammer, Saarland University, Germany
David Pfaff, Saarland University, Germany
Malte Skoruppa, Saarland University, Germany

Accurate Spear Phishing Campaign Attribution and Early Detection ..................................................... 2079
Yufei Han, Symantec Research Labs, France
Yun Shen, Symantec Research Labs, Ireland

MalFlow: Identification of C&C Servers through Host-Based Data Flow Profiling .................................. 2087
Tobias Wüchner, Technische Universität München, Germany
Martin Ochoa, Singapore University of Technology and Design, Singapore
Mojdeh Golagha, Technische Universität München, Germany
Gaurav Srivastava, Technische Universität München, Germany
Thomas Schreck, Siemens CERT, Germany
Alexander Pretschner, Technische Universität München, Germany
An Automated Approach for Testing the Security of Web Applications against Chained Attacks
Alberto Calvi, Università degli Studi di Verona, Italy
Luca Viganò, King's College London, UK

Ensuring Endpoint Authenticity in WebRTC Peer-to-Peer Communication
Willem De Groef, iMinds-Distrinet, KU Leuven, Belgium
Deepak Subramanian, CentraleSupélec, France
Martin Johns, SAP SE, Germany
Frank Piessens, iMinds-Distrinet, KU Leuven, Belgium
Lieven Desmet, iMinds-Distrinet, KU Leuven, Belgium

Student Research Competition Paper

Student Research Abstract: A 3D-Cellular Automata based Pseudo-Random Number Generator
Rosemary Koikara, Kyungpook National University, South Korea

Smart Grid and Smart Technologies Track
Track Co-Chairs: Gail-Joon Ahn, Arizona State University, United States
Seong-Je Cho, Dankook University, South Korea
Dongwan Shin, New Mexico Tech, United States

Sensor Network based Solar Forecasting using a Local Vector Autoregressive Ridge Framework
Jin Xu, Stony Brook University, USA
Shinjae Yoo, Brookhaven National Lab, USA
John Heiser, Brookhaven National Lab, USA
Paul Kalb, Brookhaven National Lab, USA

Near Real-Time Electric Load Approximation in Low Voltage Cables of Smart Grids with Models@run.time
Thomas Hartmann, University of Luxembourg, Luxembourg
Assaad Moawad, University of Luxembourg, Luxembourg
Francois Fouquet, University of Luxembourg, Luxembourg
Yves Reckinger, Creos Luxembourg S.A., Luxembourg
Jacques Klein, University of Luxembourg, Luxembourg
Yves Le Traon, University of Luxembourg, Luxembourg

Tailor your Curves after your Costume: Supply-Following Demand in Smart Grids through the Adwords Problem
Giorgos Georgiadis, Chalmers University of Technology, Sweden
Iosif Salem, Chalmers University of Technology, Sweden
Marina Papatriantafilou, Chalmers University of Technology, Sweden

BayesForSG: A Bayesian Model for Forecasting Thermal Load in Smart Grids
Rohan Nanda, Luleå University of Technology, Sweden
Saguna Saguna, Luleå University of Technology, Sweden
Karan Mitra, Luleå University of Technology, Sweden
Christer Åhlund, Luleå University of Technology, Sweden

Poster Papers

Cascading Attacks against Smart Grid using Control Command Disaggregation and Services
Byungho Min, Macquarie University, Australia
Vijay Varadharajan, Macquarie University, Australia
Real-World User Flexibility of Energy Consumption: Two-Stage Generative Model Construction
Nasrin Sadeghianpourhamami, Ghent University - iMinds, Belgium
Matthias Strobbe, Ghent University - iMinds, Belgium
Chris Develder, Ghent University - iMinds, Belgium

Solving the Environmental Economic Dispatch Problem with Prohibited Operating Zones in Microgrids using NSGA-II and TOPSIS
Marco Cococcioni, University of Pisa, Italy
Beatrice Lazzerini, University of Pisa, Italy
Francesco Marcelloni, University of Pisa, Italy
Francesco Pistolesi, University of Pisa, Italy

Software Platforms Track
Track Co-Chairs: Jinman Jung, Hannam University, South Korea
Jun Huang, Chongqing University of Post & Telecommunications, China

Evaluation of Smart Scheduling Technologies: Static versus Dynamic Approaches
Shaza Hanif, Sharjah, UAE
Shahab ud Din, Higher Colleges of Technology, UAE

Experimental Approach: Two-Stage Spectrum Sensing using GNU Radio and USRP to Detect Primary User’s Signal
Yanxiao Zhao, South Dakota School of Mines and Technology, USA
Jems Pradhan, South Dakota School of Mines and Technology, USA
Guodong Wang, South Dakota School of Mines and Technology, USA
Jun Huang, South Dakota School of Mines and Technology, USA

Optimized Multilayer Perceptron using Dynamic Learning Rate based Microwave Tomography Breast Cancer Screening
Chulwoo Pack, South Dakota State University, USA
Sung Shin, South Dakota State University, USA
Hyung-do Choi, Radio Technology and Telecommunications Research, South Korea
Soon Ik Jeon, Radio Technology and Telecommunications Research, South Korea
John Kim, Utica College, USA

Poster Papers

Similarity Measurement with Combination of Mesh Distance Fourier Transform and Global Features in 2D Binary Image
Ravi Kasaudhan, South Dakota State University, USA
Sung Y. Shin, South Dakota State University, USA
Soon Ik Jeon, Telecommunications Research Institute, South Korea
Seong Ho Son, Telecommunications Research Institute, South Korea

An Efficient Hadoop Data Replication Method Design for Heterogeneous Clusters
Daeshin Park, Soongsil University, South Korea
Kiwook Kang, Soongsil University, South Korea
Jiman Hong, Soongsil University, South Korea
Yookun Cho, Seoul National University, South Korea
Delay-Based Scheduling to Enhance Fairness in a Virtual Machine Environment .......................... 2185
Donghee Min, Soongsil University, South Korea
Seonguk Lee, Soongsil University, South Korea
Gibeom Byeon, Soongsil University, South Korea
Jiman Hong, Soongsil University, South Korea

Trust, Reputation, Evidence and other Collaboration Know-How Track
Track Co-Chairs: Ronald Petrlic, Saarland University, Germany
Jean-Marc Seigneur, University of Geneva, Switzerland

Track Editorial .............................................................................................................................................. 2188

Defining Measurements for Analyzing Information Security Risk Reports in the
Telecommunications Sector ...................................................................................................................... 2189
Yves Le Bray, Luxembourg Institute of Science and Technology, Luxembourg
Nicolas Mayer, Luxembourg Institute of Science and Technology, Luxembourg
Jocelyn Aubert, Luxembourg Institute of Science and Technology, Luxembourg

Solving Sybil Attacks using Evolutionary Game Theory ................................................................. 2195
Farah Saab, American University of Beirut, Lebanon
Ayman Kayssi, American University of Beirut, Lebanon
Imad Elhajj, American University of Beirut, Lebanon
Ali Chehab, American University of Beirut, Lebanon

Feasibility Study of Context-Awareness Device Comfort Calculation Methods and their
Application to Comfort-Based Access Control ................................................................................. 2202
Jingjing Guo, Xidian University, China
Christian D. Jensen, Denmark Technical University, Denmark
Jianfeng Ma, Xidian University, China

The special track on the Computational Intelligence and Video & Image Analysis (CIVIA) is a forum for engineers, researchers and practitioners throughout the world to share technical ideas and experiences related to the implementation and applications of Computational Intelligence, to Video & Image Analysis, and even to Systems Biology & BioMedicine. Many conferences have been dedicated to Evolutionary Computing (ICEC, GECCO, PPSN, etc), Video & Image Analysis (ICIAR,ICIAP,ICASSP, IJCAI, etc) and Systems Biology & BioMedical Engineering (ICSB, RECOMB, BME, etc), but they don’t offer much on the blending of Computational Logic, Boolean Satisfiability and Soft Computing tools to address practical applications of Image Analysis and Bio Systems Modeling and Simulations. Thus, the research papers involved with applying computational intelligence techniques to video and image analyses would be welcome no matter how theoretical they are, should they have practical applications.

Totally, we have 24 submissions for the CIVIA track. To keep the acceptance rate less than 25% for the regular papers, we only accept 5 full papers. By the way, 2 poster papers are accepted for the poster section. In summary, including posters, we have 29% (7/24) acceptance rate for the CIVIA track.

The accepted oral or poster papers are involved in different subfields, including fingerprint matching, image analysis, graphical model, feature extraction, wavelet transform, information fusion, video similarity search and pattern recognition. These subfields are all related to the topics or themes of the CIVIA track.

Finally, we would like to thank all reviewers for their efforts in reviewing these papers. These reviewers consist of the program committee members and some professionals. Without their hard work, we could not complete this review process.

Special Track on Applications of Evolutionary Computation

Raúl Giráldez Rojo, Pablo de Olavide University, Spain
Beatriz Pontes Balanza, University of Seville, Spain

The “Applications of Evolutionary Computation” (EC) track aims at providing a forum for ideas, research, development activities, and particularly for applications generated by academics and practitioners in evolutionary computation and closely related areas.

The EC Track addresses techniques and applications of Genetic Algorithms, Evolution Strategies, Evolutionary Programming, Genetic Programming, Simulated Annealing, Ant Colony Optimization and other related techniques. Of particular interest are the applications of these techniques to computationally difficult combinatorial problems.

In response to the call for papers, 11 articles were submitted to the EC track for SAC 2016. All submissions were peer reviewed by at least three program committee members. The program committee selected three full articles and three poster papers for inclusion in the proceeding. The accepted papers covered a wide range of research topics and novel applications of Evolutionary Computation.

In their papers, Alberto Bartoli, Andrea De Lorenzo, Eric Medvet and Fabiano Tarlao have considered in their paper the long-standing problem of the automatic generation of regular expressions for text extraction, using state-of-the-art learner based on Genetic Programming. The presented framework is attractive because it is the system, not the user, which digs out the data in search of the samples most suitable to the specific learning task. Maha Elarbi, Slim Bechikh, Lamjed Ben Said and Chih-Cheng Hung propose a decomposition-based dominance relation called TSD-dominance (Targeted Search Directions based dominance) to deal with the so called many-objective optimization problems. The dominance relation creates a strict partial order on the set of Pareto-equivalent solutions using a set of well-distributed reference points. The TSD-dominance is used to substitute the Pareto dominance in NSGA-II. The resulting multiobjective evolutionary algorithm, called TSD-NSGA-II, provides competitive and better results when compared with three recently proposed decomposition-based algorithms on commonly used benchmark problems involving up to twenty objectives. Leo Sotto, Vinicius Melo and Marcio Basgalupp propose a variation of the LGP algorithm, and shows this proposal improves other state-of-art methods in solving the Ant Trail Problem. Starting with an LGP based only on effective macro and micro-mutations, their approach consists in extending the way in which the individuals are chosen for reproduction.

In their works accepted as posters, Jagadeesh Gunda, Sasa Djokic, Roberto Langella and Alfredo Testa analyse and compare conventional and meta-heuristic methods for security-constrained OPF studies, showing that meta-heuristic methods can be used when conventional methods fail to converge and/or to provide a global optimum solution. Rodrigo Barros, Márcio Basgalupp, Christian Quevedo and Henry Cagnini introduce Clus-EDA, an univariate estimation of distribution algorithm (EDA), to define cluster prototypes, combining the EDA approach with an efficient clustering internal validity criterion. A very simple and efficiente encoding is proposed to evolve through the solution space using the univariate probabilistic model.
The success of this year EC track is due to the hard work and effort of many people. We would like to thank the members of the conference organizing committee for their great support. We thank the members of the Program Committee for their timely evaluation of the submitted papers.

We hope that you enjoy attending the EC track and that you find in its sessions and proceeding a challenging resource for your present and future research work.

Special Track on Healthcare (HEALTH):
a growing scenario for applied computing

Cecilia Laschi, The BioRobotics Institute, Scuola Superiore Sant’Anna, Pisa, Italy
Arianna Menciassi, The BioRobotics Institute, Scuola Superiore Sant’Anna, Pisa, Italy

The widespread of smart computing devices and embedded systems, together with the advances in MEMS and wearable sensors, are opening up new scenarios for healthcare. Health can be monitored on the patient, as well as some forms of treatment can be administered and managed remotely from the clinical centers. These systems for wearable health monitoring and tele-healthcare are intended to improve the healthcare service, by improving the monitoring and treatment opportunities and reducing costs, at the same time. New challenges and opportunities thus emerge for applied computing, for processing the large amounts of personal data, for providing medical doctors with effective information, for increasing the person’s safety, for providing medical treatments at home. The aim of the ACM Symposium on Applied Computing (SAC) Track on HealthCare is to gather innovative work related to the application of computational techniques to healthcare, as well as systems for tele-health.

The track received a total of 32 submissions and the selection was very tough. A large number of reviewers were involved, who worked hard on the evaluations, to let us come up with 7 submissions accepted as papers, 1 poster, and 1 SCR. Many good submissions, therefore, regrettably could not be accepted for inclusion in the conference.

The healthcare scenarios offers a variety of challenges to applied computing and a variety of opportunities for application of new computing tools and methods. The papers accepted reflect such variety and span from patients’ monitoring to identify early signs of pathologies as well as the effects of therapy, to the assessment of eHealth tools themselves, to privacy and security issues in wearable medical devices, to haptic interaction in medical procedures, like needle insertion. The posters, too, reflect the variety of health applications for applied computing. They present intelligent systems like a game-based approach to monitor Parkinson’s disease motor symptoms, an EEG-based emotion recognition system, an ontology-driven adaptive system for patient treatment management, or a comparative study of methods for cardiovascular dysautonomias diagnosis, up to real-time computing techniques for molecular circuits. The SRC selected presents a web tool for medical topic modeling.

We feel deeply indebted to the reviewers who gave their valuable contribution, coping with the large number of submissions and with the time constraints. We wish to warmly thank them and let them know that their work has been greatly appreciated.
EDITORIAL MESSAGE

Special Track on Intelligent and Interactive Learning Environments (IILE)

Seiji Isotani, University of São Paulo, Brazil
Ig Ibert Bittencourt, Federal University of Alagoas, Brazil
Rüchiro Mizoguchi, Japan Advanced Institute of Science and Technology, Japan
Julita Vassileva, University of Saskatchewan, Canada

With the advent of powerful computing technologies, including the World Wide Web (WWW), computer-based learning environments have become more intelligent, flexible, mobile and ubiquitous. Computers, TVs, mobile phones, games, consoles, and other technologies can be transformed into smart learning environments with great potential to help students.

The expectation is that intelligent, interactive and innovative learning environments will eventually enable the realization of AAAL – Anytime, Anywhere, Anybody Learning, using most of the WWW resources and collecting inputs from the real world to create better and more personalized learning environments. Such expectation is consistent with that of the advancement of the WWW itself. Such trends facilitate the use of WWW content and resources as knowledge that can be interpreted by computers and learned by people. It is also expected that new technologies will emerge that will enable students with special needs and students in developing countries and rural areas to learn effectively even in the harshest of conditions, making the best use of teachers’ and students’ time and effort. To achieve AAAL there is a need to find ways to integrate major advances in artificial intelligence, computer vision, data mining, human-computer interaction and other sub-areas of Computer Science with advances in the Learning Sciences and Engineering in order to leverage the development of smart learning environments.

The aim of this track on intelligent, interactive and innovative learning environments is to bring together researchers and practitioners from academia, industry and schools to think together and share their visions of the next generation of educational technologies that will meet students’ needs in the 21st century. We are particularly interested in technological advances that can be applied to leverage current learning systems on architectural, technological and philosophical levels.

The topics of interest include, but are not limited to:

- Architectures and frameworks for intelligent learning environments
- Tools and languages to support learning design
- AI in Education (Data mining, distributed systems, intelligent authoring/tutoring systems, etc)
- (Social) Semantic Web technologies and linked data for education
- Intelligent tools for Computer-Supported Collaborative Learning
- User modeling, adaptation and personalization
- Mobile and ubiquitous computing for learning
- Games and Gamification in Education
- Intelligent/interactive learning environments applied to specific domains
- Culturally-aware systems
- MOOCs (Massive Open Online Course)

Special Track on Intelligent Robotics and Multi-Agent Systems

**Rui P. Rocha**, ISR – University of Coimbra, Portugal

**Christopher D. Kiekintveld**, University of Texas at El Paso, TX, USA

**M. Ani Hsieh**, Drexel University, PA, USA

Foreword

The special track on Intelligent Robotics and Multi-Agent Systems (IRMAS) focuses on all aspects of intelligent robotics and multi-agent systems (MAS) including related areas and applications. Its primary goal is to exploit synergies between robotics and artificial intelligence (AI), more precisely between intelligent robotics and MAS, and bring together researchers from both fields. For many years, robotics and AI researchers have worked separately, both fields have matured enormously, and today there is a growing interest in getting the two research fields together. Many in robotics believe that the focus in the near future should be adding capabilities to robots that lie at the core of AI research. Reciprocally, AI researchers aim at embedding their techniques in physical robots that can perceive, reason and act in real, dynamic environments.

We invited papers to address the research topics covered by this track through a call for papers distributed in worldwide mailing lists on robotics and AI and in private mailing lists of the Programme Committee (PC) members. The accepted papers cover important topics of this track, both on intelligent robotics and MAS. In this second edition, there were 21 papers submitted from Europe (10), South America (6), USA (2), Middle East (1), Africa (1), and Oceania (1). After a rigorous blind peer review process by 77 PC members, 5 regular papers and 3 poster papers were accepted for the conference, resulting in an overall acceptance rate of 38%.

Acknowledgment

Many people contributed to the success of this track. First of all, we would like to thank to all members of the international PC for their efforts in attracting quality papers and in providing thoughtful reviews on time. The PC members are listed here in alphabetical order:

Alberto Ruiz - University of Murcia, Spain
Alessandro Farinelli - University of Verona, Italy
Alexandre Bernardino - IST, Portugal
Ali Marjovi - EPFL, Switzerland
Amanda Prorok - Univ. of Pennsylvania, USA
Andreas Birk - Jacobs University, Germany
Armando Sousa - University of Porto, Portugal
Arunesh Sinha - Univ. Southern California, USA
Atil Iscen - Google Inc, USA
Bogdan Raducanu - Univ. Aut. Barcelona, Spain
Charles Pippin - Georgia Tech, USA

Christophe Grand - French Aerospace Lab, France
Daniele Nardi – Univ. di Roma La Sapienza, Italy
Danilo Tardioli - University of Zaragoza, Spain
David Portugal - Citard Services Ltd, Cyprus
Denis Wolf - University of São Paulo, Brazil
Dylan A. Shell - Texas A&M University, USA
Edson Prestes – Fed. Univ. Rio Grande Sul, Brazil
Fernando Cheein - Un. Técn. Fed. St. María, Chile
Fernando Rebollo – Un. Carlos III Madrid, Spain
Frans Oliehoek - Univ. Amsterdam, Netherlands
Gabriel Oliver - Universitat Illes Balears, Spain
Hadi Ali Akbarpour - Univ. Missouri-Colu., USA
Itsuki Noda - AIST, Japan
Javier Alonso Mora - MIT, USA
Javier Bajo - Univ. Politecnica Madrid, Spain
Jesús Capitán - University of Seville, Spain
Jim Boerkoel - Harvey Mudd College, USA
Jnaneshwar Das - Univ. of Pennsylvania, USA
João Sequeira - IST, Portugal
Jun Okamoto Jr. - University of São Paulo, Brazil
Jun Ota - University of Tokyo, Japan
Kagan Tuner - Oregon State University, USA
Kay Römer - Graz Univ. Technology, Austria
Kurt Geihs - Kassel University, Germany
Lantao Liu - Univ. Southern California, USA
Lorenzo Sabattini - Univ. Modena R. Emilia, Italy
Lucia Pallottino - University of Pisa, Italy
Luís Correia - University of Lisbon, Portugal
Luís Mejias - Queensland Univ. Techn., Australia
Luís Merino - Pablo de Olavide University, Spain
Luiz Chaimowicz - Fed. Un. Minas Gerais, Brazil
Luiz Mirisola - Tech. Institute Aeronautics, Brazil
Manuel Silva - Polytechnic of Porto, Portugal
Matthew Brown - Univ. South. California, USA
Matthew E. Taylor - Washington St. Univ., USA
Mauro Dragone - Univ. College Dublin, Ireland
Micael S. Couceiro - Univ. of Coimbra, Portugal
Mohan Sridharan - Univ. Auckland, New Zealand
Nicola Basilico - University of Milan, Italy
Nicola Gatti - Politecnico di Milano, Italy
Nina Mahmoudian - Michigan Tech Univ., USA
Noa Agmon - Bar Ilan University, Israel
Nora Ayanian - Univ. Southern California, USA
Nuno Lau - University of Aveiro, Portugal
Paolo Stegagno - Max Planck Institute, Germany
P.B. Sujit - Indraprastha Inst. Inform. Techn., India
Pedro Núñez - University of Extremadura, Spain
Pratap R. Tokekar - Virginia Tech Univ., USA
Rachid Alami - LAAS/CNRS, France
Robert Krug - Örebro University, Sweden
Sandip Sen - University of Tulsa, USA
Serge Stinckwich - UPMC, France
Sérgio Monteiro - University of Minho, Portugal
Shaojie Shen - Hong Kong Un. Sc.&Tech., China
Shih-Fen Cheng - Singapore Man. Un., Singapore
Spring Berman - Arizona State University, USA
Subhrajit Bhattacharya - Univ. Pennsylvania, USA
Thomas Hellström - Umeå University, Sweden
Timothy H. Chung - Naval Postgr. School, USA
Tomas Krajnik - University of Lincoln, UK
Valdir Grassi Jr. - University of São Paulo, Brazil
Yen-Chen Liu – Nat. Cheng Kung Univ., Taiwan
Yu Zhang - Arizona State University, USA
Yue Wang - Clemson University, USA
We also want to thank all the authors who contributed to the SAC 2016 IRMAS track. Finally, we offer special thanks to the SAC 2016 Organizing Committee and the ACM SIGAPP.

About the Track Chairs

Rui P. Rocha is an assistant professor in the Department of Electrical and Computer Engineering and a senior researcher in the AP4ISR team of ISR at the University of Coimbra, Portugal. His main research interests are cooperative multirobot systems, human-robot cooperation, distributed control, and autonomous robots.

Christopher D. Kiekintveld is an assistant professor in computer science at the University of Texas at El Paso, TX, USA. His main research area is multi-agent systems and he has been especially interested in how to predict and react to the behavior of other intelligent agents in both cooperative and adversarial settings.

M. Ani Hsieh is an associate professor in the Mechanical Engineering and Mechanics Department and the Director of the Robotics Program at Drexel University. Her current research work focuses on bridging the gap between statistical physics, nonlinear dynamics and control, and distributed multi-agent robotic systems.

Special Track on NeuroComputing & Deep Learning and Continuos-Time Computing (NC&DLCC)

Cecilia Laschi, The BioRobotics Institute, Scuola Superiore Sant’Anna, Italy
Egidio Falotico, The BioRobotics Institute, Scuola Superiore Sant’Anna, Italy
Marc-Oliver Gewaltig, École Polytechnique Fédérale de Lausanne, Switzerland
Florian Röhrbein, Technical University of Munich, Germany
Paul Levi, Research Center for Information Technology, Germany
Stefan Ulbrich, Research Center for Information Technology, Germany
Davide Zambrano, Centrum Wiskunde & Informatica, the Netherlands
Sander Bohte, Centrum Wiskunde & Informatica, the Netherlands

Introduction

The development of computational models of the nervous system and neural processes has risen at a rapid pace. Developing neuro-inspired computing paradigms that mimic nervous system function fosters our model understanding of the biological system and targets technical applications in artificial systems. Nowadays, combined efforts in the fields of the neuroscience and computer science in interdisciplinary research projects like the Human Brain Project enable the simulation of biological spiking neural networks with millions of neurons.

Deep Learning in artificial neural networks represents a remarkable step toward this direction. Current state-of-the-art AI in the form of deep neural networks has recently demonstrated breakthrough performance in various AI-cognitive tasks, from image and speech recognition to natural language generation and playing ATARI games. In order to deal with the complexity and scaling of such networks, a new generation of appropriate tool is needed to simulate the neural network in real-time. This track presents innovative works related to the application of computational techniques for the brain simulation, as well as neural modelling and brain-based learning paradigms to address the hard challenges of replicating features of the human intelligence.
Statistics

The NC&DLCC track received 9 regular paper submissions whose 2 have been accepted as full-length paper, 2 as posters, 3 have been rejected and 2 have been withdrawn. The acceptance rate is 28.5% for full-length paper; it grows to 57.1% considering also posters.

The NC&DLCC track received also 2 SRC submissions (only 1 has been accepted).

Paper Description

The accepted papers focus on different aspects of the proposed track topics. The first paper presents the relationship between neuronal activation patterns of specific brain areas resulting from sensorial experiences. This work shows several factors affecting neuronal activations. In this context, authors analyzed the levels of similarity between neuronal activation patterns using a semisupervised method and data acquired from microelectrode arrays implanted on specific brain areas of rats, during an experiment of tactile exploration of four classes of physical objects in the dark. The analysis allows to make further steps in neuronal coding of brain signals.

The second paper demonstrates how deep Spiking Neural Networks (SNNs) can be trained to be more efficient with respect to standard deep Artificial Neural Networks (ANNs). According to the authors, in SNN efficiency can be improved either by reducing the number of spikes or by increasing the speed of classification, both with a fixed level of accuracy (98%). The authors trained a deep ANN with Rectified Linear Units (ReLUs) on the MNIST benchmark, and then they converted it in a SNN with Integrate-and-Fire units. Several algorithms have been applied – and compared – to improve efficiency. Results demonstrate that in most of the cases SNNs performs equally compared to ANNs, but with few operations and less latency (time from input presentation).

The papers accepted as posters are related to other important aspects of neural computing. Two of them focus on detection and estimation of impairments and brain lesion applied to magnetic resonance brain images. The other work accepted as poster intends to extend usual discrete event system specifications to parallel simulations and pseudorandom number generators in the context of a spiking neural network.

Acknowledgment

The track chairs would like to thank all the reviewers for their valuable contribution in the revision of the submissions.
EDITORIAL MESSAGE

Special Track on Cloud Computing

S.D Madhu Kumar, NIT Calicut, India
Priya Chandran, NIT Calicut, India
Fernando De La Prieta, University of Salamanca, Spain

Cloud Computing continues to remain the computing paradigm of the decade. Cloud computing has already proved its potential in meeting the challenges of increased data storage and processing demands of compute intensive and data intensive applications. The leading companies in the IT sector have already chosen clouds as their platform for offering their services. The academia has also shown keen interest in this hot area with an abundance of funded research projects at the leading universities across the globe.

This track on Cloud Computing, organized for the sixth time at ACM SAC, had been started with the intention of providing a forum for presenting research on various aspects of cloud computing. This year the main focus of the track was on Recent developments in Cloud Services, Application and Platforms, Infrastructure, Security and Privacy in clouds. The response to the track was overwhelming. We received high quality papers from more than 24 countries spanning six continents, contributing a total of 51 submissions. The review process was very competitive with each paper receiving at least three reviews, and finally 13 full papers and five poster papers were selected for the track, bringing the acceptance rate to 25.5% for full papers.

The selected papers deal with a wide variety of cloud computing issues including those listed below:

1. Hadoop Energy Consumption Reduction with Hybrid HDFS
2. A Certification Framework for Cloud-based Services
3. Elastic Provisioning for Cloud Databases with Uncertainty Management
5. Monitoring of Cloud Computing Environments
6. Media Workflows on Advanced Cloud Object Store Platforms
7. Securing Integration of Cloud Services in Cross-Domain Distributed Environments
8. Providing Elasticity Based on Autonomic Computing
9. Shortest Remaining Time First Policy in Shared Hadoop Clusters
10. Scalable and Manageable Customization of Workflows in Multi-Tenant SaaS Offerings
11. Network Configuration as a Service in SDN-Driven Cloud Architectures

We thank all the authors who submitted valuable papers to this track. We are grateful to the members of the Program Committee and to the additional reviewers. Without their support, the organization of the track’s sessions would not have been possible. We also express our gratitude to organizations that made this track happen, namely the ACM Special Interest Group on Applied Computing (SIGAPP), National Institute of Technology Calicut, India and University of Salamanca, Spain. We are grateful to the Symposium Program Chairs for their help in all aspects of the organization of this track.

We are certain that issues pertaining to cloud computing offer rich opportunities for research and this track on Cloud Computing will continue to be a success in future editions of ACM SAC.

Special Track on Dependable and Adaptive Distributed Systems

Karl M. Goeschka, UAS Technikum Vienna, Austria
Rui Oliveira, Universidade do Minho, Portugal
Peter Pietzuch, Imperial College London, United Kingdom
Giovanni Russello, University of Auckland, New Zealand

Introduction

While computing is provided by the cloud and services increasingly pervade our daily lives, dependability is no longer restricted to mission or safety critical applications, but rather becomes a cornerstone of the information society. Unfortunately, heterogeneous, large-scale, and dynamic software systems that typically run continuously, often tend to become inert, brittle, and vulnerable after a while. The key problem is that the most innovative systems and applications are the ones that also suffer most from a significant decrease in dependability when compared to traditional critical systems, where dependability and security are fairly well understood as complementary concepts and a variety of proven methods and techniques is available today. In accordance with Laprie we call this effect the dependability gap, which is widened in front of us between demand and supply of dependability, and we can see this trend further fueled by the demand for resource awareness (including green computing) and increasing cost pressure.

Among technical factors of dependability, software development methods, tools, and techniques contribute to dependability, as defects in software products and services may lead to failure and also provide typical access for malicious attacks. In addition, there is a wide variety of fault tolerance techniques available, including persistence provided by databases, replication, group communication, transaction monitors, reliable middleware, cloud infrastructures, and trustworthy service-oriented architectures with explicit control of quality of service properties. Furthermore, adaptiveness is envisaged in order to react to observed, or act upon expected changes of the system itself, the context/environment (e.g., resource variability or failure/threat scenarios) or users’ needs and expectations. Provided without explicit user intervention, this is also termed autonomous behavior or self-properties, and often involves monitoring, diagnosis (analysis, interpretation), and reconfiguration (repair). In particular, adaptation is also a means to achieve dependability in a computing infrastructure with dynamically varying structure and properties.

Statistics

This year, we received 20 submissions, from which 5 could be accepted after being reviewed by five to seven members of the program committee. The resulting acceptance rate is 25%.

Acknowledgements

We would like to thank our program committee members for their support, their timely reviews and the numerous suggestions for improvements of particular papers.
Overview of the Sessions and Papers

The DADS track provides a forum for scientists and engineers in academia and industry for their latest research findings on selected topics in dependable and adaptive distributed systems. In particular, the following papers comprise this track:

1. **Stretching Multi-Ring Paxos**  
   *Samuel Benz, Leandro Pacheco de Sousa and Fernando Pedone*

2. **Dynamic Adaptation of Geo-Replicated CRDTs**  
   *Carlos Bartolomeu, Manuel Bravo and Luis Rodrigues*

3. **NATCloud: Cloud-Assisted NAT-Traversal Service**  
   *Hanna Kavalionak, Amir H. Payberah, Alberto Montresor and Jim Dowling*

4. **Planning the Transformation of Overlays**  
   *Young Yoon, Nathan Robinson, Vinod Muthusamy, Sheila McIlraith and Hans-Arno Jacobsen*

5. **Monitoring Service Level Workload and Adapting Highly Available Applications**  
   *Mehran Khan, Ferhat Khendek and Maria Toeroe*

In addition, four posters have been accepted:

6. **An Adaptive Multi-Criteria Ranking of Security Countermeasures**  
   *Nicola Nostro, Ilaria Matteucci, Francesco Santini, Andrea Ceccarelli, Felicita Di Giandomenico, Fabio Martinelli and Andrea Bondavalli*

7. **Virtualization Technologies for the Big Data Environment**  
   *Aymen JLASSI and Patrick MARTINEAU*

8. **Analysis of Checkpointing Overhead in Parallel State Machine Replication**  
   *Odorico Mendizabal, Fernando Dotti and Fernando Pedone*

   *Valmir Barbosa, Alan Carneiro, Fabio Protti and Uevertton Souza*

Special Track on Networking (NET)

Mário M. Freire, University of Beira Interior, Portugal
Marília Curado, University of Coimbra, Portugal
Manuela Pereira, University of Beira Interior, Portugal
Teresa Vazão, INESC ID/IST, University of Lisboa, Portugal

On behalf of the Program Committee of the Track on Networking of the 31st Annual ACM Symposium on Applied Computing (ACM SAC 2016), it is our great pleasure to welcome you to the ACM SAC 2016, held from April 4 to April 8, 2016, in Pisa, Italy. In recent years, significant advances in computer networks, applications and services have been made throughout the world. This track aims to be a forum for scientists, engineers and practitioners, in academia and industry, to share new ideas, experiences and results, and to present their latest findings in different aspects of computer networking.

In response to the call for papers, a total of 18 submissions were received, from which five were carefully selected for oral presentation in a technical session and one was selected as short paper for poster presentation. Each paper was peer reviewed, through a double-blind process, by at least three members of the Program Committee or additional reviewers. The set of papers accepted for this track covers a variety of research topics, which are of current interest, such as cloud datacenter networks, software defined networks, opportunistic networks and online social networks.

We thank all the authors who submitted valuable papers to this track. We are grateful to the members of the Program Committee and to the additional reviewers. Without their support, the organization of such high-quality track session would not have been possible. We are also indebted to many individuals and organizations that made this track happen, namely ACM Special Interest Group on Applied Computing (SIGAPP), University of Pisa (Italy), Microsoft Research, University of Beira Interior (Portugal), University of Coimbra (Portugal) and University of Lisboa (Portugal). Last but not least, we are grateful to the members of the Organizing Committee for their help in all aspects of the organization of this track.

We hope that you enjoy the ACM Symposium on Applied Computing and, in particular, the Track on Networking, in Pisa, Italy, if you attend it and that you find it a useful forum for the exchange of ideas, results and recent findings.

Special Track on Selected Area of Wireless Communications and Networking (WCN)

Dongkyun Kim, Kyungpook National University, Republic of Korea.
Wei Wang, San Diego State University, California, USA.

Introduction:
Research on Wireless communications and networking has reformed our daily lives in multiple ways. The need of communicating anytime, anywhere brought us many new wireless and networking technologies, including cellular networks (3G/4G/5G), ad-hoc networks, sensor networks, WiMAX, etc. The invention of these technologies has created a new paradigm of research and developments. In particular, the past decade has seen a significant surge of research activities in wireless communications and networking. While a number of their applications and services have been introduced, the demands for new applications still exist, requiring technical challenges. Accordingly, a great number of individuals, researchers, academics are searching for new novel ideas and improving the performance of existing techniques/methodologies proposed for wireless communications and networking. This special track aims to bring together researchers, academics, individuals working on selected areas of wireless communications and networking to share their new ideas, latest findings and results.

Track Statistics:
The WCN track, started in 2014, is reaching its 3rd edition this year. This edition has confirmed the interest of both researchers and practitioners in the track topics. 36 paper submissions were received from countries as diverse as Algeria, Belgium, Brazil, Italy, Japan, New Zealand, Portugal, South Korea, Spain, United Kingdom, Pakistan, and the USA. Submitted papers were reviewed by a Program Committee of 51 members, granting 3 extensive reviews per submission on average. The WCN track keeps high quality and it is evident from its acceptance ratio, 8 of the submitted papers have been accepted as full papers (acceptance rate: 22%) whereas 4 of them have been accepted as posters.

Description of Accepted Papers:
This year, we received papers of very interesting wireless communication topics varying from wireless cloud infrastructure and applications, vehicle communications, performance evaluation, indoor localization, low power low latency medium access control to security issues. Also, new emerging fields are also introduced in this track such as Software Defined Networks and Information Centric Networks.

Acknowledgement:
First of all, the track chairs thank all the authors and researchers, who submitted their valuable work in this track. Many congrats to those authors who got their work accepted this year. The track chairs would like to thank the TPC and reviewers for handling review of the papers in this track. This track would not be successful without the diligent contribution and high quality and timely reviews from the reviewers and the TPC.
EDITORIAL MESSAGE

Special Track on Web Technologies

Angelo Di Iorio, University of Bologna, Italy
Cristian Mateos, UNICEN University, Argentina
Davide Rossi, University of Bologna, Italy

Undoubtedly, the World Wide Web is relentlessly changing. The advent of HTML 5.0, the increasing importance of AJAX and client-side scripting, the inception of Web-accessible APIs and services, the huge popularity of mobile devices, the explosion of Web-based Social Networks as well as the advent of the Federated Social Web, and the new frontiers of Semantic Web are only some examples of this general trend.

Web applications are progressively evolving into rich and flexible environments where users not only can perform individual activities such as easily access documents, publish content, listen to music, watch videos, draw pictures, and play directly via browser, but also interact/collaborate between each other. Nowadays, this class of ubiquitous software systems seem to be here to stay. Then, novel approaches and techniques, new tools and frameworks are needed to address the inherent complexity of these applications.

The Web Technologies track aims at tracking this continuous evolution by bringing together researchers and practitioners, from industry and academia, working on practical and foundational aspects of Web technologies, as well as other technologies that in the Web have found new and unexpected application fields.

The Web Technologies track, started in 2007, reaches this year its 10th edition. This edition has confirmed the interest of both researchers and practitioners in the track topics. 30 paper submissions have been received from countries as diverse as Brazil, Estonia, Finland, France, Germany, India, Italy, Japan, the Netherlands, Portugal, Republic of Korea, Sweden, United Arab Emirates, United Kingdom, and the USA. Submitted papers have been reviewed by a Program Committee of 37 members, granting at least 3 extensive reviews per submission; 8 of the submitted papers have been accepted as full papers (for an acceptance rate of about 27%) whereas 4 have been accepted as posters.

In the opinion of the track chairs, these numbers together with the quality of the submissions, mark a success for the 10th edition of the ACM SAC track on Web Technologies. The quality of the contributions presented in this proceeding is surely due to the talent and inspiration of our authors - to whom we would like to extend our thanks for their interest in the track - but also to the hard work of the members of the program committee that we would hereby like to thank as well:

Laercio Baldochi — Universidade Federal de Itajubá, Brazil
Gioele Barabucci — Università di Bologna, Italy
Marco Brambilla — Politecnico di Milano, Italy
Hwan-Gue Cho — Pusan National University, South Korea
Chin-Wan Chung — Korea Advanced Institute of Science and Technology, South Korea
Marco Crasso — IBM Research, Argentina
Flávia Delicato — UFRN, Brazil
Enrico Francesconi — ITTIG - CNR, Italy
Flavio Frasincar — Erasmus University Rotterdam, the Netherlands
Martin Gaedke — Chemnitz University of Technology, Germany
Martin Garriga — Universidad Nacional del Comahue, Argentina
Daniela Godoy — ISISTAN Research Institute - CONICET, Argentina
Celso Hirata — Instituto Tecnologico de Aeronautica, Brazil
Irena Holubova (Mlynkova) — Charles University, Czech Republic
Jerónimo Irazábal — IBM & Universidad Nacional de la Plata, Argentina
Yuh-Jzer Joung — National Taiwan University, Taiwan
Sang-Wook Kim — Hanyang University, South Korea
In-Young Ko — Korea Advanced Institute of Science and Technology, South Korea
Chin-Laung Lei — Department of Electrical Engineering, National Taiwan University, Taiwan
Tim A. Majchrzak — University of Münster, Germany
Tommi Mikkonen — Tampere University of Technology, Finland
Tatsuo Nakajima — Department of Computer Science, Waseda University, Japan
Okubo Shinjuku-ku, Tokyo, Japan
Amedeo Napoli — LORIA, France
Andrea Nuzzolese — STLab - CNR, Italy
Silvio Peroni — Università di Bologna, Italy
Maria da Graça Pimentel — Universidade de Sao Paulo, Brazil
Paulo Pires — Universidade Federal do Rio Grande do Norte, Brazil
Francesco Poggi — Università di Bologna, Italy
Taniro Rodrigues — UFRN, Brazil
Stéphane Sire — Oppidoc, France
Florian Skopik — AIT Austrian Institute of Technology, Austria
Olga Streibel — Freie Universität Berlin, Germany
Cesar Teixeira — Universidade Federal de São Carlos, Brazil
Manolis Tzagarakis — University of Patras, Greece
Fabio Vitali — Università di Bologna, Italy
Guandong Xu — University of Technology Sydney, Australia
Alejandro Zunino — ISISTAN Research Institute - CONICET, Argentina

Special thanks also go to the ACM SAC 2016 Conference Chairs and Program Chairs for their support and guidance.

Angelo Di Iorio
Cristian Mateos
Davide Rossi
The world nowadays revolves around dealing with data presented in various formats. So it is inevitable that researchers focus on advancing the state of managing information. From here, the importance of database technology ranks amongst the hottest areas of research, taking into account the consistent need for faster query processing as well as for managing huge amounts of data. This year the track has received many papers covering different areas of databases.

A total of 25 papers were submitted to the Database Theory, Technology, and Applications track. The track received papers from many countries – from Asia, Australia, Europe, North America, and South America – making this track a forum to share technical ideas and experiences relating to implementation and application of database theory and technology and to exchange ideas among international researchers in the area of database systems. Each paper was sent out to at least three reviewers. The selection process was more difficult this year, because the acceptance ratio for regular papers was 28%. More specifically, among the 25 submitted papers only 7 papers have been selected as regular papers. In addition, 1 paper has been selected for presentation in the poster session.

The selected papers cover a wide range of topics including: multi-way join processing over data streams, queries over web services, XML data management, query languages, similarity query processing in software repositories.

We would like to take this opportunity to thank the colleagues who worked very hard to make ACM SAC 2016 possible. Our special thanks go to all the authors and referees who all contributed to the success of DTTA track. We look forward to your participation and cooperation in the upcoming ACM SAC 2017.

Special Track on Information Access and Retrieval

Gloria Bordogna, Consiglio Nazionale delle Ricerche – CNR IREA
Gabriella Pasi, Università degli Studi di Milano Bicocca – DISCo

The special Track on Information Access and Retrieval (IAR) was first organized within the ACM International Symposium on Applied Computing in 2002, to the main aim of allowing researchers and practitioners in the IR field to present their experiences in the middle of the theory-practice spectrum of Information Retrieval and Information Filtering, where many successful applications lie.

Information Retrieval and Information Filtering are not easy tasks as testified by the huge research literature published on scientific journals and in international conferences since many decades.

Especially with the diffusion of the Web and Search Engines, Information Retrieval and Information Filtering tasks need to cope with several issues related to the widespread and pervasive diffusion of huge amounts of heterogeneous user generated contents of distinct nature and format (videos, images, maps, audio, texts), of distinct genre and topics (geographic information, products’ and organizations’ descriptions, scientific research documentations, news, messages in social networks, etc.), and from heterogeneous sources (universities, governmental institutions, private companies, and individuals). Moreover, the importance of taking into account the intentions, aims and characteristics of both the authors and the users searching for information brings to considering the context in which the search is carried out. The multiple dimensions of both the documents and the searcher should be modeled and taken into account for designing effective systems for information access, so as to be able to compute a multi-dimensional relevance exploiting several indicators and properties, such as topicality, location, trust, reputation, freshness, etc., all contributing to define the relevance of documents to personal information needs.

Nowadays, the research concerned with defining effective systems for information access spans over several hot topics, such as text mining, user modelling, personalized topic detection and tracking, geographic information retrieval and sharing, knowledge discovery and mining, etc. Information access technologies, and in particular IR, are currently being used in many different application contexts that go far beyond the initial scope of their design.

This year the special track is in its fifteen edition in the context of SAC, and it includes 9 full papers (with an acceptance rate of 25%), five poster papers, and one SRC paper. Each paper was peer reviewed by at least 3 members of the Program Committee. Our gratitude goes to the members of the Program Committee (listed in these proceedings): their help has been invaluable help carrying out a high quality selection process.

The papers cover different topics. Two of them address the issue of IR systems’ evaluation: the paper titled “Feeling Lucky? Multi-armed Bandits for Ordering Judgements in Pooling-based Evaluation” authored by David E. Losada, Javier Parapar and Alvaro Barreiro tackles the problem of forming a pool of relevant judgements by casting document judgements as a multi-armed bandit problem, while the paper “How do Users Handle Inconsistent Information? The Effect of Search Expertise” authored by Kazutoshi Umemoto, Takehiro Yamamoto and Katsumi Tanaka investigates how inconsistent answers impact
search behavior of users in presence or absence of search expertise, and it provides indications for designing more effective systems by making users aware of the existence of inconsistent answers.

The paper titled “Direct Measurement of Training Query Quality for Learning to Rank” authored by Qingli Ma, Ben He and Jungang Xu deals with the problem of learning to rank by modeling the query quality.

The paper “Proximity Relevance Model for Query Expansion” authored by Liana Ermakova, Josiane Mothe and Elena Nikitina proposes a method query expansion in the framework of language models by capturing the proximity in terms of sentences rather than tokens.

The paper titled “Modeling Clicks using Document Popularity” authored by Xenophon Evangelopoulos and Christos Makris presents a novel click model based on a Bayesian network for estimating document relevance from click-through data.

The paper “Modeling Trust and Distrust Information in Recommender Systems via Joint Matrix Factorization with Signed Graphs” authored by Dimitrios Rafailidis defines a recommendation algorithm by incorporating the users' trust and distrust social relationships to compute the clusters of similar users using a spectral clustering approach for signed graphs.

The paper titled “Aggregating Semantic Information Nuggets for Answering Clinical Queries” authored by Eya Znaidi, Lynda Tamine and Chiraz Latiri faces the application of IR techniques for answering clinical queries formulated within the Evidence Based Medicine framework.

Another application paper is the one titled “IT Atlas (Region Name Omitted): A Practical Application of Expert Search Techniques” authored by Daniel Blank, Sebastian Boosz and Andreas Henrich; in this paper expert search techniques are applied to provide a search engine of companies (instead of documents) on the Web in order to create an Atlas of IT companies.

Finally, the paper titled “SPARQL Extensions with Preferences: a Survey” authored by Olivier Pivert, Olfa Slama and Virginie Thion provides a survey of proposals made in the Semantic Web context to query RDF databases in a flexible way by allowing the expression of preferences.

Special Track on Social Network and Media Analysis (SONAMA)

Sang-Wook Kim, Hanyang University, Korea

With the advent of social network services such as Twitter, Facebook, Tumbler, and Google+, the research on social network and media analysis has been greatly advanced. In recent years, the interactions among people, sharing of knowledge and experiences, community activities in social network services increase greatly, which would make the research on social networks more important. Furthermore, as social media contents within social network services are rapidly being produced and consumed, the social media contents now account for the majority of content published on the world wide web. Social media is differentiated from traditional media in many aspects such as its frequency, quality, usability, immediacy, and permanence, which leads to significant potential to the social media analysis research.

The ACM SAC has been an important venue for the past 30 years, attracting computer scientists, computer engineers, software engineers, and application developers from around the world. The Social Network and Media Analysis (SONAMA) track of ACM SAC will provide a forum that brings together researchers and practitioners for exploring technologies, issues, experiences, and applications with a specific focus on the recent research trends and industrial needs in the related fields. Since social network and media analysis encompasses a variety of highly cross-disciplinary research issues, the SONAMA will foster collaborations and exchange of ideas and experiences among researchers working in various fields such as computer science, linguistics, statistics, sociology, geography, economics, and business.

This year, the third of the SONAMA track, we received a total of 49 submissions of high-quality papers from all over the world. The review process was very competitive with each paper receiving at least three reviews. We accepted 12 papers for oral presentations and 6 papers for poster presentations. We would like to thank all the authors who submitted their inspiring contributions to our track. Also, we sincerely appreciate our program committee members listed below who devoted their invaluable time and efforts for reviewing the submissions. Without their help, our track program could not be made so successful. Finally, we would like to give special thanks to program co-chairs Maria Lencastre and Jiman Hong for their nice guidance and support. We look forward to seeing all of you in Pisa, Italy.

Special Track on Enterprise Application Development and Design

Tomas Cerny, Czech Technical University in Prague, Czech Republic
Karel Cemus, Czech Technical University in Prague, Czech Republic

Introduction:

The objective of EADD track is to provide researchers and software architects the opportunity to present their observations, experiences and research in the area of production-level enterprise applications. The aim of integrate academic research and industry level research, introduce the best practices, state of the art and mostly production level experience impacting the development, design, maintenance, scalability and other software quality attributes.

Statistics:

Accepted papers 3/14
Accepted Posters 2/14
Acceptance rate 21%

Descriptions:

Accepted papers and posters are in the theme of metamodeling/metaprogramming, code transformation, generative approaches, security consideration in enterprise application design, and security of third party components. Furthermore, there are works on decision making, social process monitoring, application component decomposition, or SSD drive involvement in enterprise application design.

Acknowledgment:

We like to acknowledge all track committees and reviewers. Thank you very much for your hard work.

Special Track on Multicore Software Engineering, Performance, Applications, and Tools (MUSEPAT)

Tomáš Vojnar, FIT, Brno University of Technology, Czech Republic

MUSEPAT has grown out of the successful series of IWMSE and PADTAD workshops and merges these two communities into a single and broader forum. In 2013, it was organized as a standalone conference; in 2015, it appeared as a SAC technical track for the first time.

The MUSEPAT track of SAC’16 addresses development challenges in multicore parallel systems. It brings together software engineering researchers, applied computer scientists, computer engineers and application developers. Multicore challenges covered at MUSEPAT include specification, design, programming models, programming techniques, testing, analysis, debugging and applications. The conference track addresses parallelism in a broad range of contexts: manycore CPUs and GPUs, clusters, distributed systems, mobile devices, client-servers and desktops.

The topics of interest of MUSEPAT cover the following areas:

- Software engineering for multicore (CPU or GPU) and heterogeneous systems.
- Specification and modeling of multicore systems.
- Programming models, languages, compiler techniques and development tools for multicore.
- Parallel and distributed testing and debugging including noise-based testing, cloud testing.
- Evolving sequential software to leverage multicore and manycore hardware.
- Performance and optimization of multicore software.
- Domain- and platform-specific multicore software issues (e.g., issues in scientific computing).
- Construction and validation challenges of specific modeling paradigm such as mapReduce and openMP.

MUSEPAT 2016 has attracted 20 submissions. Each of them was reviewed by at least three reviewers. After the reviews and a quite lively discussion, 5 submissions were accepted as full papers and 2 submissions appear in the form of posters.

The program committee of MUSEPAT 2016 consisted of the following researchers:

- Jeremy S. Bradbury, University of Ontario Institute of Technology, Canada
- Ricardo J. Dias, Universidade Nova de Lisboa, Portugal
- Eitan Farchi, IBM Haifa Research Laboratory, Israel
- Klaus Havelund, NASA Jet Propulsion Laboratory, USA
- Jiri Jaros, Brno University of Technology, Czech Republic
- Jörg Keller, University of Hagen, Germany
- Jeff Lei, University of Texas at Arlington, USA
- João Lourenço, Universidade Nova de Lisboa, Portugal
- Raymond Namyst, LaBRI, University of Bordeaux, France
- Shiva Nejati, University of Luxembourg, Luxembourg
- John Owens, University of California, Davis, USA
- Victor Pankratius, MIT, USA
Apart from the PC members, a number of external reviewers has also participated on the reviews. I would like to thank all of them very much for their hard work.

Further, special thanks go to the steering committee of MUSEPAT, consisting of J.S. Bradbury (who also maintained the web page of MUSEPAT), E. Farchi, and J. Lourenco, for their continuous support in the organization of MUSEPAT 2016.

Special Track on
Software Architecture: Theory, Technology, and Applications (SA-TTA)

Diego Perez-Palacin, DEIB, Politecnico di Milano, Italy
Patrizia Scandurra, DIGIP, University of Bergamo, Italy

Introduction
It is our great pleasure to welcome you to the Fourth Edition of the track Software Architecture: Theory, Technology, and Applications (SA-TTA 2016) as part of the 31st ACM/SIGAPP Symposium on Applied Computing (SAC).

The goal of the track SA-TTA is to bring together researchers, practitioners and educators having the common objective of transforming Software Architecture into a mature discipline leveraging on both solid scientific foundations and validated engineering methodologies and tools. The main focus of SA-TTA is in Applied Software Architecture, namely a special emphasis is put on practical engineering concerns, experiences in tools development, and software architecture case studies. SA-TTA is focused broadly on how to address functional requirements and quality characteristics in the design, maintenance, and adaptation and evolution of software architectures through the support of automated techniques and tools. Of special interest are architecture description languages, formalisms, techniques, methodologies, tools, and runtime environments that support these activities, possibly exploiting model-driven engineering principles. A special emphasis is put also on technical aspects of software architectures development for specific class of software systems and application domains.

We are confident that you will find the program stimulating and that it will provide you with many new ideas and insights. Welcome to city of Pisa, and many thanks for your participation!

Statistics
The call for papers attracted research paper submissions from Europe, Brazil, Africa, and USA. Totally, we had 24 high quality papers. According to a strict acceptance rate of 25%, the program committee accepted 6 full research papers and 5 contributions as posters.

Description of accepted papers
Altogether there are interdisciplinary research contributions covering a variety of topics related to: software architectures deployment management, feature integration into Product Line architectures, architectures for multimedia systems, modeling adaptive software architectures, development of architectures for Wireless Sensor Networks and software architecture recovery.

Acknowledgments
We thank all authors who wrote articles for this track helping us to make it a success. We also thank the program committee members and all reviewers for their evaluations and critiques of manuscripts:
Program committee members:

- Yamine Ait-Ameur - IRIT/ENSEEIHT, France
- Oliver Barais - INRIA, France
- Antonia Bertolino - Italian National Research Council CNR, Italy
- Georg Buchgeher - SCCH GmbH Hagenberg, Austria
- Rafael Capilla - Rey Juan Carlos University, Madrid, Spain
- Ivica Crnkovic - MDU, Sweden
- Giovanna Dimarzo Sereguendo - CUI Université Genève, Carouge Switzerland
- Naranker Dulay - Imperial College London, UK
- Sam Guinea - Politecnico di Milano, Italy
- Kenneth Johnson - Auckland University of Technology, New Zealand
- Rick Kazman - ITM, University of Hawaii, United States
- Eva Kühn - Vienna University of Technology, Austria
- Chan-gun Lee - Chung-Ang University, Korea
- Jihyun Lee - Daejeon University, Korea
- Marin Litoiu - York University, Canada
- Antonia Lopes - University of Lisbon, Portugal
- Hernan Melgratti - University of Buenos Aires, Argentina
- José Javier Merseguer - University of Saragoza, Spain
- Henry Muccini - University of L'Aquila, Italy
- Ileana Ober - IRIT/University of Toulouse
- Flavio Oquendo - IRISA, University of South Brittany, France
- Hongyu Pei-Breivold - ABB Corporate Research, Västerås, Svezia
- Pasqualina Potena - FBK ICT DAS, University of Trento, Italy
- Elvinia Riccobene - University of Milan, Italy
- Ella Roubstova - Open Universiteit Nederland
- Antonino Sabetta - SAP Research, France
- Lionel Seinturier - Univ. Lille & IUF - LIFL & Inria ADAM
- Romina Spalazzese - Malmö University, Sweden
- Maria Spichkova - RMIT University, Melbourne, AUSTRALIA
- Shuai Wang - Simula Labs, OSLO, Norway
- Danny Weyns - University of Linnaeus, Sweden
- Liming Zhu - National ICT Australia

Additional reviewers:

- Roxana Holom
- Thomas Hamboeck
- Vesna Sesum-Cavic
- Matthias Schwayer
- Milena Guessi
- Everton Cavalcante
- Christian Roldan
- Lucas Oliveira
A special track on Software Engineering (SE Track) aims to be a forum for scientists, engineers and practitioners, in academia and industry to share new ideas, experiences and results, and to present their latest findings in any aspects of Software Engineering. SE Track emphasizes the design, implementation, management and applications of Software Engineering.

The Call for Papers for SE Track attracted 100 final paper submissions from 30 different countries. The submitted papers underwent the blind review process and 25 papers were finally accepted as full papers for inclusion in the Conference Proceedings and presentation during the Symposium. The final acceptance rate for SE Track is 25%. In addition to the accepted full papers, 12 papers that received high enough review scores were accepted as short papers for the Poster Program. The Student Research Competition (SRC) program is designed to provide graduate students the opportunity to meet and exchange ideas with researchers and practitioners. Finally 4 papers were accepted for the SRC program in SE Track.

This year SE Track is divided into five sessions: related presentations in Software Process, Design Patterns, Metrics and Measurement, Maintenance, Open-Source Projects, V&V, Testing, Formal Methods, Quality, and Software Product Lines will be associated to one session, so as to promote sharing and discussion of ideas through the whole audience of a topic. Please check the program schedule for details.

On behalf of the entire SAC 2016 Organizing Committee, we congratulate all the authors for having their papers accepted in the SE Track. We are grateful to the members of the Program Committee and to the additional reviewers. Without their support, the organization of such high-quality track sessions would not be possible. We also wish to convey our special thanks to the SAC 2016 symposium’s main organizers, especially Program Chairs, Jiman Hong and Maria Lencastre, for their continuous help and advice and Publication Chair, John Kim, and Poster Chair, Chih-Cheng Hung, for their invaluable support.

Last but not least, we thank you for attending the conference on behalf of the Software Engineering Track and hope that you enjoy the program we have prepared for you.
EDITORIAL MESSAGE

Special Track on Service-Oriented Architectures and Programming (SOAP)

Maurice H. ter Beek, ISTI-CNR, Pisa, Italy
Hernán Melgratti, University of Buenos Aires, Argentina
Hugo Torres Vieira, IMT Lucca, Italy

The SOAP track aims at bringing together researchers and practitioners having the common objective of transforming Service-Oriented Programming (SOP) into a mature discipline with both solid scientific foundations and mature software engineering development methodologies supported by dedicated tools. From the foundational point of view, many attempts to use formal methods for specification and verification in this setting have been made. Session correlation, service types, contract theories, and communication patterns are only a few examples of the aspects that have been investigated. Moreover, several formal models based upon automata, Petri nets and algebraic approaches have been developed. However, most of these approaches concentrate only on a few features of service-oriented systems in isolation, and a comprehensive approach is still lacking.

From the engineering point of view, there are open issues at many levels. Among others, at the system design level, both traditional approaches based on UML and approaches taking inspiration from Business Process Modelling, e.g. BPMN, are used. At the composition level, orchestration and choreography are continuously being improved both formally and practically, with an evident need for their integration in the development process. At the description and discovery level, there are two separate communities pushing respectively the semantic approach (like ontologies and OWL) and the syntactic one (like WSDL). In particular, the role of discovery engines and protocols is not clear. In this respect, adopted standards are still missing. UDDI looked to be a good candidate, but it is no longer pushed by the main corporations, and its wide adoption seems difficult. Furthermore, a recent implementation platform, the so-called REST services, is emerging and competing with classic Web Services. Finally, features like Quality of Service, security, and dependability need to be taken seriously into account.

SOAP in particular encouraged submissions on what SOP still needs in order to achieve the above goals.

The PC of SOAP 2016 was formed by:

- Farhad Arbab Leiden University and CWI, Amsterdam, NL
- Luís Barbosa University of Minho, Braga, PT
- Massimo Bartoletti Università di Cagliari, IT
- Maurice H. ter Beek ISTI-CNR, Pisa, IT (co-chair)
- Marcello M. Bersani Politecnico di Milano, IT
- Laura Bocchi University of Kent, UK
- Roberto Bruni Università di Pisa, IT
- Marco Carbone IT University of Copenhagen, DK
- Romain Demangeon Université Pierre et Marie Curie, FR
- Schahram Dustdar Vienna University of Technology, AT
- Alessandra Gorla IMDEA Software Institute, Madrid, ES
SOAP 2016 received a total of 16 submissions. Each submission was reviewed by at least 4 PC members, the vast majority even by 5 PC members. All papers were subject to an animated general discussion among the PC members (with over 100 posts in the message boards). In the end, the PC decided to select only the following four papers for an oral presentation at the conference (an acceptance rate of 25%):

- JxActinium: a runtime manager for secure REST-ful COAP applications working over JXTA by Filippo Battaglia, Giancarlo Iannizzotto, and Lucia Lo Bello
- Improving QoS Delivered by WS-BPEL Scenario Adaptation through Service Execution Parallelization by Dionisis Margaris, Costas Vassilakis, and Panagiotis Georgiadis
- QoS-aware Adaptation for Complex Event Service by Feng Gao, Muhammad Ali, Edward Curry, and Alessandra Mileo
- Service functional testing automation with intelligent scheduling and planning by Lom Messan Hillah, Arielle-Paolo Maesano, Libero Maesano, Fabio De Rosa, Fabrice Kordon, and Pierre-Henri Wuillemin

We would like to thank the PC members, and a few external reviewers, for their detailed reports and the stimulating discussions during the reviewing phase; the authors of submitted papers, the session chairs and the attendees, for contributing to the success of the event; the providers of the START system, which was used to manage the submissions; and in particular all the organizers of SAC 2016, for their invitation to organize this track and for all their excellent assistance and support.
The Software Verification and Testing track aims at contributing to the challenge of improving the usability of formal methods in software engineering. The track covers areas such as formal methods for verification and testing, based on theorem proving, model checking, static analysis, and run-time verification.

We received 56 submissions. After a careful reviewing process, the Programme Committee accepted 13 regular papers. Therefore, the acceptance rate of the conference stayed close to 23%.

Several people contributed to the success of SVT 2016. We would like to thank the Programme Committee, and the additional reviewers, for their work on selecting the papers. Finally, we would like to thank all of you, who, as authors and participants, are helping us to assure the quality of this excellent event. We hope you will find the track’s programme useful, interesting and challenging.
EDITORIAL MESSAGE

Special Track on Operating Systems (OS)

Bongjae Kim, Korea Electronics Technology Institute, Korea
George Hamer, South Dakota State University, USA

The purpose of Operating Systems track is to bring together researchers, designers, and developers who are interested in methodologies for the design and analysis of operating systems and/or applications that are highly adaptive to user needs. In recent years, we have noticed a tremendous growth on the demands for highly-efficient operating systems in various fields. At the same time, adaptive applications have also become more and more complex, and it imposes new challenging issues never faced before in this application field. It is thus clear that nowadays the development and design of operating systems must rely, even more than in the recent past, on specific solutions both in the hardware and in the software components. Moreover, the needs to timely tackle changes in the market pushes toward the employment of methodologies to shorten the development time and to drive the evolution of existing products. The solutions to new problems emerging in this setting call for a joint effort from the academics and industry.

The designs of high-performance operating systems and adaptive applications must take into account a wide variety of constraints: Performance, code size, real-time performance, maintainability, energy efficiency, and scalability. This track provides a forum for the presentation of high-quality, original research covering all aspects of operating systems and adaptive applications design, analysis, implementation, evaluation, and case-studies. Solutions might be proposed at different levels of abstractions, making use of an assortment of tools and methodologies. Researchers and practitioners would have a chance to propose new ideas and to compare experimentations. The focus of this track is on the application of both novel and well-known techniques to the operating systems and adaptive applications development.

In this year, a total of 39 submissions were received around the world. Each paper was reviewed by more than 3 blind reviewers and provided careful and thoughtful reviews on which the selection process was based. The reviewing process was done by the technical program committee and additional reviewers. Over the 39 submissions, 10 papers were accepted as full papers, and 4 papers were accepted as poster papers after a rigorous reviewing process. Many excellent papers could not be accepted because of the conference policy in this year.

We would like to thank all of the authors who contributed to the ACM SAC 2016 OS Track. We also like to thank all of the reviewers for their hard and on-time work. Finally, we give special thanks to the SAC organizing committee, who believes in the potential of the OS Track, as well as to the ACM SIGAPP.
EDITORIAL MESSAGE

Special Track on Programming Languages

Marjan Mernik, University of Maribor, Slovenia
Barrett R. Bryant, University of North Texas, USA

1. Objectives of the track

The Programming Languages (PL) Track provides researchers and practitioners with a forum to present their ideas and experience in designing new programming concepts and implementing programming languages. It includes the topics of Compiling Techniques, Domain-Specific Languages, Formal Semantics and Syntax, Garbage Collection, Language Design and Implementation, Languages for Modeling, Model-Driven Development and Model Transformation, New Programming Language Ideas and Concepts, New Programming Paradigms, Practical Experiences with Programming Languages, Program Analysis and Verification, Program Generation and Transformation, Programming Languages from All Paradigms (Agent-Oriented, Aspect-Oriented, Functional, Logic, Object-Oriented, etc.), and Visual Programming Languages.

2. Statistical information

This year the track was expanded to include papers from the Coordination Models, Languages and Applications Track, chaired by Francesco Tiezzi (University of Camerino, Italy) and Mirko Viroli (University of Bologna, Italy). For the combined track, thirty-eight papers were originally submitted from eighteen different countries: Belgium, Brazil, Canada, Czech Republic, Denmark, Finland, France, Germany, Italy, Japan, Kuwait, Portugal, Saudi Arabia, Slovenia, Spain, Sweden, Tunisia, and the United States. Among those, nine regular papers were selected for an acceptance rate of 23.7% as well as six posters. The combined Track Program Committee had 52 members: Vasco Amaral (Universidade Nova de Lisboa, Portugal), Farhad Arbab (CWI, Netherlands), Jacob Beal (BBN, USA), Roberto da Silva Bigonha (Universidade Federal de Minas Gerais, Brazil), Olivier Boissier (EMSE, France), Walter Cazzola (University of Milan, Italy), Ferruccio Damiani (University of Turin, Italy), Igor Dejanović (University of Novi Sad, Serbia), Wolfgang De Meuter (Vrije Universiteit Brussel, Belgium), Rocco De Nicola (Institute for Advanced Studies Lucca, Italy), Giovanna Dimarzo Serugendo (University of Geneva, Switzerland), Tom Dinkelaker (Ericsson, Germany), Schahram Dustdar (Technical University of Vienna, Austria), Johan Fabry (University of Chile, Chile), Jose Luis Fernandez-Marquez (CSIC, Spain), José Fiadeiro (Royal Holloway University of London, UK), Sebastian Guenter (Senacor Technologies AG, Germany), Pedro Henriques (University of Minho, Portugal), Nigel Horspool (University of Victoria, Canada), Zoltán Horváth (Eötvös Loránd University, Hungary), Raymond Hu (Imperial College London, UK), Hiroshi Inoue (IBM Research, Japan), Jan Janousek (Czech Technical University, Czech Republic), Christine Julien (University of Texas, USA), Geylani Kardas (Ege University, Turkey), Eva Kühn (Technical University of Vienna, Austria), Hung La (Rutgers University, USA), Hans-Wolfgang Loidl (Heriot-Watt University, UK), Michele Loreti (University of Florence, Italy), Emanuela Merelli (University of Camerino, Italy), Marino Miculan (University of Udine, Italy), Flemming Nielsen (Technical University of Denmark, Denmark), Andrea Omicini (University of Bologna, Italy), Manuel Oriol (ABB Corporate Research, Switzerland), Nikolaos Papaspyrou (National Technical University of Athens, Greece), Marco Patrignani (University of Leuven, Belgium), Peter Pirkelbauer (University of Alabama at Birmingham, USA), Enrico Pontelli (New Mexico State University, USA), António Porto (University of Porto, Portugal), Rosario Pugliese (University of Florence, Italy), Antonio Ravara (Università Nova de Lisboa, Portugal), Alessandro Ricci (University of Bologna, Italy), Vladimir Safonov (St. Petersburg University, Russia), Ulrik Pagh Schultz (University of Southern Denmark, Denmark), Marjan Sirjani (Reykjavik University, Iceland), Boštjan Slivnik (University of Ljubljana, Slovenia), Yasuyuki Tahara (National Institute of
3. The contributed papers

Special Track on Reliable Software Technologies and Communication Middleware (RST)

Marisol García-Valls, Universidad Carlos III de Madrid, Spain
Aniruddha Gokhale, Vanderbilt University, USA
Paolo Bellavista, Università di Bologna, Italy

The world of high-end distributed/parallel systems and applications is, in general, paying increasing attention to the problems related to quality of service, determination of temporal behavior and response of the proposed software platform solutions, interactivity, and performance of the communication layer. Emergent highly complex domains such as cyber-physical systems and smart environments/homes/cities require the availability of reliable software infrastructures that are able to support their inherent timing requirements; in these solutions the role of middleware is a key and central one.

In addition, future solutions will be particularly challenging when dealing with large-scale open deployment environments and their associated scalability issues. Novel and relevant application domains push for evolution and disruptive research; only to mention a few, middleware solutions for datacenter resource management optimization for quality-aware online stream processing of big data flows, energy-aware middleware for resource management in smart city/smart grid deployment environments, and middleware for cloud-hosted cyber-physical systems with strict requirements on latency and reliability.

With this idea in mind, the ACM SAC Track on Reliable Software Technologies and Communication Middleware (RST) focuses on the design of distributed reliable systems that must take into account the selection and evaluation of interaction models, software technology choices, temporal requirements, resource efficiency, performance, scalability, and coordination. RST 2016 is the first edition of a desired sustained effort to attract researchers, practitioners, designers, and developers of distributed software systems that have special requirements of reliability and time-sensitivity. The main topics of the papers submitted to this edition of RST have dealt with: reliable and time-sensitive distribution models; performance of distributed applications; cloud computing advances for cyber-physical systems and mobile cloud computing; middleware for the efficient integration of cyber-physical systems and the cloud; reactive stream processing and on-line processing of big data flows; efficient integration with the run-time support, e.g., operating system and virtualization technology; quality of service aware middleware for data center resource management; interaction models such as publish/subscribe or event-based; programming models and languages; efficient and context-aware server-side management of smart city data; and scalability in city-wide deployment scenarios.

In its first edition, RST track has attracted ten high-quality submissions. From this number, two full papers and one poster paper have been accepted. The acceptance rate for the track has been 20% for full papers, which is generally lower than the overall SAC acceptance rate. More specifically about the received submissions and accepted papers, all the received manuscripts covered at least three of the topics mentioned in the call for papers, being well centered on the themes of greatest interest for our specific venue (no out-of-scope submission). Based on the acceptance results, we have decided to organize the RST track into a single session with two full papers and one poster paper (with a shorter presentation time slot). The first full paper, titled “Exploiting User Feedback for Online Filtering in Event-based
Systems”, by Fabio Petroni, Leonardo Querzoni, Roberto Beraldi, and Mario Paolucci addresses the open technical challenge of automatically filtering the data injected in event-based systems based on monitored user feedback; the aim is to be able to efficiently deliver to consumers only content they are actually interested in, by run-time filtering that exploits continuous profiling of both producers and consumers, and then profile matching with the newly generated data in the examined event stream. The second full paper “Scalable Monitoring and Dependable Job Scheduling Support for Multi-domain Grid Infrastructures” by Marcello Cinque, Antonio Corradi, Luca Foschini, Flavio Frattini, and Javier Povedano-Molina, instead, focuses on grid management and in particular proposes a completely distributed and highly efficient management infrastructure for the dissemination of monitoring data and troubleshooting of job execution failures in large-scale and multi-domain Grid environments; the paper also provides significant contributions in reporting experimental results of the original proposal when challenged in a real deployment and when compared with other Grid management systems in the literature. Finally, “Adjusting middleware knobs to suit CPS domains” by Marisol García-Valls, Cristian Calva Urrego, Alejandro Alonso, and Juan A. de la Puente is the accepted poster paper and describes an original software platform that employs middleware technology as the communication backbone to support dynamic and timely execution of distributed processes, being based over a predictable layer with guaranteed quality of service.

A programme committee of twenty seven members has been put together with outstanding top quality researchers in the related areas, who have provided high quality feedback to authors to improve their contributions. We are most grateful to each and every member of the programme committee of RST for their kind support, timely reviews, and gentle collaboration to start RST track within SAC.

We do hope that this track will be of considerable interest to the ACM SAC audience, highlighting the potential of reliable software technologies and communication middleware under different perspectives, technical viewpoints, and applicability angulations. We believe that this small set of accepted papers can anyway provide the interested readers with a fresh sample of some open and relevant technical challenges in the field, of general importance and of wide applicability. Enjoy your reading!

And, most important, welcome to ACM SAC, to our RST Track, and to an enjoyable and fruitful conference event held this year in the beautiful Pisa.

Marisol García-Valls, Aniruddha Gokhale, and Paolo Bellavista

RST Track Chairs, ACM SAC 2016
As chairs of the Computer Security track, we are pleased to welcome you to its fifteenth edition at the ACM Symposium on Applied Computing. The Program Committee for this track, as in past years, is composed of eminent representatives from both industry and academia, and this year is yet longer than before in order to cope with the submission rate and corresponding review load. Here is the list of members of this year's committee, in alphabetical order:

- Karthikeyan Bhargavan (INRIA, France)
- Denis Butin (TU Darmstadt, Germany)
- Cormac Callanan (Aconite Internet Solutions, Ireland)
- Lorenzo Cavallaro (Royal Holloway University of London, UK)
- Nicholas Carlini (University of California, Berkeley, USA)
- Véronique Cortier (CNRS, Loria, France)
- Philippe De Ryck (KU Leuven, Belgium)
- Lieven Desmet (KU Leuven, Belgium)
- Adam Doupé (Arizona State University, USA)
- Dario Fiore (IMDEA Software Institute, Spain)
- Flavio Garcia (University of Birmingham, UK)
- Rosario Giustolisi (SICS Swedish ICT)
- Dieter Gollmann (TU Hamburg, Germany)
- Pekka Jappinen (Lappeenranta University of Technology, Finland)
- Limin Jia (Carnegie Mellon University, USA)
- Martin Johns (SAP Research, Germany)
- Sokratis Katsikas (University of Piraeus, Greece)
- Matteo Maffei (Saarland University, Germany)
- Marius Minea (Politehnica University of Timisoara, Romania)
- Chris Mitchell (Royal Holloway University of London, UK)
- Chris Novakovic (Imperial College London, UK)
- David Nowak (CNRS & Lille 1 University, France)
- Kenneth Radke (Queensland University of Technology, Australia)
- Tamara Rezk (Inria, France)
- William Robertson (Northeastern University, USA)
- Andrei Sabelfeld (Chalmers University of Technology, Sweden)
- Hossain Shahriar (Kennesaw State University, USA)
- Haya Shulman (TU Darmstadt, Germany)
- Deian Stefan (UC San Diego and GitStar, USA)
- Ruoyu Wang (UC Santa Barbara, USA)

This year we received 58 submissions, as usual from virtually everywhere in the world. The review process, which also involved a number of qualified delegates, was double-blind in the sense that the paper authors were kept anonymous from the reviewers. Each paper received at least 3 reviews, and all papers and reviews were ultimately discussed in depth by the entire Program Committee. As a result of this scientifically thrilling process, papers were marked either for acceptance or for rejection. In the end, only 10 papers were accepted, defining a selective acceptance rate just above 2031.
17%. We are therefore confident of the high quality of the published material, and remain indebted to the reviewers for their thorough work.

Here is this edition's programme:

- Bacs et al. demonstrate an intrusion detection system for virtualized storage devices. Experimental results confirm it effective at enhancing the security of virtualized servers, while imposing minor performance and production overhead.
- Larmuseau et al. implement a secure abstract state machine for the ML language. The machine has the feature of preserving the abstractions of ML in possibly malicious, low-level contexts.
- Martinelli et al. enhance the Android permission system through a Usage Control-based framework. It allows employees to write policies that are continuously enforced while BYOD applications are running.
- Li et al. introduce an out-of-band approach to discover Tor hidden services. It is found to be simpler and more lightweight than traditional approaches: using multiple search engines with specific keywords.
- Yuksel et al. focus on intrusion detection for industrial control systems networks and advance an innovative, practical and semantics-aware framework for anomaly detection. It minimises the false-positive rate.
- Backes et al. perform an automated security analysis of the actual JavaScript implementation of the Helios voting client. A sequence of program transformations makes the code amenable to existing static analysis techniques.
- Han and Shen introduce four categories of email profiling features that capture various characteristics of spear phishing email. The system is demonstrated to suffer a very minor false-positive rate.
- Wuchner et al. tackle the problem of identifying malicious domains. They propose an approach that automatically estimates the risk associated with a domain upon the basis of the data flow induced when communicating with it.
- Calvi and Viganò face the issue of chained attacks over web applications. They advance an automated model-based approach to test their security.
- De Groef et al. work over a new technology stack that enables real-time communication on the Web. They identify three novel attacks against endpoint authenticity, and discuss defensive strategies.

About the track chairs

Giampaolo Bella is Associate Professor at the University of Catania, doing teaching and research in Computer Security and Formal Methods. He has chaired the Computer Security track at ACM SAC since its inception. After his Ph.D. from Cambridge University, he was a research associate at TU Munich, Cambridge University, and a senior researcher at SAP Research France. He has recently been developing formal approaches and methodologies to studying the security problem as a socio-technical, trans-disciplinary one.

Sergio Maffeis is a lecturer in Computer Security at Imperial College London. His research straddles web security, formal methods, and programming languages. Recent contributions include automated testing of browser security policies, defensive cryptography in the browser, security analysis of social sing-on and encrypted cloud storage, and defining formal, executable semantics for JavaScript and PHP. Maffeis received his PhD from Imperial and has been a visiting researcher at INRIA, Stanford, UCSC, and Microsoft Research.
The software platforms are in a constant state of change with new devices and technologies introduced almost every day. As a result, software platform developers and researchers continue to evolve software technologies that are used for increasing mobile conversions and enhancing relationships among users. The structure of software systems involves working with a wide variety of software platforms and technologies range from embedded devices and smartphones on the low end, to enterprise and distributed systems on the high end. Many research questions remain open from limited battery to remote access control, interaction with external devices, assurance in quality of service, context-aware adaptation to the environment, interface modeling or other issues (security and privacy problems) that are obstacles to thrive software platform technologies. This track aims to share research results and experiences in Software Platforms field with researchers and developers, the track addresses all of these research issues related to software platforms. This track has received 24 submissions from different countries around the world. Each paper has underwent a blind review process by three members of the track Technical Program Committee (TPC), and 3 regular full papers and 3 poster papers have been accepted for publications in the proceedings of the conference. The regular papers accepted by this track include:

- Evaluation of Smart Scheduling Technologies: Static versus Dynamic Approaches
- Experimental Approach: Two-stage Spectrum Sensing Using GNU Radio and USRP to Detect Primary User’s Signal
- Optimized Multilayer Perceptron using Dynamic Learning Rate Based Microwave Tomography Breast Cancer Screening

The ACM SAC 2015 Software Platform track was chaired by Drs. Jinman Jung, and Jun Huang, who wish to thank all the TPC members for their valuable time and technical input for running such an excellent track. Without their support and contributions, this track would not be successful. The special thanks will be given to the Drs. Jiman Hong and Maria Lencaste for their leadership and superb work to organize the SAC conference. Finally, the track chairs would like to thank all the authors who contributed to this track.
EDITORIAL MESSAGE

Special Track on Trust, Reputation, Evidence and other Collaboration Know-how (TRECK)

Jean-Marc Seigneur, University of Geneva, Switzerland
Ronald Petrlic, Saarland University, Germany

Computational trust and online reputation services have reached the mass market. Traditional business intelligence tools have even prominently added e-reputation features to promote their solution. The TRECK track in Pisa, Italy, will surely foster exciting collaborations and technology transfers, especially for the growing realm of mobile applications and online services related to this ACM SAC track.

The trustcomp online community (http://tech.groups.yahoo.com/group/trustcomp/ and http://www.trustcomp.org) has been set up for the participants of the track and every person working in a field related to TRECK since mid-2004. The trustcomp mailing list now counts more than 290 members composed of a panel of experts from both the academic and the industrial world, with competences from various fields such as security, risk management, business intelligence, Web marketing, human computer interface (HCI).

We would like to thank all the authors for submitting their paper contributions to the ACM SAC’16 TRECK track. We are grateful to the many external reviewers for their time and hard work to select the best full papers. Many thanks to the SAC organizing committee, who believes in the potential of the TRECK track, as well as to the ACM SIGAPP!
